## PREFACE.

COMPILING the history of a county like Monroe, containing 255,403 acres of land, three-fourths of which are under cultivation, with all the wood land, as it is on each farm up to the present date, shown on maps, accompanied by a carefully prepared survey of the same, such as has been made by us for this work, requires patience, care and accuracy, to reconcile the thousand and one locations of all the farm lines, with the number of acres, also showing the wood land, springs, streams, roads, cemeteries, churches, school districts and school houses thereon, owners of land, Congressional township boundaries, wagon roads, railroads, post roads, creeks, dwelling houses, cities and towns, showing houses in brick and frame—brick in colors—post offices, shops, stone quarries, coal banks, coal, Nos. of sections, lots, oil wells and oil fields, etc.

In this work we have been aided by every farmer in the county to make all corrections and to locate their orchards, springs, wood lands, etc., and have been approved by them.

History should be preserved and studied, because the only light we have is the maps to guide us in the future. By their light we can trace to the very spot, the history of nations that have grown to prosperity and power, and their people made happy and prosperous, or we can trace the cause that has led to the downfall of governments and reduced their people to poverty, degradation and misery.

It was from the history of the nations of the past that we gained the knowledge that enabled us to form the best system of government the world has ever known.

Without this light thrown on our pathway by maps, guiding us in the history of gone-by ages, the world would leave us groping our way in darkness, without a ray of light to guide us through the future ages. This perpetuates the record, revised and approved by all the land owners, and verified by records, which is a lasting history for all time to come.

The importance of preserving the early maps, with the histories of nations, States and communities, can hardly be estimated. The facts thus preserved will enable the future generations, with their historians, to account for many things that might otherwise appear obscure. The origin of the character of nations, States or communities may often be explained by tracing back on the maps to the influence exerted upon them by some one or more individuals, who have preserved the record for generations past. This record is a lasting record for all history; both civil and military.

Besides this, it is a duty that we owe to our forefathers, who have borne the toil and hardships of clearing away the forest and

establishing institutions that have given us the best government ever known to man; to preserve and keep their names and deeds in everlasting remembrance. Their bones are moulding to dust, but their memories have the greenest spot mapped out in the American history. The man with a soul so small, or a mind so uncultivated or indifferent as not to desire to perpetuate the record and preserve the names and work of their forefathers, who have left him such a priceless heritage, hardly deserves to enjoy the blessings bequeathed to him.

To the man of cultivated tastes or appreciative mind, there is no surer or better pleasure than to recall to mind the early scenes which are mapped out, and the early incidents of the very ground he now occupies. In his imagination, he sees the forests and the old pioneers at work clearing up their farms and building their cabins—some of which are standing to the present day. He can, to-day, on the maps, view the actual localities made memorable by the deadly assault of the Indians, or the capture of some early settler by the wily savages. Local maps, combined with history if preserved, will point out the spot and location of all the adventures and incidents of the early pioneer times, bringing before the cultured mind a complete map, or, we might say, a vivid panorama of scenes of farms, timber and cleared lands, with location of all the improvements to date, which shows the great change which has taken place since that time.

We hope, after the labors of two years in making the survey of this county, that we have been the means of gathering information, and making the survey so complete as to make it a lasting history of the county and a ready reference.

We have not gone into the detailed history of the county, but we give some unwritten history of the early divisions, showing the different land grants made in Ohio, which can also be found on the State maps and as this comes directly in our line of work, we have tried to give it as full, in detail, as we can, for the benefit of the public.

In conclusion, we beg to tender our kindest thanks and acknowledgments to the people of Monroe County, for the generosity and kindness so uniformly extended to us in furnishing the information and aid so much needed by the engineer and surveyor, in the prosecution of a work of this magnitude.

We would be pleased to mention the names of those who have taken so deep an interest in our work, but the number is so great it would occupy too much space. We have been greatly aided by the services of John and Miles Okey, Civil Engineers, in getting out this work. We hope, therefore, that all will accept this general acknowledgment, which is none the less sincere.

# HISTORICAL SKETCH OF MONROE COUNTY, OHIO.

OHIO, AS IT EMERGED ABOVE THE  
WATERS.

GEOLOGICAL FORMATIONS—PRIMITIVE RACES—  
MOUND BUILDERS—TITLES TO OHIO—  
INDIANS—OHIO WITHOUT INHABITANTS—  
FRENCH TITLE—ENGLISH TITLE—THE TITLE  
OF THE UNITED STATES.

When the territory of Ohio emerged from the ancient waters of the carboniferous period, it presented the appearance of an extended monotonous plain. It has not been materially changed since that period, in a topographical sense, except by the excavating power of the streams. There are no geological uplifts, or mountain ranges, or peaks.

In Ohio, no primitive rocks are found in place. Her rocks are all sedimentary and stratified, and, as they are horizontal, the strata that appear at the surface are few. Her geology is, therefore, very simple and easily understood, especially when we compare it with that of New York or Pennsylvania, where a much greater variety of formations are seen.

The lowest visible rock in Ohio is the blue limestone of Cincinnati, which is also the lowest in a physical as well as in a geological sense. We have no means of ascertaining the thickness of the blue limestone, for we have not penetrated through it to the rocks beneath; yet, it is estimated at more than 1,000 feet, 600 to 700 of which are visible.

If we group the rocks of Ohio according to their lithological characters, there are five distinct divisions, that any person will discover on examination. The difference in appearance, hardness, color and composition is so marked that no mere natural division could be made.

## PRIMITIVE RACES OF OHIO.

It is not determined whether we have yet discovered the original or first people who occupied the soil of Ohio. Modern investigations are continually bringing to light evidences of earlier races. Since the presence of man has been established in Europe as a contemporary of the fossil elephant, mastodon, rhinoceros and the horse, of the latter drift or glacial period, we may reasonably anticipate the presence of man in America in that era. Such proofs are already known, but they are not of that conclusive character that amounts to a demonstration. It is, however, known that an ancient people inhabited Ohio in advance of the red man, who was found here nearly four hundred years ago, by the Spanish and French explorers.

CHARLES O. LITTLE, Deputy Sheriff.

Five or six hundred years before the arrival of Columbus, the Northmen sailed from Norway, Iceland and Greenland, along the Atlantic coast as far south as Long Island. They then found Indian tribes in New England, closely resembling those who lived upon the coast, and the St. Lawrence, when the English and French came to possess those regions.

These red Indians have no traditions of a prior people, but there are over a large part of the Lake country, and of the valley of the Mississippi, earth works, mounds, pyramids, ditches and forts, the works of a more ancient race, and a people far in advance of the Indian. If they were not civilized they were not barbarians. They were not mere hunters, but had fixed habitations, cultivated the soil, and possessed mechanical skill. We know them as "Mound Builders," because they erected over the mortal remains of their principal men and women memorial mounds of earth or unhewn stone—of which hundreds remain to our day—many of them so large and high that they give rise to an impression of the numbers and energy of their builders, such as we receive from the pyramids of Egypt.

## TITLES OF OHIO.

The territory that now constitutes Ohio was, first of all, so far as we can judge, in full possession of the race of Mound Builders; afterwards (but still in pre-historic times) its sole occupants and owners, for some centuries, were unquestionably those Indian tribes or nations found here by the Europeans. They, as well as the Mound Builders, held titles acquired probably by priority of discovery—by conquest—by occupancy or possession. Possessory titles they might be appropriately termed.

## OHIO WITHOUT INHABITANTS.

After the destruction of the Eries by the Five Nations, in 1656, and until 1700, or a little later, what is now the State of Ohio was uninhabited—a silent wilderness. The Miami Confederation, inhabiting the southern shore of Lake Michigan, extended southeasterly to the Wabash. The Illinois Confederacy extended down the eastern shore of the Mississippi to within about eighty miles of the Ohio. Hunting parties of the Chickasaws roamed up the eastern shore of the Mississippi to about where Memphis now stands. The Cherokees occupied the slopes and valleys of the mountains about the borders of what is now East Tennessee, North Carolina and Georgia. The great basin, bounded north by Lake Erie, the Miami and the Illinois, west by the Mississippi, east by the Alleghenies, and south by the headwaters of the streams that flow into the gulf of Mexico, seems to have been uninhabited, and scarcely visited, except by war parties of the Five Nations.

In the next half century, from 1700 to 1750, various tribes pressed into what is now Ohio, across all its borders. In the early part of the eighteenth century the Wendats, called by the French Ouenrats, and spelled by the English Wyandots, extended their settlements into the northwestern part of Ohio, and became permanently fixed there.

The Miamis pushed their borders into the western portion. Shawnees settled the Scioto Valley. The Shawnees were not found originally in Ohio, but migrated there after 1750. They were called by the French Chaouanous, by the English Shawnees, which was afterwards changed to Shawnee, and recently to Shawnee. The Delawares settled the valleys of the Muskingum. Detachments of the Five Nations, mostly Senecas, occupied part of the northern and eastern part of the State. The Senecas who settled the northern part were called by that name. Those who settled in the eastern portion, between the Delawares and the Pennsylvania border, were called Mingoes. The Five Nations were called Iroquois by the

French, Maquas by the Dutch, Five Nations by the English, and Mengwe by the Delawares. The Pennsylvanians, changing the appellation "Mengwe," which they had heard used by the Delawares, called the Five Nations "Mingoes." And so the band of Senecas who settled in Ohio, between the Delawares, on the Muskingum and the Pennsylvania border, went by the name of Mingoes.

These were the Indians that occupied the territory that now forms the State of Ohio, immediately before its settlement by the whites—and these were the tribes whom our forefathers had to subdue before they could peacefully possess the land.

## THE FRENCH TITLE.

The claims of the different European monarchs to large portions of the western continent were based upon the first discoveries made by their subjects, without regard to the rights of the occupants of the country—the Indians.

Thus France claimed, by right of priority of discovery, all the territory now comprised within the limits of Ohio, which was a part of that region between the Allegheny and Rocky Mountains, first known by the general name of Louisiana.

## THE ENGLISH TITLE.

The principal ground whereon the English claimed dominion beyond the Alleghenies was that the Six Nations owned the Ohio Valley and had placed it, with their other lands, under the protection of England. Some of the western lands were also claimed by the British as having been actually purchased, at Lancaster, Penna., in 1744, at a treaty between the colonists and the Six Nations at that place.

These conflicting claims of France and England were settled by the arbitrament of the sword, and, after long and bloody wars, France succumbed to the power of England, and, by the treaty of Paris, in February, 1763, she formally relinquished to Great Britain all her claims to that portion of her territory between the Ohio and the Mississippi.

## THE TITLE OF THE UNITED STATES.

The colonies having, in 1776, renounced their allegiance to the British king, and assumed rank as free, sovereign and independent States, each State claimed the right of soil and jurisdiction over the district of country embraced within its charter from the kings of England.

The claim of the English to the late northwestern territory was ceded to the United States by the treaty of peace signed at Paris, September 3, 1783. The provisional articles which formed the basis of that treaty, more especially as related to the boundary, were signed at Paris, November 2, 1782. During the pendency of the negotiation relative to these preliminary articles, Mr. Oswald, the British Commissioner, proposed the Ohio River as the western boundary of the United States, and but for the indomitable perseverance of that revolutionary patriot, John Adams, one of the American Commissioners, who opposed the proposition, and insisted on the Mississippi as the boundary, the probability is that the proposition of Mr. Oswald would have been acceded to by the United States Commissioners.

Those States which had no charters for western land grants insisted that these unappropriated lands ought to be used for the benefit of all the States, according to their population, as the titles to them were secured by the blood and treasure of all. Congress repeatedly urged upon those States owning western unappropriated lands to make liberal cessions of them for the common benefit of all.

The States claiming rights or titles to these western lands finally ceded their claims to them

A. L. TUBAUGH, Furniture Dealer.

to the general government, to be held for the benefit of all the States, with certain reservations made by Virginia and Connecticut, as will be presently stated.

Thus the United States ostensibly acquired the sole title to the territory that now embraces within its limits the State of Ohio.

But these were not, however, the only claims that had to be extinguished, prior to the commencement of settlements within its limits. Numerous savage Indian tribes asserted their respective claims, by virtue of prior possession, which had also to be extinguished.

A treaty for this purpose was accordingly made at Fort Stanwix, October 27, 1784, with the sachems and warriors of the Mohawks, Onondagas, Senecas, Cayugas, Oneidas and Tuscaroras, by the third article of which treaty the said Six Nations ceded to the United States all claims to the country west of a line extending along the western boundary of Pennsylvania, from the mouth of Oyouneyed to the river Ohio. A treaty was also concluded at Fort McIntosh, January 21, 1785, with the Wyandot, Delaware, Chippewa and Ottawa nations, by which more accessions of territory were acquired.

THE CLAIMS OF VIRGINIA  
AND OTHER STATES TO THE TERRITORY NORTHWEST OF THE OHIO RIVER, AND THE  
CRESSION OF THEIR TITLES TO  
THE GENERAL GOVERNMENT.

As just state I, at the close of the Revolutionary War, several of the confederated States claimed titles to more or less of this territory, by virtue of grants made by the kings of England previous to that struggle. Virginia acquired a title by its several charters granted by James I, bearing dates respectively April 10, 1606; May 23, 1609; March 12, 1611. The colony of Virginia first attempted to exercise authority in, or jurisdiction over, that portion of its extensive domains that was organized by the ordinance of '87, in "The territory northwest of the river Ohio," when, in 1789, the House of Burgesses of said colony passed an Act establishing the county of Botetourt, with the Mississippi River as its western boundary. The aforesaid Act recited, that "Whereas, the people situated on the Mississippi, in the said county of Botetourt, will be very remote from the court house, and must necessarily become a separate county, as soon as their numbers are sufficient, which will probably happen in a short time; be it therefore enacted by the authority aforesaid, that the inhabitants of that part of the said county of

## HISTORICAL SKETCH OF MONROE COUNTY.

Botetourt, which lies on the said waters of the Mississippi, shall be exempted from the payment of any levies to be laid by the said county court, for the purpose of building a court house and prison for said county."

Connecticut also held claim for a portion of this territory extending to the Pacific coast, granted by Charles II, April 23, 1662. Massachusetts had similar claims, so also had New York.

From the vague and indefinite ideas of the English government in regard to the geography of the "New World," these grants were not clearly defined or described, and, sometimes, they overlapped. This was likely to lead to disputes and wrangling among the claimants that would be difficult to decide.

In the Legislature of Connecticut was asserted the undoubted and exclusive right of jurisdiction, and "Resolved that his excellency, the Governor, be desired to issue his proclamation, declaring and asserting the right of his State to all the lands within the limits aforesaid, and strictly forbidding all persons to enter or settle thereon, without special license or authority, first obtained from the General Assembly of this State."

In consequence of this state of affairs, Congress, in 1784, addressed a recommendation to all the States having territorial claims in the West, asking them to cede their lands to the Confederacy, to aid the payment of the debts incurred during the revolution, and to promote the harmony of the Union.

In accordance with this recommendation, Virginia, on the first day of March, 1784, by her delegates in Congress, Thomas Jefferson, Samuel Hardy, Arthur Lee and James Monroe, ceded all her rights in the territory northwest of the Ohio to the United States.

On the first day of March, 1781, New York ceded all her claims to the northwest territory to the general government; and, on the 18th day of April, 1785, Massachusetts ceded to the United States all her claims to the western territories.

On the 14th of September, 1786, the delegates from Connecticut executed a deed of cession, in accordance with the terms proposed by Congress; thus the title to the whole of the territory northwest of the Ohio became the property of the government. This vast domain contained several hundred millions of acres.

When Ohio as admitted into the Union as an independent State, one of the terms of admission was, that the fee simple to all the lands within its limits, except those previously granted or sold, should vest in the United States. Different portions of these lands had or have at different periods been granted or sold to various individuals, companies or bodies politic.

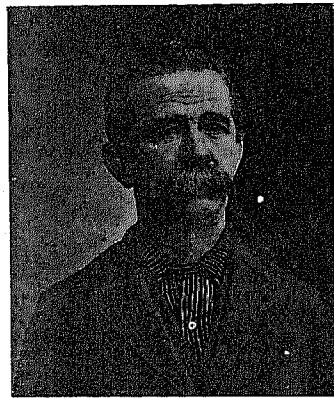

## LAND GRANTS.

The following are the names by which the different bodies of these lands are designated, on account of these different forms of transfers, to wit:

1. Congress Lands.
2. United States Military.
3. Western Reserve.
4. Fire Lands.
5. Ohio Company's purchase.
6. Donation Tract.
7. Symmes' Purchase.
8. Refugee Tract.
9. French Grant.
10. Dohrman's Grant.
11. Zane's Grant.
12. Canal Lands.
13. Turnpike Lands.
14. Maumee Road Lands.
15. School Lands.
16. College Lands.
17. Ministerial Lands.
18. Moravian Lands.
19. Salt Sections.
20. Virginia Military Land.

## CONGRESS LANDS.

Congress Lands are so called because they were sold to purchasers by the immediate agents of the government, conformably to laws enacted by Congress. They are all regularly surveyed into townships of six miles square each, under the authority and at the expense of the national government. In the eastern half of the State, that is, east of the Scioto river, and on a meridian line drawn three miles within the eastern limits of Marion and Crawford counties, the ranges are counted from east to west, and the numbers of the townships from south to north, beginning on the Ohio as a base. But, in the west half of the State, the ranges begin on the State line of Indiana, and are counted eastwardly, until they reach the

J. M. BOUGHNER, Recorder.

other ranges, which are numbered westwardly, as above mentioned, excepting between the two Miami rivers, where the ranges run from south to north, and the numbers of the townships from west to east, that is, from the Great Miami as a base. In the purchase made in 1818, north of the Greenville treaty line, however, a "base line" is made in about the middle of the tract, on the parallel of the 41st degree north latitude, from which the townships are numbered both north and south.

## UNITED STATES MILITARY LANDS.

These lands are so called from the circumstance of their having been appropriated by an Act of Congress, of the 1st of June, 1796, to satisfy certain claims of the officers and soldiers of the Revolutionary War. The tract of country embracing these lands is bounded as follows: Beginning at the northwest corner of the original seven ranges, thence south fifty miles, thence west to the Scioto river, thence up said river to the Greenville treaty line, thence northeasterly with said line, to old Fort Lawrence on the Tuscarawas river, thence due east to the place of beginning, including a tract of about 4,000 square miles, or 2,560,000 acres of land. It is, of course, bounded north by the Greenville treaty line, east by the seven ranges of townships, south by the Congress and Refugee lands and west by the Scioto river.

These lands are surveyed into townships five miles square. The townships were then again originally surveyed into quarter townships, of two and a half miles square, containing 4,000 acres each. Subsequently, some of these quarter townships were subdivided into forty lots of 100 acres each, for the accommodation of those soldiers who held warrants for 100 acres only. And, again, after the time originally assigned for the location of these warrants had expired, certain quarter townships, which had not been located, were divided into sections of one mile square each, and sold by the general government like the main body of Congress lands.

## WESTERN RESERVE.

This land, as before stated, was originally granted to Connecticut by Charles II, in 1662. This territory is situated in the northeast portion of the State, between Lake Erie on the north, Pennsylvania on the east, the parallel of the 41st degree of latitude on the south, and Sandusky and Seneca counties on the west. It extends 120 miles from east to west, and will average about fifty miles north and south, though upon the Pennsylvania line it is sixty-eight miles from north to south. The area is about 3,800,000 acres. It is surveyed into townships of five miles square.

After the United States became a nation, the interfering claims of the different States in regard to the original grants made by the Kings of England, as before stated, were likely to become a source of trouble that might terminate in disastrous results. When Congress undertook to obtain the title from the States of their rights to these territories, it was with difficulty that the consent of Connecticut to the cession of her rights could be obtained. A compromise was finally effected, by which Connecticut retained her right to the soil of these 3,800,000 acres, while Congress obtained the right to the jurisdiction over it. They then united this tract to the territory that now forms the State of Ohio.

## FIRE LANDS.

This is a tract 781 square miles, or 500,000 acres, in the western part of the Reserve. The name originated from the circumstances of the State of Connecticut having granted these lands, in 1792, as a donation to certain sufferers by fire, occasioned by the burning of the property of her citizens by the English during the Revolutionary War, particularly at New London, Fairfield and Norwalk. These lands include the five westernmost ranges of the Western Reserve townships. Lake Erie and Sandusky Bay project so far south as to leave but the space of six tiers and some fractions of townships between them and the 41st parallel, or a tract of about thirty by twenty-seven miles in extent.

This tract is surveyed into townships of about five miles square each, and these townships are divided into four quarters.

## OHIO COMPANY'S LAND.

This is a body of land containing about 1,500,000 acres, including, however, the donation tract, school lands, etc., lying along the Ohio river, and including Meigs, nearly all of Athens and a considerable part of Washington and Gallia counties. This tract was purchased by the government, October 27, 1787, by Manasseh Cutler and Winthrop Sargent, from the neighborhood of Salem, Massachusetts, as agents for the "Ohio Company," so called, which had been formed in Massachusetts for the purpose of a settlement in the Ohio Country. Only 964,285 acres were ultimately paid for, and, of course, patented. This body of land was then apportioned out into 817 shares of 1,173 acres each, and a town lot of one-third of an acre to each share. These shares were made up to each proprietor, in tracts, one of 640 acres, one of 262, one of 150, one of 100, one of eight, one of three acres, besides the before-mentioned town lot.

Unfortunately for the Ohio Company, owing to their want of topographical knowledge of the country, the body of land selected by them, with some partial exceptions, is the most hilly and sterile of any tract of land of similar extent in the State.

A great portion of its first settlers were revolutionary officers and soldiers, with their families. They made their first settlement on the Ohio river, at the mouth of the Muskingum, where they founded the town of Marietta, which was the first important settlement in the State.

## THE DONATION TRACT

Is a body of 100,000 acres set off in the northern limits of the Ohio Company's tract, and granted to them by Congress, provided they should obtain one actual settler upon each 100 acres thereof, within five years from the date of the grant, and that so much of the 100,000 acres aforesaid as should not be taken up shall revert to the general government.

This tract may, in some respects, be considered a part of the Ohio Company's purchase. It is situated in the northern limits of Washington county. It lies in an oblong shape, extending nearly seventeen miles from east to west, and about seven and a half miles from north to south.

## SYMMES' PURCHASE.

This was a tract of 311,682 acres of land in the southwestern quarter of the State, between the Great and Little Miami rivers. It borders on the Ohio river a distance of twenty-seven miles, and extends so far back from the latter, between the two Miamis, as to include the quantity of land just mentioned. It was patented to John Cleves Symmes, in 1794, for sixty-seven cents per acre. Every section 16, or one mile square, in each township, was reserved by Congress for the use of schools; and section 29 for the support of religious institutions, besides fifteen acres around Fort Washington, in Cincinnati. This tract of country is now one of the most valuable in the State.

## REFUGEE TRACT.

This is a body of 100,000 acres of land, granted by Congress, February 18, 1801, to certain individuals who left the British provinces during the Revolutionary War and espoused the cause of freedom. It is a narrow strip of country, four and a half miles broad from north to south, and extending eastward from the Scioto river forty-eight miles, at Columbus, into Muskingum county. It includes portions of the counties of Franklin, Fairfield, Perry, Licking and Muskingum.

## FRENCH GRANT.

This is a tract of 24,000 acres of land bordering on the Ohio river, in the southeastern portion of Scioto county. It was granted by Congress, in March, 1795, to a number of French families, who lost their lands at Gallipolis by invalid titles. It extends from a point on the Ohio river, one and one-half miles above, but opposite the mouth of Little Sandy creek, in Kentucky, and extending eight miles in a direct line down the river, and from the two extremities of that line, extending back at right angles sufficiently far to include the quantity of land required, which exceeded four and a half miles back.

Twelve hundred acres additional were afterwards granted, adjoining the above-mentioned tract, at its lower end, toward the mouth of Little Scioto river. Although the land in question was originally granted exclusively to Frenchmen, not more than eight or ten French families permanently settled on it, the other portion of the population being composed of emigrants from Vermont, New Hampshire and other States. This tract is composed of the township of Greene, in Scioto county.

## DOHRMAN'S GRANT.

This is a six-mile square township of land, containing 28,040 acres, situated in the southeast portion of Tuscarawas county. It was given to Arnold Henry Dohrman, a Portuguese merchant of Lisbon, by Act of Congress of February 27, 1801, "In consideration of his having, during the Revolutionary War, given shelter and aid to the American cruisers and vessels of war."

## MORAVIAN LANDS.

These are three several tracts of 4,000 acres each, originally granted by the old Continental Congress, in July, 1787, and confirmed by the Act of Congress of June 1, 1796, to the Moravian brethren, at Bethlehem, in Pennsylvania, in trust and for the use of the Christianized Indians living thereon. They are laid out in nearly square forms on the Muskingum river, in what is now Tuscarawas county. They are called by the names of Schenbrun, Gnadenhutten and Salem tracts. The Indians have long since left them.

## ZANE'S TRACTS.

These are three several tracts of one mile square each—one on the Muskingum river, which includes the city of Zanesville—one at the crossing of the Hocking river, on which the town of Lancaster is laid out—and the third on the left bank of the Scioto river, opposite Chillicothe. They were granted by Congress in May, 1796, to Ebenezer Zane, on condition that he should open a road through them from Wheeling, Virginia, to Maysville, Kentucky.

There were also three other tracts, one mile square each, granted to Isaac Zane, in 1802, in consequence of his having been taken prisoner by the Indians when a boy, during the Revolutionary War, and living with them most of his life, and having, during that time, performed many acts of kindness and beneficence towards the American people. These tracts are situated in Champaign county, on King's creek, from three to five miles northwest of Urbana.

## HISTORICAL SKETCH OF MONROE COUNTY.

### THE MAUMEE ROAD LANDS.

These are a body of lands, averaging two miles wide, lying along one mile on each side of the road from the Maumee river, at Perrysburg, to the western limits of the Western Reserve, a distance of about forty-six miles, and comprising nearly 60,000 acres. They were originally granted by the Indian owners, at the treaty of Brownsville, in 1808, to enable the United States to make a road on the line just mentioned. The general government never moved in the business until February, 1823, when Congress passed an Act, making over the aforesaid lands to the State of Ohio, provided she would, within four years thereafter, make and keep in repair a good road throughout the aforesaid route of forty-six miles. This road the State government opened out, obtained the land and sold it.

### TURNPike LANDS.

These are forty-nine sections, amounting to 31,360 acres, situated along the western side of the Columbus and Sandusky Turnpike, in the eastern part of Seneca, Crawford and Marion counties. They were originally granted by an Act of Congress, on the 8th of March, 1827, and more especially by a supplementary Act the next year. The considerations, for which these lands were granted, were that the mail stages, and all troops and property of the United States, which should ever be moved and transferred along this road, should pass free of toll.

### OHIO CANAL LANDS.

Congress, by an Act passed on the 24th of May, 1828, granted to the State of Ohio 500,000 acres of land to aid the State in completing her canals, and also a quantity "equal to one-half of five sections in width on each side of said canal" (the Miami canal), so far as it passes through the public lands, north of the old Greenville treaty line, and this is estimated at 108 miles, thereby making the quantity of land thus granted 340,000 acres—or 840,000 acres in all, provided that all troops and property of the United States transported thereon shall pass free of toll, as in the case of the before-mentioned turnpike lands.

For both the canal and turnpike lands, the Governor made deeds to the individual purchasers.

### SCHOOL LANDS.

By compact between the United States and the State of Ohio, when the latter was admitted, it was stipulated, for and in consideration that the State should never tax the Congress Lands, until after they had been sold five years, and in consideration that the public lands would thereby more readily sell, that the one thirty-sixth part of all the territory included within the limits of the State should be set apart for the support of common schools therein. And, for the purpose of getting at lands which should, in point of quality of soil, be on an average with the whole of the land in the country, they decreed that it should be selected by lot, in small tracts; that, to effect this fairly, it should consist of section number 16, let that section be good or bad, in every township of Congress Land, and also in the Ohio Company's land and in Symmes' purchase, all of which townships are composed of thirty-six sections each;

and, for the United States Military Lands and Western Reserve, a number of quarter townships, two and a half miles square, each (being the smallest survey then made), should be selected by the Secretary of the Treasury, in different places throughout the United States Military Tract, equivalent in quality to the one thirty-sixth part of those two tracts, respectively. And for the Virginia Military Tract, Congress enacted that a quantity of land equal to the one thirty-sixth part of the estimated quantity of land contained therein should be selected by lot, in what is called the "New Purchase," now comprising Wayne, Richland and part of Holmes and Marion counties, in quarter township tracts of three miles square each. Most of these selections were accordingly made, but, in some instances by the carelessness of the officers conducting the sales, or from some other cause, a few Sections 16 had been sold, in which case Congress, when applied to, generally granted other lands in lieu thereof, as, for instance, no Section 16 was reserved in Montgomery township in which Columbus is situated.

### LOCAL COURTS AND COURT OFFICERS.

Among the earliest laws adopted was one which provided for the institution of a county Court of Common Pleas, to be composed of not less than three, nor more than five judges, commissioned by the Governor, who were to hold two sessions in each year. Pursuant to its provisions, the first session of said court was held in and for Washington county, September 2, 1788. The judges of the court were Gen. Rufus Putnam, Gen. Benjamin Tupper and Col. Archibald Crary. Col. Return Jonathan Meigs was clerk and Col. Ebenezer Sproat was sheriff. Elaborate details of the opening of this, the first court held in the northwest territory, have come down to us, showing it to have been a stylish, dignified proceeding. Briefly, "A procession was formed at the Point (the junction of the Muskingum with the Ohio river) of the inhabitants and the officers from Fort Harmar, who escorted the judge of the court, the governor of the territory, and the territorial judges to the hall appropriated for that purpose, in the northwest block-house in 'Campus Martius.' "The procession," says Mitchener, "was headed by the sheriff, with drawn sword and baton of office. After prayer, by Rev. Manasseh Cutler, the court was organized by

county fourteen years. The first grand jury of the northwest territory was impaneled by this court, and consisted of the following named gentlemen: William Stacey (foreman), Nathaniel Cushing, Nathan Goodale, Charles Knowles, Aselm Tupper, Jonathan Stone, Oliver Rice, Ezra Lunt, John Matthews, George Ingersoll, Jonathan Devol, Jethro Putnam, Samuel Stebbins and Jabez True.

The first permanent settlement in the new territory was made at Marietta, at the mouth of the Muskingum, by the Ohio Land Company. It was known as the "Muskingum Settlement."

On the 2d of July a meeting of the directors and agents was held on the banks of the Muskingum for the purpose of naming the new-born city and its public squares. As yet the settlement had been merely "The Muskingum," but the name Marietta was now formally given, in honor of Maria Antoinette; the square upon which the blockhouse stood was named Campus Martius; the square No. 19, Capitolium; the square No. 61, Cecilia; and the great road, the covert way, Sacra Via.

The second settlement was made at Cincinnati, late in 1788. There were two or three different companies of emigrants that came soon after each other, but the day and hour in which the party came that laid out the village that has grown up

The third settlement made in Ohio was at Manchester, Adams county, by Gen. Nathaniel Massie and a company of some twenty or thirty families or persons, who located where the upper part of the town now stands.

The exact date upon which these first emigrants pitched their tents there is not known, but it must have been the latter part of December, 1790, or early in January, 1791, for we learn that, by the middle of March, 1791, they had their cabins built and enclosed by a stockade that contained four or five acres of land.

We are aware that most writers say Gallipolis was the third point settled in the State, and they, likewise, give the date as 1791. But we think erroneous, because Massie's arrangements for a settlement being completed in the latter part of 1790, and his contract with his colonists being written and signed on the first day of December of that year, and those colonists living at no greater distance than Maysville, the inference is that but a brief time would elapse before they were on the ground.

This, in connection with the amount of labor they had performed by the middle of March, is conclusive evidence that they must have settled here in the very beginning of 1791, if not in the closing days of the preceding year.

Again, in regard to the Gallipolis settlement, which was made by Frenchmen, we learn that, in May or June, 1788, Joel Barlow, an agent for the "Scioto Land Company," left this country for Europe, "authorized to dispose of a very large body of land" in the west. In 1790, this gentleman distributed proposals in Paris for the sale of lands at five shillings per acre, "Which promised," says Volney, "a climate healthy and delightful; scarcely such a thing as frost in winter; a river called, by the way of eminence, 'The Beautiful,' abounding in fish of enormous size; magnificent forests of a tree from which sugar flows, and a shrub which yields candles; venison in abundance, without foxes, wolves, lions or tigers, no taxes to pay; no military enrollments; no quarters to find for soldiers."

"During the year 1791," says history, "a considerable number of Frenchmen with deeds in their pockets for farms, in this beautiful, happy land embarked for America, where they arrived, in 1791-92." From this the reader can readily see whether Gallipolis was settled before Manchester on the Ohio River, or on the valley of the Scioto, at Chillicothe. Besides, he can imagine the feeling of these poor foreigners, who had spent their all to reach this promised land, when they found, in addition to the disappointment of their anticipated expectations of its excellence, that those of whom they bought did not own a foot of it, and their deeds were worthless.

### ORGANIZATION OF COUNTIES.

#### WAYNE COUNTY—ITS BOUNDARIES—TOPOGRAPHY—SOIL—PRODUCTION—COUNTY SHAT QUESTION.

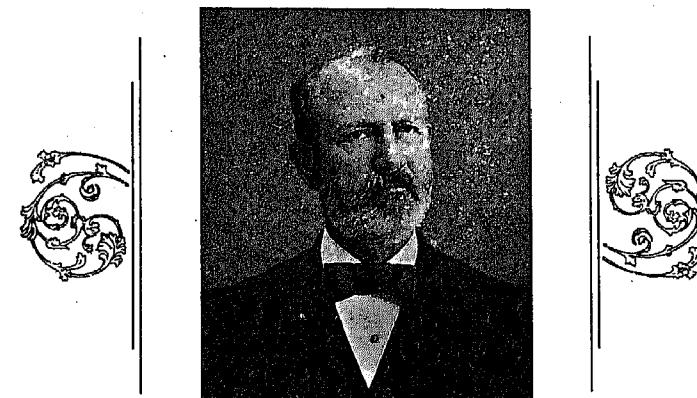

The Governor contended that the ordinance of 1787 gave him the power to divide the territory into counties, appoint and commission all officers, civil and military, below the rank of general officers, and that, having the undisputed right to appoint and commission all officers, it therefore followed as a necessary consequence, that he had the power of sub-dividing the counties, and refused to sign any law which might be passed for the sub-division of counties.

"The members of the legislature admitted that the Governor had the power to appoint and commission all officers below the rank of general officers, and to lay out the parts of the districts (territory) in which the Indian title had been extinguished into counties and townships, subject however, to such alterations as may thereafter be made by the legislature."

They contended that, after he had done that, that his power was at an end, because the territory had already been laid off by him and organized into counties, and that part of the ordinance which gave the Governor power to lay out the district into counties closes with the words, "Subject, however, to such alterations as may hereafter be made by the legislature," and that power for which he contended was a constructive one, not authorized by the Constitution.

Thus the dispute remained undetermined until the adoption of the Constitution and the establishment of a State government.

Washington County, embracing the eastern half of the present State of Ohio, was the only organized county of the North-west territory

HON. JOHN P. SPRIGGS.

John P. Spriggs was born in Belmont county, Ohio. In 1845 he removed with his father's family to that part of Guernsey county which is now Noble county, where he remained until after he attained his majority. His parents, Morris D. Spriggs and Catharine Spriggs (nee Pool) were both natives of Pennsylvania, from which state they removed to Ohio some three or more years before the subject of this sketch was born.

In 1855 he married Lucinda Windham, the daughter of George Windham, a Monroe county farmer, who was an uncle of Hon. William Windham, secretary of the treasury under President Garfield.

Four children survive of said marriage—G. B. McClellan and A. G. Thurman, the former an insurance agent and the latter a lawyer, now prosecuting attorney of this county; and Alice Virginia and Birdie Windham; the former resides at home with her parents, while the latter is married and resides in the state of Illinois.

Mr. Spriggs read law with his brother, Hon.

reading the commissions of the judges, clerk and sheriff, after which the sheriff proclaimed that the court was open for the administration of even-handed justice to the poor and the rich, to the guilty and the innocent, without respect of persons; none to be punished without a trial by their peers, and then in pursuance of the laws and evidence in the case."

On the 23d day of August, 1788, a law was promulgated for establishing "General Courts of Quarter Sessions of the peace." This court was composed of not less than three, nor more than five justices of the peace, appointed by the Governor, who were to hold four sessions in each year. The first session of this court was held at "Campus Martius," September 9, 1788. The commission appointing the judges thereof was read. "Gen. Rufus Putnam and Gen. Benjamin Tupper," says Mitchener, "constituted the justices of the quorum, and Isaac Pearce, Thomas Lord and Return Jonathan Meigs, Jr., the assistant justices; Col. Return Jonathan Meigs, Sr., was clerk. Col. Ebenezer Sproat was sheriff of Washington

to be the present city of Cincinnati is not with certainty known, although historians and writers have puzzled their brains over the question for many a day. It appears to be settled that this party left Maysville on the 29th of January, 1789, but as it has failed to record the day of its arrival, writers have undertaken to estimate the amount of hindering causes to navigation, such as ice and the bad weather usually occurring at that season of the year, but no two arrive at exactly the same conclusion. Therefore each reader must make his own calculation.

To ascertain the original price paid for the land on which the city stands is another question that has sorely perplexed writers in their researches. Now we state that Mathias Denman, the original purchaser, bought about eight hundred acres, for which he paid five shillings per acre, in Continental certificates, which were worth then, in specie, five shillings on the pound—so that the specific price per acre was fifteen pence. That sum, multiplied by the number of acres, will give the original cost of the plot of Cincinnati.

## HISTORICAL SKETCH OF MONROE COUNTY.

until early in 1790, when the Governor proclaimed Hamilton County, which included all the territory between the Big and Little Miami Rivers, and extending north to the "Standing Stone Forks," on the first named stream.

The following is a list of all the territorial counties organized; also the date of organization, with their respective county seats:

Counties.	When Proclaimed.	County Seat.
1. Washington...	July 27, 1788.....	Marietta.
2. Hamilton.....	January 2, 1790...	Cincinnati.
3. St. Clair.....	February, 1790...	Cahokia.
4. Knox.....	In 1790.....	Vincennes.
5. Randolph.....	In 1795.....	Kuskaskia.
6. Wayne.....	August 15, 1795.....	Detroit.
7. Adams.....	July 10, 1797.....	Manchester.
8. Jefferson.....	July 20, 1797.....	Steubenville.
9. Ross.....	August 20, 1797.....	Chillicothe.
10. Trumbull.....	July 10, 1800.....	Warren.
11. Clermont.....	December 6, 1800.....	Williamsburg.
12. Fairfield.....	December 6, 1800.....	New Lancaster.
13. Belmont.....	September 7, 1801	St. Clairsville.

Wayne was established by proclamation of Gen. St. Clair, August 16th, 1796, and was the third county formed in the N. W. Territory. Its original limits were very extensive, and were thus defined in the act creating it: Beginning at the mouth of the Cuyahoga river, upon Lake Erie, and with the said river to the Portage between it and the Tuscarawas branch of the Muskingum; thence down the said branch to the forks at the carrying place above Fort Laurens; thence by a west line to the east boundary of Hamilton County, (which is a due north line from the lower Shawnee town upon the Scioto River;) thence by a line west-northerly to the south part of Portage, between the Miamis of the Ohio and the St. Mary's River; thence by a line also west-northerly to the south-western part of the Portage, between the Wabash and the Miamis of Lake Erie, where Fort Wayne now stands; thence by a line west-northerly to the south part of Lake Michigan; thence along the western shores of the same to the north-west part thereof, including lands upon the stream emptying into the said lake; thence by a due north line to the territorial boundary in Lake Superior, and with the said boundary through Lakes Huron, St. Clair and Erie to the mouth of the Cuyahoga River, the place of beginning.

## REFUSED LANDS, CONDITION OF EARLY AGRICULTURE, THE OPENING OF MARKETS, ETC.

It is a fact, probably not known, but yet one well-authenticated, that the lands which now produce most abundantly of the great cereal staple of Monroe County, were regarded by the early settlers, as utterly valueless, for purposes of cultivation. Monroe County were regarded by the early settlers as utterly valueless for purposes of cultivation. The bottom, or valley lands, produced a very rank growth of vegetation, known as sedge grass, peat vine, &c. This vegetation afforded excellent pasture from early spring until about August. The sedge grass, when cut in July or earlier, afforded very nutritious and palatable food for domestic stock during the winter months. In the lapse of time, it became a matter of necessity, with the cultivators of the soil upon the bottom and valley lands, to fight and subdue these autumnal fires, for the protection of their own fences, cabins and granaries. When protected from the exhausting process, the uplands very soon resumed their natural fertility; a radical chemical change became apparent all over the surface of the soil, and efforts at cultivation demonstrated the fact that those rejected acres are now among the most fertile of any in Ohio, for the production of the staple, which is the chief source of our agricultural wealth.

The Indian tribes who inhabited this section were Delawares and Wyandots. Game was plenty for several years after the first settlement. The streams and ponds had far more water than now. The general health was pretty good, considering that the climate was much damper than at present; the principal diseases were intermittents and rheumatism, ague, and chills. The early labors of the husbandman were not attended with very good success; to account for this, we must consider that the implements of the farm were rude and imperfect—principally the tiller's own hand-craft—and that the seeds first planted or sowed were placed in ground but imperfectly cleared and partially covered with stumps and roots, and shaded by trees of larger growth, that had been deadened but still retained their leaves. Hence the "soft" corn, water-soaked potatoes, and perhaps the sick and smut-stricken wheat, sources of

general complaint among the early cultivators. The absence of foreign demand for produce during the first twenty years offered no incentive to a production beyond family and neighborhood wants. Aside from the supply of such wants, there was no stimulus to agricultural enterprise.

## THE SETTLEMENT OF NORTHERN OHIO, BY INDIANS.

It is often asked whether the Wyandots were the earliest inhabitants of Ohio. And who were they, and where did they come from. I quote from the very best authority that can be obtained. They came immediately from their homes about Detroit. They were formerly a powerful tribe, called Hurons by the French, and lived in the country between Lake Huron and Lake Ontario, until about the year 1650, when they were routed by the Five Nations of New York (afterward Six Nations), and then driven to the shores of Lake Superior.

About the year 1655, the Five Nations annihilated the Eries, called by the French the Cat Nation, who inhabited the southern shore of Lake Erie. For many years Ohio was uninhabited, and visited only by the hunting parties of the Five Nations, and their war parties passing to

work. Many of the acres that are now embraced within the limits of Monroe County have been, no doubt, the theater of events that would render them classic ground, but the history of those are not attainable.

In various histories of Ohio there is reference to the Indian trail leading from Fort Duquesne, by way of Sandusky to Detroit. This trail passed north of Monroe County, and will be found laid down on the county map. This route was supposed to have been opened soon after the erection of the fort at Pittsburgh, in 1754. We also find Hutchins' history of Boquet's expedition in 1764 gives five different routes through the Ohio wilderness. Second route, (163).

Referring to Pownal's map, published in 1776, which locates various Indian tribes then in Ohio, Mr. Taylor infers that the west branch of the Muskingum, known on our maps as the White-woman, or Mohican, was assigned to the remnants of the Old Connecticut Tribe.

## THE PIONEERS AND THEIR TIMES.

One hundred years have elapsed since the first settlement was commenced within what is now the organized territory of Monroe County. What changes have been wrought within the last cen-

there had been no sale of produce except for neighborhood consumption in Monroe, and a small river market; while westward of this, during the last 25 or 30 years particularly, artificial communications by means of river, turnpikes and railroads, have advanced almost *paripassu* with the van of the immigration column, and agriculture, commerce and manufactures, with all the happiness they bestow, have been enjoyed, with the exception of brief delays, by the first populations of the new states and territories. Steam and electricity, as agents of transit, have wrought a wonderful revolution in accelerating the distribution of population and wealth.

The early settlers made their way hither from their former eastern homes, by tedious process of horse and ox teams, and some even on foot, occupying weeks in their journeys. They were the manufacturers of almost everything they used, including their farming implements, and the fabrics with which they were clothed. Their food, also, as well as their raiment, was the exclusive production of their own farms. There was no importation of goods. Their mode of life, created by their necessities and their isolations, made them a race (*sui generis*). The world will "ne'er look upon their like again."

How different has it been with those who first settled the states and territories northwest and west of us; themselves and families, stock of clothing, farming implements, merchandise and abundant supplies of provisions, embracing even the luxuries of life, conveyed from their eastern homes to within a stone's throw of their place of destination in the far west, by means of the modern facilities which steam employs on natural and artificial channels, performing in a single day a distance which, fifty years since, would have occupied nearly or quite a month to accomplish. These transports, too, were conducted on a scale of cost corresponding in reduced amount with the difference in time employed. Thus, comparatively, has time and space and expense been equally annihilated by the magical improvements of the utilitarian era which has handed it down since the first white settler commenced his improvements of the soil within our limits. Had anything essential to comfort been forgotten by the pioneer families to the west of us, commerce meets them almost at the doorway of their cabin and supplies the needful commodity. The privations of the pioneer's life as it formerly existed, the accidental adventurer may have heard of or read of, but it is a matter altogether outside of his own experience.

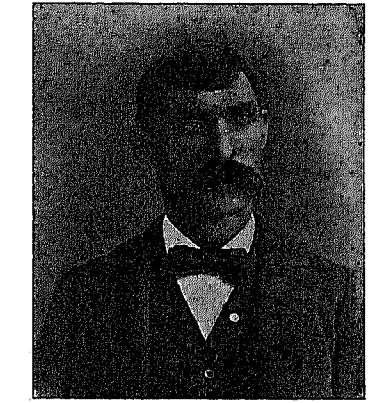

## PIONEER LIFE IN MONROE COUNTY.

We must confess to a feeling of veneration for the characters of those noble men who penetrated the wilderness, and inaugurated civilization and its train of blessings in a region where savages and wild beasts had maintained undisputed empire.

The scenes through which they passed are suggestive of rich fields for the genius of the poet and painter—fields that, it is hoped, may be hereafter occupied. Would not that reader, furnish a night scene for an artist, where our friend, J. A. Terrel of Woodsfield, was reposing in his log cabin, his faithful dog who always stood ready and willing to do his part as a protector, and the fire which always blazed at night a few feet distant from his hammock, his trusty rifle supported by his left arm, the reptiles coiling upon the ground beneath him, the hordes of ravenous wolves, attracted by the venison, the savory of which, during the process of cooking, had impregnated the atmosphere around, stimulating their voracious appetites to a point of uncontrollable fury. Would not this and many kindred scenes described in the history of those times, constitute material worthy the genius of the best painter?

\* \* \*

There is much embraced in the personal history of the pioneers that might interest the general reader, if space would permit me to give it more fully. All efforts at adornment of these narratives, however, would only impair their value. They are the most attractive in the simplest form. No county settled at and prior to the date of the portion which now forms the State of Ohio, ever had but one race of pioneers—men who penetrated the wilderness, endured all the hardships incidental to its subjugation, and transmitted to their successors the comforts and conveniences of a high civilization. When this class of men pass off a given spot, they disappear for all time; the county which was first redeemed by them will know them nor their like no more forever. If the collection of materials for a history of this county had commenced earlier, it might have been made very vastly more interesting.

GEORGE WINLAND, County Commissioner.

George Winland, of Woodsfield, Ohio, was born in Washington county, near Mattamoris, February 17, 1863; removed to Monroe county with his parents in 1869; was educated in the common schools of Monroe county, and followed the occupation of farming until the spring of 1893, at which time he became a candidate for county commissioner at the convention, being the successful candidate against the two distinguished men, the Hon. Benjamin Younkes and Chas. Schumaker. Filling the office of county commissioner with credit to himself and the people of Monroe county, and again was re-elected in the fall of 1897, and will again, with the respect of the people, serve the county as county commissioner.

Mr. Winland in 1882 married Alice May Vaughn, the daughter of Joshua Vaughn, and to them are born Claudia E., aged 14 years, James Henry, aged 9 years, Ada Laura, aged 5 years,

and Catharine Olie, who died at the age of four months. Mr. Winland served as school director in his district for three years. He has always been a staunch Democrat, and in 1896 espoused the cause of free silver and became a staunch supporter to Wm. J. Bryan, and believes that bimetallism will be the winning card in 1900.

Henry Winland, the father of George, is a retired farmer, and lives in Ozark, this county, and was married to Catharine Hensell in 1857. To them were born four sons and two daughters—Samuel Jacob Winland, a prosperous farmer in this county; Philip Henry Winland, being a millwright in Washington county, O.; Geo. Winland, the present county commissioner-elect; Harvey Allen Winland, who lives in Woodsfield and keeps a meat market; Ruey Alice Winland, now Mrs. Morris, now of Wheeling, W. Va.; Martha L. Winland, who died when but a babe 18 months old, her death being caused by burning.

the West, to attack the Miamis and Illinois. This tribe once roamed over grand prairies that are now cultivated fields of the great state of Illinois. But the Wyandots, or Hurons, having settled meanwhile about Detroit, made a treaty with the Five Nations in 1694, and gradually extended into Northern Ohio; afterward the Delawares moved in from the East, the Miamis from the West, and the Shawnees from the South. The Mingoes of Ohio were a fragment of the Six Nations. It is said that they were called Mengive by the Delawares, and Mingoe was habitually applied only to the colony that lived in Ohio at that time.

## WAYNE COUNTY PREVIOUS TO ITS SETTLEMENT BY WHITE INHABITANTS.

With regard to the period that preceded the settlement by white people of Monroe County, very little, of course, is known. The space indicated comprehends an indefinite rule of darkness and barbarism, and the investigation of its traditions and imperfect annals, and their embodiment into historical form, are not consistent with this

century! The first pioneers found the country without churches, schools, markets, roads, merchants, mechanics or cultivated acres, if we except a few spots that may have been marked by the rude efforts of tillage by the Indians. Savage beasts and uncivilized men were in deadly conflict throughout the domain of the wilderness, except when winter withdrew them to their caverns. The earth teemed with venomous and loathsome reptiles. The country was utterly destitute of any of the moral or material resources that bear relation to civilized life. Such, in brief, was its condition when that band of moral heroes, the pioneers, entered the county, and grappled with dangers and privations altogether unknown to the generation who now occupy the country, and even in the experience of those who have of later years undertaken the subjugation of the vast forests that once covered our lands. There exists no analogy between the habits and modes of life of those who were backwoodsmen at the commencement of the present century, and those who have peopled the new states and territories of the west. Here, until the opening of the Atlantic market, by the completion of the New York and Erie canal, in 1825,

JOHN OKEY, County Surveyor.

ing and instructive, but the grave has closed over most of the men of that generation, and anything like a faithful and correct history of those times cannot now be produced.

The present generation must derive an instructive moral lesson by contrasting the privations and discomforts which beset the first settlers, with the happy circumstances by which they are surrounded; such contrast should inspire the latter with feelings of gratitude for the blessings which they now enjoy, and should stifle the disposition to complain, which has become almost as chronic with us as it was with the ancient people who were fed with bread from heaven. In the social customs of our day it may be doubted whether we have made improvements upon those of our ancestors; in days of yore friends and neighbors could meet together to enjoy themselves, and with hearty good will enter into the spirit of social amusements. The old and young could then spend evening after evening around the fireside with pleasure and profit; there was a geniality of manners and a corresponding depth of soul to which modern society is unaccustomed. Our ancestors did not make a special invitation the only pass to their dwellings, and they entertained those who called upon them with a hospitality that has become almost obsolete. Guests did not assemble then to criticize the decorations, furniture, manners and surroundings of those by whom they were invited; they were sensible people, and visited each other to enjoy themselves and promote the enjoyment of those around them; they had clear heads and warm hearts, they believed in the earnestness of life and in the power of human sympathies. We may ignore obligations to the pioneer race, and congratulate ourselves that our lot has been cast in a more advanced era of mental and moral culture; we may pride ourselves upon the developments which have been made in science and art, but when we view our standard of elevation as immeasurably in advance of that of our forefathers, we should stop and consider if in all these assumptions we are not, as we are in many other things that belong to our generation, "too fast."

The type of Christianity of that period will not suffer by a comparison with that of our own day. If the people of the olden times had less for costly apparel and ostentatious display, they had also more for offices of charity and benevolence; if they had not the trappings and splendors of wealth, they had at least no infirmaries, and no paupers—very few lawyers, and very little use for jails. The command to "love thy neighbor as thyself" was then more faithfully observed than now. Has it never occurred to you, reader, that we may be largely indebted to the characteristics of our pioneer fathers for that vigor and valor which have stimulated their descendants to go forth and fight our country's battles? The vain and thoughtless may jeer at their unpretending manners, customs and costumes; but in all the elements of true manhood and true womanhood it may be safely averred that they were more than the peers of the generation that now occupy their places. That race has left its impress upon our times in more ways than one. Rude and illiterate, comparatively, they may have been; but they were undoubtedly men of strong minds, in strong bodies, made so by their compulsory self-denial, and their privations and toil.

It was the mission of many of them to aid in the formation of our noble commonwealth, and wisely and well was that mission performed. Had their descendants been faithful to their teachings, there would have been harmony now, where violence and discord reign throughout the land.

The "pioneer times" have the greenest spot

in the memories of those who lived in them—their very privations and sufferings are consecrated things in the memory of our old pioneers. They have witnessed all the stages of our material development—the gradual redemption of our wilderness condition to our present full estate of national prosperity, and have by years of industry and economy gathered about all the comforts and luxuries of modern life.

#### \*\*\*\*\* COLLEGE TOWNSHIPS.

These lands are embraced in three townships, six miles square each, granted by Congress—two of them to the Ohio Company, for the use of a college to be established within their purchase, and one for the use of the inhabitants of Symmes' purchase.

The two in the Ohio Company's purchase are situated near the center of Athens county, and constitute a considerable part of the permanent funds of the Ohio University at Athens. That one belonging to Symmes' purchase composes the northwestern township in Butler county. Its income is appropriated to the Miami University, which is erected thereon. This university was chartered in 1809, and located in the town of Oxford, which is situated in the foregoing township of land, granted by Congress for its support.

These lands were really no donation, but were a part of the considerations inducing the Ohio Company and J. C. Symmes to make their purchases.

#### MINISTERIAL LANDS.

In both the Ohio Company's and Symmes' purchase, every Section 29—equal to one thirty-sixth part of every township—was reserved as a permanent fund for the support of a settled minister. As the purchasers of these two tracts came from parts of the Union where it was customary, and deemed necessary, to have a regular settled clergyman in every town, they, therefore, stipulated in their original purchase that a permanent fund, in land, should thus be set apart for this purpose. In no other part of the State than in these two purchases are any lands set apart for this purpose.

#### SALT SECTIONS.

Near the center of Jackson county Congress originally reserved from sale thirty-six sections, or one six-mile square township around and including what was called the Scioto Salt Licks, also one-quarter of a five-mile square township in what is now Delaware county, in all forty-two and a quarter sections, or 27,040 acres. By an Act of Congress, of the 28th of December, 1824, the legislature of Ohio was authorized to sell these lands and apply the proceeds thereof to such literary purposes as the legislature may think proper, but to no other purpose whatever.

#### VIRGINIA MILITARY LANDS.

This is one of the largest and most important reservations of lands made by the States which ceded territory to the general government.

This tract of land is situated between the Little Miami and Scioto rivers. It embraces within its limits Adams, Brown, Clermont, Clinton, Fayette, Highland, Madison and Union counties entirely, and portions of Marion, Delaware, Franklin, Pickaway, Ross, Pike, Scioto, Warren, Greene, Clark, Champaign, Logan and Hardin. It embraces a body of 6,570 square miles, or 4,204,800 acres of land.

As stated elsewhere, Virginia had, during the progress of the Revolutionary War, promised her officers and soldiers serving in the Continental line large bounties in land. When she ceded her territory northwest of the Ohio to the general government, she reserved enough of the land to fulfill her engagement with her troops who had served in the Continental Army. Hence the name "Virginia Military Lands."

Notwithstanding the United States had, after the cession by the several States of their claims to the western territory, made several treaties with the Indians, by which their titles to their lands seemed to have been extinguished, yet the tribes still maintained an attitude of extreme and relentless hostility, which continued until after Wayne's victory, in 1794, completely crushed their hopes and humbled their pride.

It was while the Indians were still in this hostile attitude that the first lodgment of the whites was made in Adams county, at Manchester, in 1791.

#### THE PROSPECT BEFORE THE FIRST SETTLERS.

#### ORGANIZATION OF THE TERRITORY—FIRST OFFICERS—SECOND GRADE OF TERRITORIAL GOVERNMENT—EARLY LAWS—COURTS—EARLY SETTLEMENTS—FIRST SETTLEMENT IN WAYNE COUNTY.

We can, at this late day, but faintly imagine the outlook that presented itself to the view of the pioneers, and their feelings, when they first landed upon the borders of the wilderness in which they were to make their homes.

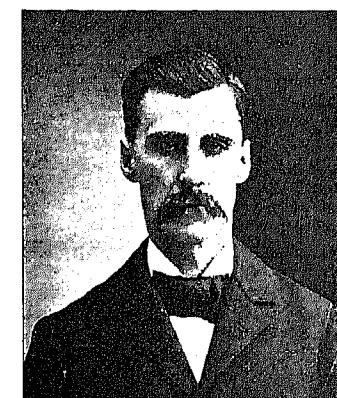

Before them lay the boundless wilderness, covered with a dense forest of trees, that were, in many places, interlaced and festooned with the wild grape vines, which also frequently covered the smaller timber with their closely intertwined branches, that made an almost impenetrable canopy of green. Through these forests roamed countless numbers of ferocious wild beasts, as well as the savage and cruel Indian, while beneath his feet lurked venomous reptiles.

A wilderness of great extent, presenting the virgin face of nature, unchanged by human civilization or art, is one of the most sublime terrestrial objects which the Creator ever presented to the view of man.

One prominent feature of a wilderness is its solitude. Those who plunged into this forest left behind them not only the busy hum of men, but domestic animal life generally. The parting rays of the sun did not receive the requiems of the feathered songsters of the grove, nor was the dawning of the early morn ushered in by the shrill clarion of the domestic fowls. The solitude of the night was interrupted only by the howl of the wolf, the melancholy moan of the ill-boding owl, or the shriek of the frightful panther. Even the faithful dog, the only steadfast companion of man among the brute creation, partook of the silence of the desert; the discipline of his master forbade him to bark or move, but, in obedience to his command, and his native sagacity, soon taught him the propriety of obedience to this severe government. The day was, if possible, more solitary than the night, the noise of the wild turkey, the croaking of the raven, or the woodpecker tapping the hollow beech tree, did not much enliven the dreary scene. The cravings of hunger often compelled him from day to day to sustain the fatigues of the chase. Eager in the pursuit of his game, his too much excited imagination sometimes presented him with the phantom of the object of his chase in a bush, a log or mossy bank, and occasioned him to waste a load of his ammunition, more precious than gold, on a creature of his own brain, and he repaid himself the expense by making a joke of his mistake. His situation was not without its dangers. He did not know at what tread his foot might be stung by a serpent, at what moment he might be met by the formidable bear, or, if in the evening, he knew not on what limb of a tree over his head the murderous panther might be perched, in a squatting attitude, to drop down upon and tear him to pieces in a moment. When watching a deer lick from his blind, at night, the formidable panther was often his rival in the same business, and if, by his growl or otherwise, the man discovered the presence of his rival, the lord of the world always retired as speedily and secretly as possible, leaving him the undisturbed possession of the chance of game for the night. His situation was perilous in the extreme. The bite of a serpent, a broken limb, a wound of any kind, or sickness without medical skill, without those accommodations which wounds and sickness require, was a dreadful calamity.

#### ORGANIZATION OF THE TERRITORY.

The United States having secured title to the "Great Northwest," Congress soon deemed it advisable to take the preliminary steps looking to the permanent establishment of civil government in the new and extensive territory of which that body had just become the legal custodian. Accordingly, after much mature deliberation and careful consideration of the subject, as well as prolonged discussion of the important questions involved, they, on the 13th of July, 1787, gave to the world the results of their deliberations in "An ordinance for the government of the territory of the United States northwest of the river Ohio," which has come to be best known as "The Ordinance of '87," sometimes also called "The Ordinance of Freedom." This ordinance was the fundamental law.

WIRE HAMILTON, Attorney.

The subject of this sketch was born in Monroe county, Ohio, on his father's farm, two miles west of Lewisville. Jacob H. and Maria (Robinson) Hamilton, his parents, were natives of Pennsylvania and Ireland respectively. He worked on his father's farm until he was eighteen, when he had improved his opportunities in the common school so that he was enabled to secure a teacher's certificate. With this attainment he combined teaching and farming as a means of procuring funds for tuition in higher schools. In 1877 he graduated from Mount Union College, one of the best of his class. After his graduation he resumed the profession of teaching and at the same time studied law. Mr. Hamilton for several years was among the foremost teachers in the county, conducting several select schools for the training of teachers. He was appointed a member of the county board of school examiners and held the position for two successive terms—which office he filled with ability, and with honor to himself and the teachers of the county. He attended the Cincinnati Law College and graduated there in 1881. He spent a year in the law office of Forrest and Mayer of Cincinnati, after which he began the practice of law in Woodsfield and continued his chosen profession until March, 1886, when he purchased the Spirit of Democracy, and at once entered upon his duties as editor and publisher of that journal and soon made it one of the leading weekly journals of the state. He was elected Probate Judge of Monroe county in the November election of 1890 and was re-elected for a second term in 1892. Shortly after his election to this important position of trust he sold the Spirit so that he could devote his entire time to the work of his office. He brought to the bench a well-balanced, thoroughly trained mind and filled the position with general satisfaction and made a reputation as a judge. In February, 1896 his second term expired and Judge Hamilton immediately began the practice of law in Woodsfield as a member of the firm of Hamilton and Matz and now enjoys a good share of the legal business of the county. December 15, 1886 he was so fortunate as to form a marriage alliance with Miss Emma E. Bircher, whose parents, George and Jane Bircher of Summerfield, Noble county, Ohio, were natives of Maryland and Scotland respectively. Judge G. W. Hamilton and Emma E. now have a family of three children, Birch J., Florel J. and Maria and enjoy a pleasant home on Northern Row in Woodsfield. He is a Mason, a member of the I. O. O. F. and also of the Knights of Pythias, and his wife, a devout member of the M. E. Church. Mr. Hamilton is an ardent Democrat, has an inherent belief in the common people and has never hesitated to advocate the interests of the masses on the stump in past campaigns.

#### FIRST OFFICERS OF THE TERRITORY.

Congress, in October, 1787, appointed General Arthur St. Clair, governor; Major Winthrop Sargent, secretary; and James M. Varnum, Samuel H. Parsons, and John Armstrong, judges of the territory; the latter of whom, however, having declined the appointment, John Cleves Symmes was appointed in his stead, in February, 1788. General St. Clair arrived at Marietta, and, finding the secretary and a majority of the judges present, proceeded to organize the territory. The governor and the judges—or a majority of them—were the sole legislative power during the existence of the first grade of territorial government. Such laws as were in force in any of the States,

## HISTORICAL SKETCH OF MONROE COUNTY.

and were deemed applicable to the condition of the people of the territory, could be adopted by the governor and judges, and, after publication, became operative, unless disproved by Congress, to which body certified copies of all laws thus adopted had to be forwarded by the secretary of the territory.

The further duty of the judges, who were appointed to serve during good behavior, was to hold court four times a year, whenever the business of the territory required it, but not more than once a year in any one county.

## EARLY LAWS OF THE TERRITORY.

The first permanent settlement being made at Marietta, the first formal organization of the government was made at that place and the first laws for the new government were promulgated from there.

The first settlers landed there April 7, 1788, and a second company came the 1st of July following.

As St. Clair, who had been appointed Governor the preceding October, had not arrived, it became necessary to erect a temporary government, for their internal security, for which purpose a set of laws was passed and published by being nailed to a tree in the village, and Return Jonathan Meigs was appointed to administer them. This was the first code of written laws ever adopted in Ohio, though what it was we are not informed.

The first legal law was proclaimed July 25, 1788, and was entitled "An Act for regulating and establishing the militia."

Quite a number of laws were necessarily adopted and established during 1788, and the following year. From 1790 to 1795 they published sixty-four, thirty-four of them having been adopted at Cincinnati, during the months of June, July and August of the last named year, by the Governor, and Judges Symmes and Turner. They are known as the "Maxwell Code," from the name of the publisher, and "were intended," says the author of "Western Annals," "to form a pretty complete body of statutory provisions." In 1798 eleven more were adopted. It was the published opinion of the late Chief Justice Chase "That it may be doubted whether any colony, at so early a period after its first establishment, ever had so 'Which provided that the common law of England, and all statutes in aid thereof, made previous to the fourth year of James I, should be in full force within the territory.' Probably four-fifths of the laws adopted were selected from those in force in Pennsylvania; the others were mainly taken from the statutes of Virginia and Massachusetts.

## THE EARLY HISTORY OF MONROE CO.

Monroe county was named from James Monroe, president of the United States from 1817 to 1825. Was formed January 29, 1813, from Belmont, Washington and Guernsey. The southeast is very hilly and rough, the north and west moderately hilly; some of the western portion has small valleys, which are fertile.

Number of square miles is 470. In 1897 the acres cultivated were 82,617; in pasture, 106,302; woodland, 66,102; lying waste, 6,484.

Population of Monroe in 1820 was 4,645; 1830, 8,770; 1840, 18,544; 1860, 25,741; 1880, 26,496, of whom 22,461 were born in Ohio; 804 in Pennsylvania; 818 in Virginia; 49 in New York; 33 in Indiana; 9 in Kentucky; 1,224 in German Empire; 80 in Ireland; 48 in France; 38 in England and Wales; 8 in Scotland, and 6 in British America. Census 1890, 25,175 population.

## THE FIRST SETTLEMENT OF MONROE.

The first settlement in the county was near the mouth of Sunfish, about the year 1799. This settlement consisted of a few families whose chief end was to locate on the best hunting ground. A few years after, three other families settled near where the town of Beallsville now stands; the second, on the clear fork of Little Muskingum, consisting of Martin Crow, Fred. Crow and two or three other families; and the third was on the east fork of Duck creek, where some three or four families of the name of Archer settled. Not long after this the settlements began to spread, and the pioneers were forced to see the bear and the wolf leave and make way for at least more friendly neighbors, though perhaps less welcome. The approach of newcomers was always looked upon with suspicion, as this was the signal for the game

"Monroe Journal" had its existence on the anniversary of the birth of the great liberty-loving George Washington, the first paper being issued February 22, 1884, with Fritz Reef editor and publisher. In March, 1892, Fritz Reef, Bernhard Zitzmann and Arnold Reef formed a partnership and continued to publish the paper until April, 1893, when a company was formed and purchased the entire plant and continued the management of the paper under the editorship of B. Zitzmann until November, 1897, when it was leased to F. A. Jeffers and B. Zitzmann, who continue to issue regularly a clean, fearless sheet, exposing fraud

Bernhard Zitzmann, its editor and publisher, was born in Wurzburg, Bavaria, and a graduate of the Latin school, seminary and university of that city, and for four years was a teacher there and a soldier in the army of the emperor. He came to America in 1884, landing in Cincinnati, Ohio, from which place he drifted to Miltonburg, this county, in March, 1884, where he engaged himself in teaching and in music until 1886, when he entered the office of "Monroe Journal," where he learned the newspaper business, and in 1892 became its manager and editor, which position he has occupied ever since.

generous friendship that is not found at this day, and among those who compose what is erroneously called the better class of society, or the high circle. There was no distinction in society, no aristocratic line drawn between the upper and lower classes. Their social amusements proceeded from matters of necessity.

A log-rolling or the raising of a log-cabin was generally accompanied with a quilting or something of the sort, and this brought together a whole neighborhood of both sexes, and, after the labor of the day was ended, they spent the larger portion of the night in dancing. This can be remembered by many of our old citizens who are still living.

## SECOND GRADE OF TERRITORIAL GOVERNMENT.

The "Ordinance of '87" provided that:

"After it shall have been ascertained that five thousand free white male inhabitants actually reside in the territory, the second grade of territorial government could of right be established," which provided for a Legislative Council, and also an elective House of Representatives, the two composing the law-making power of the territory, provided always that the Governor's assent to their acts was had. He possessed the absolute veto power, and no act of the two Houses of the Legislature even if passed by a unanimous vote in each branch, could become a law without his consent. The conditions that authorized the second grade of territorial government, however, did not exist until 1798, and it was not really put in operation until September, 1799, after the first grade of government had existed for eleven years.

## WOODSFIELD.

The history of Woodsfield, if properly written, would fill many pages of the Atlas, and would no doubt be very highly appreciated by the citizens of Woodsfield as well as former citizens who now reside in other parts of the world; but as the wide awake and progressive people of this day and age are more deeply interested in the present and future than the past, we will only devote a small part of our space to Woodsfield's past history.

The commissioners appointed by the legislature in 1814 to establish a permanent seat of justice for the county, fixed upon Woodsfield as the place, and accordingly, in 1815, the town was founded. Prior to that time, and before the county was erected, Archibald Woods, of Wheeling; George Paul, of St. Clairsville, and Levi Barber, of Marietta, who owned lands in the territory now comprised in the county, sought to have a new county organized, and accordingly, in 1812, selected the ground where Woodsfield now stands, as the probable place for the county seat; and, in that year, the town of Woodsfield was surveyed and platted. It was then a wilderness—not a tree amiss. It was properly named, whether for one of the proprietors, or from its location in the woods, is a question; but the better opinion is that it was named for Mr. Woods. It is a tradition, it might be said with truth, veritable history—that in order to get the streets, or a part of them, cleared out, Peter Palmer, John Baker, and John Windland suggested to Mr. Woods to get a keg of French brandy and invite all the men and boys within five miles to meet on a certain Saturday and they would clear out Main street. This was done. A general frolic was made of it, and the first trees were felled. The older citizens differ as to who built the first house and where it was built. It was agreed that it was on the east side of Main street and north of Court street.

Like all other inland towns in early days Woodsfield grew and improved very slowly for many years. In fact its growth was very slow up to 1879, when the Bellaire and Southwestern Railroad (now the Bellaire, Zanesville & Cincinnati R'y) was completed to Woodsfield, thus connecting the town by railroad and telegraph with the outside world. With this new advantage (and the extension of the B. & S. W. R'y to Zanesville a few years later) the town took on a good, substantial growth, which caused it to improve and flourish as never before. Each year thereafter the increase in population, and the improvements in general exceeded those made the year before, until to-day we have a town second to no other of its size in Eastern Ohio. During the last few years the oil developments south and east of Woodsfield, the introduction of natural gas for fuel and lights, as well as the general prospecting for oil on all sides, has stimulated the growth and prosperity of the metropolis of Monroe County far more than anything else in its history. With this brief sketch of the grand old town's past history, we turn with pleasure to it.

BERNHARD ZITZMANN, Editor &amp; Manager.

F. A. JEFFERS, Attorney.

and corruption wherever found, always in the interest of the people and the right, irrespective of party or religious doctrines, and, adhering to the Jacksonian simplicity of democracy, it is the only Democratic German newspaper in this part of the State.

The plant is finely equipped with the latest improved machinery and presses and one of the best job offices in eastern Ohio.

MONROE COUNTY CHILDREN'S HOME, WOODSFIELD, O.

to leave. A neighbor at a distance of ten miles was considered near enough for all social purposes. The first object of a newcomer after selecting a location and putting the "hoppers" on the horse (if he had any), was to cut some poles or logs and build a cabin, of suitable dimensions for the size of his family, for as yet rank and condition had not disturbed the simple order of society. The windows of the cabin were made by sawing out about three feet of one of the logs and putting in a few upright pieces; and, in the place of glass, they took paper, oiled it with lard, and pasted it on the window. This would give considerable light and resist the rain tolerably well. After the cabin was completed the next thing in order was to clear out a piece of land to raise some corn. The mischievous depredations of the wolves rendered their scalps a matter of some importance. They were worth from five to six dollars apiece. This made of wolf-hunting rather a lucrative business, and, of course, called into action the best inventive talent in the country; consequently, many expedients and inventions were adopted, one of which I will give:

The hunter took the ovary of a shot—at a particular time—and rubbed it on the soles of his shoes; then, circling through the forest where

the wolves were most plentiful, the male wolves would follow his track; as they approached he would secrete himself in a suitable place, and, as soon as the wolf came within reach of the rifle, they received the contents. This plan was positively practical, and was one of the most effectual modes of hunting the wolf.

A Mr. Terrel, formerly of Woodsfield, was hunting wolves in this way not far from where Woodsfield now stands. He found himself closely pursued by a number of howling wolves, and soon discovered from their angry manner that they intended to attack him. He got up into a tree and shot four of them before they would leave the fight. This is the only instance of the wolves attacking any person in this section of the county.

## HOW THEY HAD A SOCIAL GOOD TIME WITH THE EARLY SETTLERS.

And first I would remark, on good authority, that a more generous, warm-hearted and benevolent people seldom have existed in any country. Although they were unwilling to see the game driven off by the rapid influx of emigration, still the stranger, when he arrived among the hardy pioneers, found among them a cordiality and a

## HISTORICAL SKETCH OF MONROE COUNTY.

Located on a beautiful though slightly elevated plateau, Woodsfield presents an appearance second to no other town within a radius of many miles. Its cluster of splendid business houses around the public square, down Main street, east and west on Court street, and in other near by places, gives it the appearance of a town of larger dimensions and greater pretensions. In this square and along these streets the hitching racks are generally crowded with horses and vehicles from far and near.

In viewing the residence portion of the town natives and strangers alike are delighted with its appearance. Nestling among the beautiful shade trees that line the principal streets are to be found many magnificent residences—gems of modern architecture—handsomely adorned by the artist painter's brush, arranged and provided with every modern convenience, and richly, grandly furnished from cellar floor to attic roof. These handsome homes are made more attractive by broad and beautiful lawns, studded here and there with rare specimens of shrubbery and penetrated by neat and well-made walks.

## FIRST LAYOUT OF WOODSFIELD.

On which lot in Woodsfield the first house was built is not certainly known. It is thought to

Adams, March 6, 1826. Population in 1880, 1,317; in 1890, 1,194—decrease 123.

Benton, March 27, 1815. Population, 1880, 987; in 1890, 921—decrease 16.

Bethel, March 5, 1832. Population, 1880, 1,165; in 1890, 1,030—decrease 135.

Center, July 19, 1815. Population, 1880, 2,779; in 1890, 2,685—decrease 94.

Franklin, March, 1822. Population, 1880, 1,251; in 1890, 1,111—decrease 140.

Green, July 9, 1824. Population, 1880, 1,207; in 1890, 1,223—increase 16.

Jackson, July 19, 1815. Population, 1880, 1,382; in 1890, 1,191—decrease 191.

Lee, February 10, 1869. Population, 1880, 1,240; in 1890, 1,387—increase 147.

Malaga, December 15, 1820. Population, 1880, 1,520; in 1890, 1,359—decrease 161.

Ohio, October 18, 1818. Population, 1880, 1,905; in 1890, 1,891—decrease 14.

Perry, December 30, 1823. Population, 1880, 1,214; in 1890, 1,270—increase 56.

Salem, July 19, 1815. Population, 1880, 2,377; in 1890, 1,975—decrease 402.

Seneca, July 19, 1815. Population, 1880, 1,302; in 1890, 1,329—increase 27.

Summit, June 4, 1850. Population 1880, 914; in 1890, 861—decrease 53.

elected in 1844 to the 29th congress, his term expiring March 24, 1847.

Hon. William F. Hunter was elected from the same district in 1848 and re-elected in 1850. His terms were the 31st and 32d congresses and expired March 4, 1853.

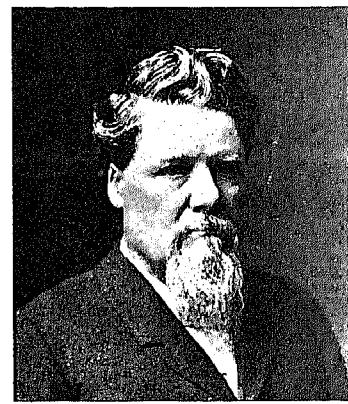

Hon. James R. Morris, (son of Hon. Joseph Morris,) was elected to the 37th congress, in 1860, from the district composed of the counties of Monroe, Belmont, Guernsey and Noble; and re-elected to the 38th congress, in 1862, from the "steamboat" district, composed of the counties of Monroe, Washington, Morgan, Athens and Meigs. He was re-nominated in 1864, but was defeated by Hon. T. A. Plants, of Meigs.

Hon. A. J. Pearson was elected to the 52d congress, in 1890, from the district composed of the counties of Monroe, Belmont, Noble and Washington; and was re-elected, in 1892, to the 53d congress, from the district composed of the counties of Monroe, Belmont, Harrison, Jefferson and Carroll. His term expired March 4, 1895.

## STATE CANDIDATES.

This county has twice had the honor of having candidates on the state ticket. James R. Morris was nominated at the state convention, in 1857, for treasurer of state, but was defeated by A. P.

Weston, 1826; Thomas Mitchell, 1830; Philip Darby, 1831; Isaac Atkinson, 1832; Joseph Morris, 1833; William C. Walton, 1835; Peter Witten, 1837; William Johnson, 1839, 1847 and 1849; Edward Archbold, 1843; Joel Yost, 1845; James R. Morris, 1848; James Okey, 1850; Horace Holland, 1854; Henry T. Grier and Alfred Ogle, 1856; Jere Williams, J. M. Stout, 1858; James M. Stout, 1860; John Keyser, 1862; Eliel Headley, 1866; William Milligan, 1870; James Watson, 1874; Henry Maury, 1878 and 1882; George W. Steward, 1880; James H. Hamilton, 1884 and 1888; Henry Lyons, 1886; Reuben P. Yoho, 1890; John Moore, 1894.

HON. ALBERT J. PEARSON.

Albert J. Pearson, of Woodsfield, was born at Centerville, Belmont county, Ohio, May 20, 1846; removed with his parents at an early age to Beallsville, Monroe county, Ohio; was educated in the common schools of Beallsville and the Normal School at Lebanon, Ohio; was a private soldier in Company I, One Hundred and Eighty-Sixth Ohio Volunteer Infantry; read law with Amos & Spriggs, of Woodsfield, Ohio; was admitted to the bar in September, 1868, and commenced the practice of his profession at Woodsfield, where he has since resided; his wife, Mrs. Elizabeth A. Pearson, is a daughter of Charles Alford, who resided near Woodsfield. Their children are Chas. A. L. Pearson, A. J. W. Pearson, A. J. Pearson Jr., Franklin M. Pearson, Elaise Pearson and Lena Pearson.

Mr. Pearson was prosecuting attorney of Monroe county for three successive terms; a member of the State Senate for two years; was Probate Judge of Monroe county for six years; was elected to the fifty-second and re-elected to the Fifty-third Congress as Democrat. In the fifty-second Congress he was chairman of a committee to codify the pension laws, and on the 17th day of January, 1893, reported a bill for that purpose containing one hundred and forty pages and one hundred and nine sections. This bill was passed by the House, but was not reported to the Senate by the committee on pensions, to which it was referred. He was chairman of the committee on enrolled bills in the fifty-third Congress, and on the last day of that Congress the following resolution was prepared and offered by Hon. William J. Bryan:

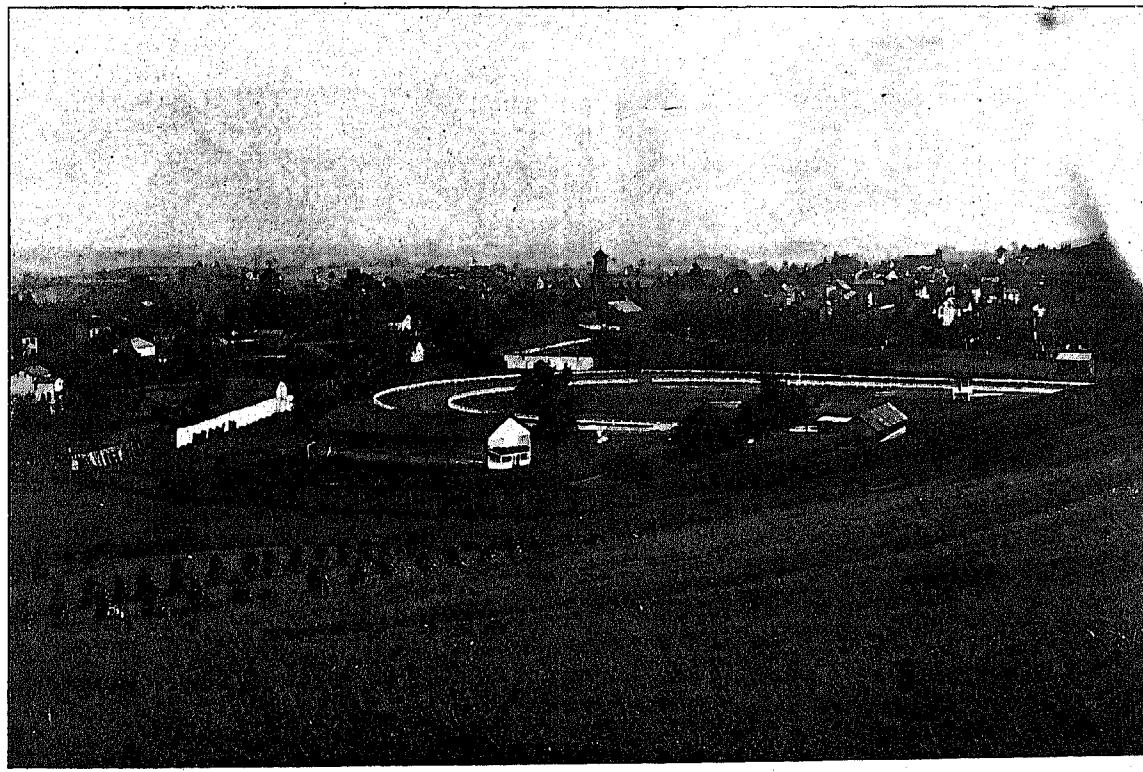

"Resolved, That the House of Representatives hereby expresses its appreciation of the faithful and efficient manner in which the Hon. A. J. Pearson has performed the onerous duties of chairman of the committee on enrolled bills." The resolution was unanimously adopted.

Shortly after the close of the fifty-third Congress he was tendered an appointment by President Cleveland, which he declined.

## COMMON PLEAS JUDGES.

The first court for the county was held in 1815. Prior to the adoption of the present constitution the presiding judges were: Benjamin Tappan of Steubenville, who served until 1828; Jeremiah H. Halleck of Steubenville, until 1838; Alexander Harper of Zanesville, until 1836; Corrington W. Searle of Zanesville, until 1840; William Kennon of St. Clairsville, until 1847; Benjamin S. Cowen of St. Clairsville, until 1851.

After the adoption of the new constitution, the following were the common pleas judges, in the order named: Robert J. Alexander of Belmont county; John W. Okey of Monroe; D. D. T. Cowen of Belmont; William Kennon, Jr., of Belmont; John S. Way of Monroe; Robert E. Chambers of Belmont; William Okey of Monroe; St. Clair Kelly of Belmont; John B. Driggs of Monroe.

BIRD'S EYE VIEW OF WOODSFIELD, OHIO.

have been on Schumacher's corner, Armstrong's corner, or on the lot between them. It may have been neither. There were no brick residences in 1831 in the town. The only brick buildings were the court house, two brick store room and a brick kitchen. In 1832 a brick building was erected on the lot now occupied by S. P. Dorr's New Columbia hotel, and the bank building was constructed by John Gibson, Sr., of Barnesville.

There is no means, within our knowledge, of ascertaining the number of inhabitants in Woodsfield in 1830, but judging from the number of families in 1831 there were then about 200 inhabitants. In 1830 there were 861, in 1830, 1031.

County commissioners were, in pursuance of the law erecting the county, elected at the April election, 1815. They were John Linn, Elijah Stephen and Cornelius Okey, and were to hold office until the following fall election. On the 19th day of July, 1815, they divided the county into four townships—Center, Jackson, Salem and Seneca.

## TOWNSHIPS.

Below will be found the names of all townships, alphabetically arranged, date of organization, and population in 1880 and 1890.

Sunsbury, June 24, 1819. Population, 1880, 1,660; in 1890, 1,729—increase 69.

Switzerland, January 1, 1827. Population, 1880, 1,226; in 1890, 1,154—decrease 72.

Washington, June 5, 1832. Population, 1880, 1,815; in 1890, 1,730—decrease 85.

Wayne, December 30, 1823. Population, 1880, 1,284; in 1890, 1,175—decrease 109.

Total decrease in the county for that decade, 1,321. This can only be accounted for by western emigration, and young men going to cities to find employment.

## MEMBERS OF CONGRESS FROM MONROE.

Hon. Joseph Morris, the first member of congress from this county, was elected to the 28th congress from the district composed of the counties of Monroe, Belmont and Harrison, in 1843—the state not having been apportioned in time to hold the election in 1842, on account of the whig members of the legislature resigning their seats to prevent the passage of the apportionment bill. The election in 1842 gave the democrats again a majority in the legislature and the state was apportioned. Mr. Morris was re-

Stone by about 1500. In 1892, Judge J. B. Driggs was nominated for judge of the supreme court and defeated by 1,979 by Judge William T. Spear.

The nearest this county came to success on the state ticket was in the person of Judge John W. Okey. He was a native of this county and during his residence in Woodsfield was elected twice common pleas judge, and after his removal to Cincinnati was twice elected to the supreme bench.

John P. Spriggs was nominated by the Democratic state convention in 1897 for Supreme Judge of Ohio, and was defeated by a small majority.

## MONROE IN THE LEGISLATURE.

The following is a list of the state senators from Monroe county with the years when their terms of office began: Thomas Weston, 1829; Isaac Atkinson, 1833; William C. Walton, 1837; William C. Walton, 1841; Edward Archbold, 1847; Western T. Sinclair, 1854; Marshall Morrow, 1848; John D. O'Connor, 1862; James O. Amos, 1870; Joseph B. Williams, 1876; A. J. Pearson, 1882; Walter B. Hardesty, 1894.

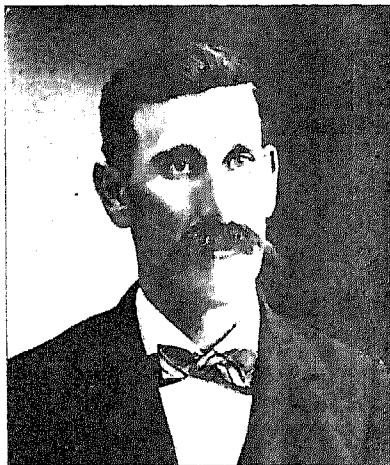

Representatives: Isaac Atkinson, 1823-4; Cornelius Okey, 1822, 1829 and 1841; Thomas

Thurman Spriggs, Pros. Attorney.	
J. W. Okey, Treasurer.	
W. T. Wood, Auditor.	
James Boughner, Recorder.	
R. P. Yoho, Probate Judge.	

W. W. WALTON, Attorney.

William Vernon Walton, was born in Adams Township, Monroe County, Ohio, on the 7th day of August, 1860; is a son of Judge Richard K. Walton and Julia A. Walton. Mr. Walton remained with his parents, receiving an education such as was afforded in Clarington, Ohio public schools under the instructions of his father, who was for many years principal of Clarington public schools, until he arrived at the age of about eighteen years, at which time he commenced teaching in the common schools of the county, which calling he pursued until his father appointed him Deputy Clerk of the Probate Court of Monroe County, Ohio, which position of trust Mr. Walton filled during his father's continuance in the office of Probate Judge. W. V. Walton also conducted a successful fire insurance agency in Woodsfield, during which time he also read law under the instruction of the law firm of Hunter & Mallory, and in the fall of 1885, he entered the senior law class of The Cincinnati Law School and graduated in May, 1886, receiving a diploma and was also at same time admitted to the bar in Ohio. Mr. Walton commenced the practice of law at Woodsfield, Ohio on the first day of June, 1886, where he has continued in the practice ever since with the exception of one year, which time, from 1891 to 1892, he practiced his profession in Iellaire and Toronto, Ohio, and for six years he was in partnership with his father, Judge R. K. Walton, under the firm name of Walton & Walton, after which this partnership was dissolved by mutual consent and at this time W. V. Walton continues to practice law alone. Mr. Walton has resided in Monroe County since his birth except as above stated, and on the 12th day of June, 1889, he was married to Lura B. Thornberry, eldest daughter of Mr. and Mrs. A. E. Thornberry of Woodsfield, and since that time two children have been born of said marriage, viz.: Ione, borne May 11th, 1890, and Leland Vernon, born April 30th, 1893, both of whom are now living.

Among other positions of trust, Mr. Walton has successfully filled the office of Mayor of Woodsfield for about ten years since the year 1887, having been appointed twice and elected four times to this office.

Mr. Walton now resides at No. 116 North Paul Street, Woodsfield, and his law office is located over R. W. Pope's Drug Store.

## SPECIAL MERCHANTS BUSINESS DIRECTORY OF MONROE COUNTY, OHIO.

17

E. W. Brague, Dealer in Stoves, Tinware and Hardware, Pumps, Paints, Spouting, etc. Also Contractor of Tin, Slate and Steel Roofing. George E. Topp, Merchant Tailor, and dealer in Ready Made Clothing.

JOHN PFALZGRAF.

John Pfalzgraf was a product of Monroe county, and was born February 11, 1837, in Seneca township, Monroe county, Ohio, two and one-half miles southeast of Calais, on section 4. He is a son of one of the thrifty farmers and one of the early pioneers. In 1865 he moved to the farm, in Adams township, where he now resides. This farm is one of the finest improved farms in the county, of 670 acres. His mode and manner of farming is up-to-date. The farm he now lives on was entered in 1881, and the Patton deed signed by Andrew Jackson, President of the United States. He has raised a family of twelve children, all living but one; he died while young. Seven boys and four girls are living; two sons married. It will be readily perceived that John Pfalzgraf is equipped with a thorough practical and legal education. In 1873 he was elected county infirmary director for six years. While in his official duty his aim and purpose is to sweep away the cobweb forms that are too often interposed by ingenuous persons in the path of justice.

He was elected in 1889 county commissioner and served six years and nine months. He was elected president of the board of commissioners. He at all times carries his conscience into his official sphere, desiring the facts and the truth, that he may do justice to those who seek redress in his court, and who come in to have thrown around them the justice, fairness and protection of the law. He believes that a public office is a public trust, and conducted the commissioner's office on strictly business principles.

WOODSFIELD SCHOOL BUILDING.

### SCHOOL BY SUBSCRIPTION IN THE PIONEER TIMES OF MONROE.

Judge James R. Morris, in speaking of the subscription school, said: The term of subscription was \$1 per scholar for a term of three months. The teacher boarded around among the scholars; that is he boarded in the families of the scholars for the length of time warranted by the number of pupils sent by the family. Before the holidays the

teacher was compelled to sign an article that on Christmas or New Year's day he would treat the boys to ginger cakes, cider and apples, or they would bar him out of the school house, or if he got in first they would smoke him out. If he still refused to sign the article, they would take him to the nearest creek and duck him.

G. W. Sander, Tinner and Dealer in General Merchandise and Leaf Tobacco.

### OZARK.

J. A. Brown, General Merchandise, Agricultural Implements, Buggies and Harness.

Wilcox & Haren, Dealers in General Merchandise.

### LAINGS.

## INDEX TO STATE MAP OF OHIO.

### EXPLANATION.

To find the name of any place on the Map, first find the name in the Index; opposite the name will be seen the number and letter designating it on the Map; then trace a direct line on the Map from the number given to a point where it meets a direct line running from the letter given, and at or near this point will be found the name desired.

Figures represent Railroads. An italic letter after each figure represents the branch of that railroad.

#### County seat in Full Face type.

All Towns in Roman type are Post Offices.

Money Order Post Office.

Telegraph Station.

Prepaid Freight and Express Station.

Population unknown, or less than 100.

Ad. Ex., Adams Express.

Am. Ex., American Express.

C. & P. Ex., Cincinnati, Georgetown & Portsmouth Express.

Nat'l. Ex., National Express.

Pac. Ex., Pacific Express.

Sou. Ex., Southern Express.

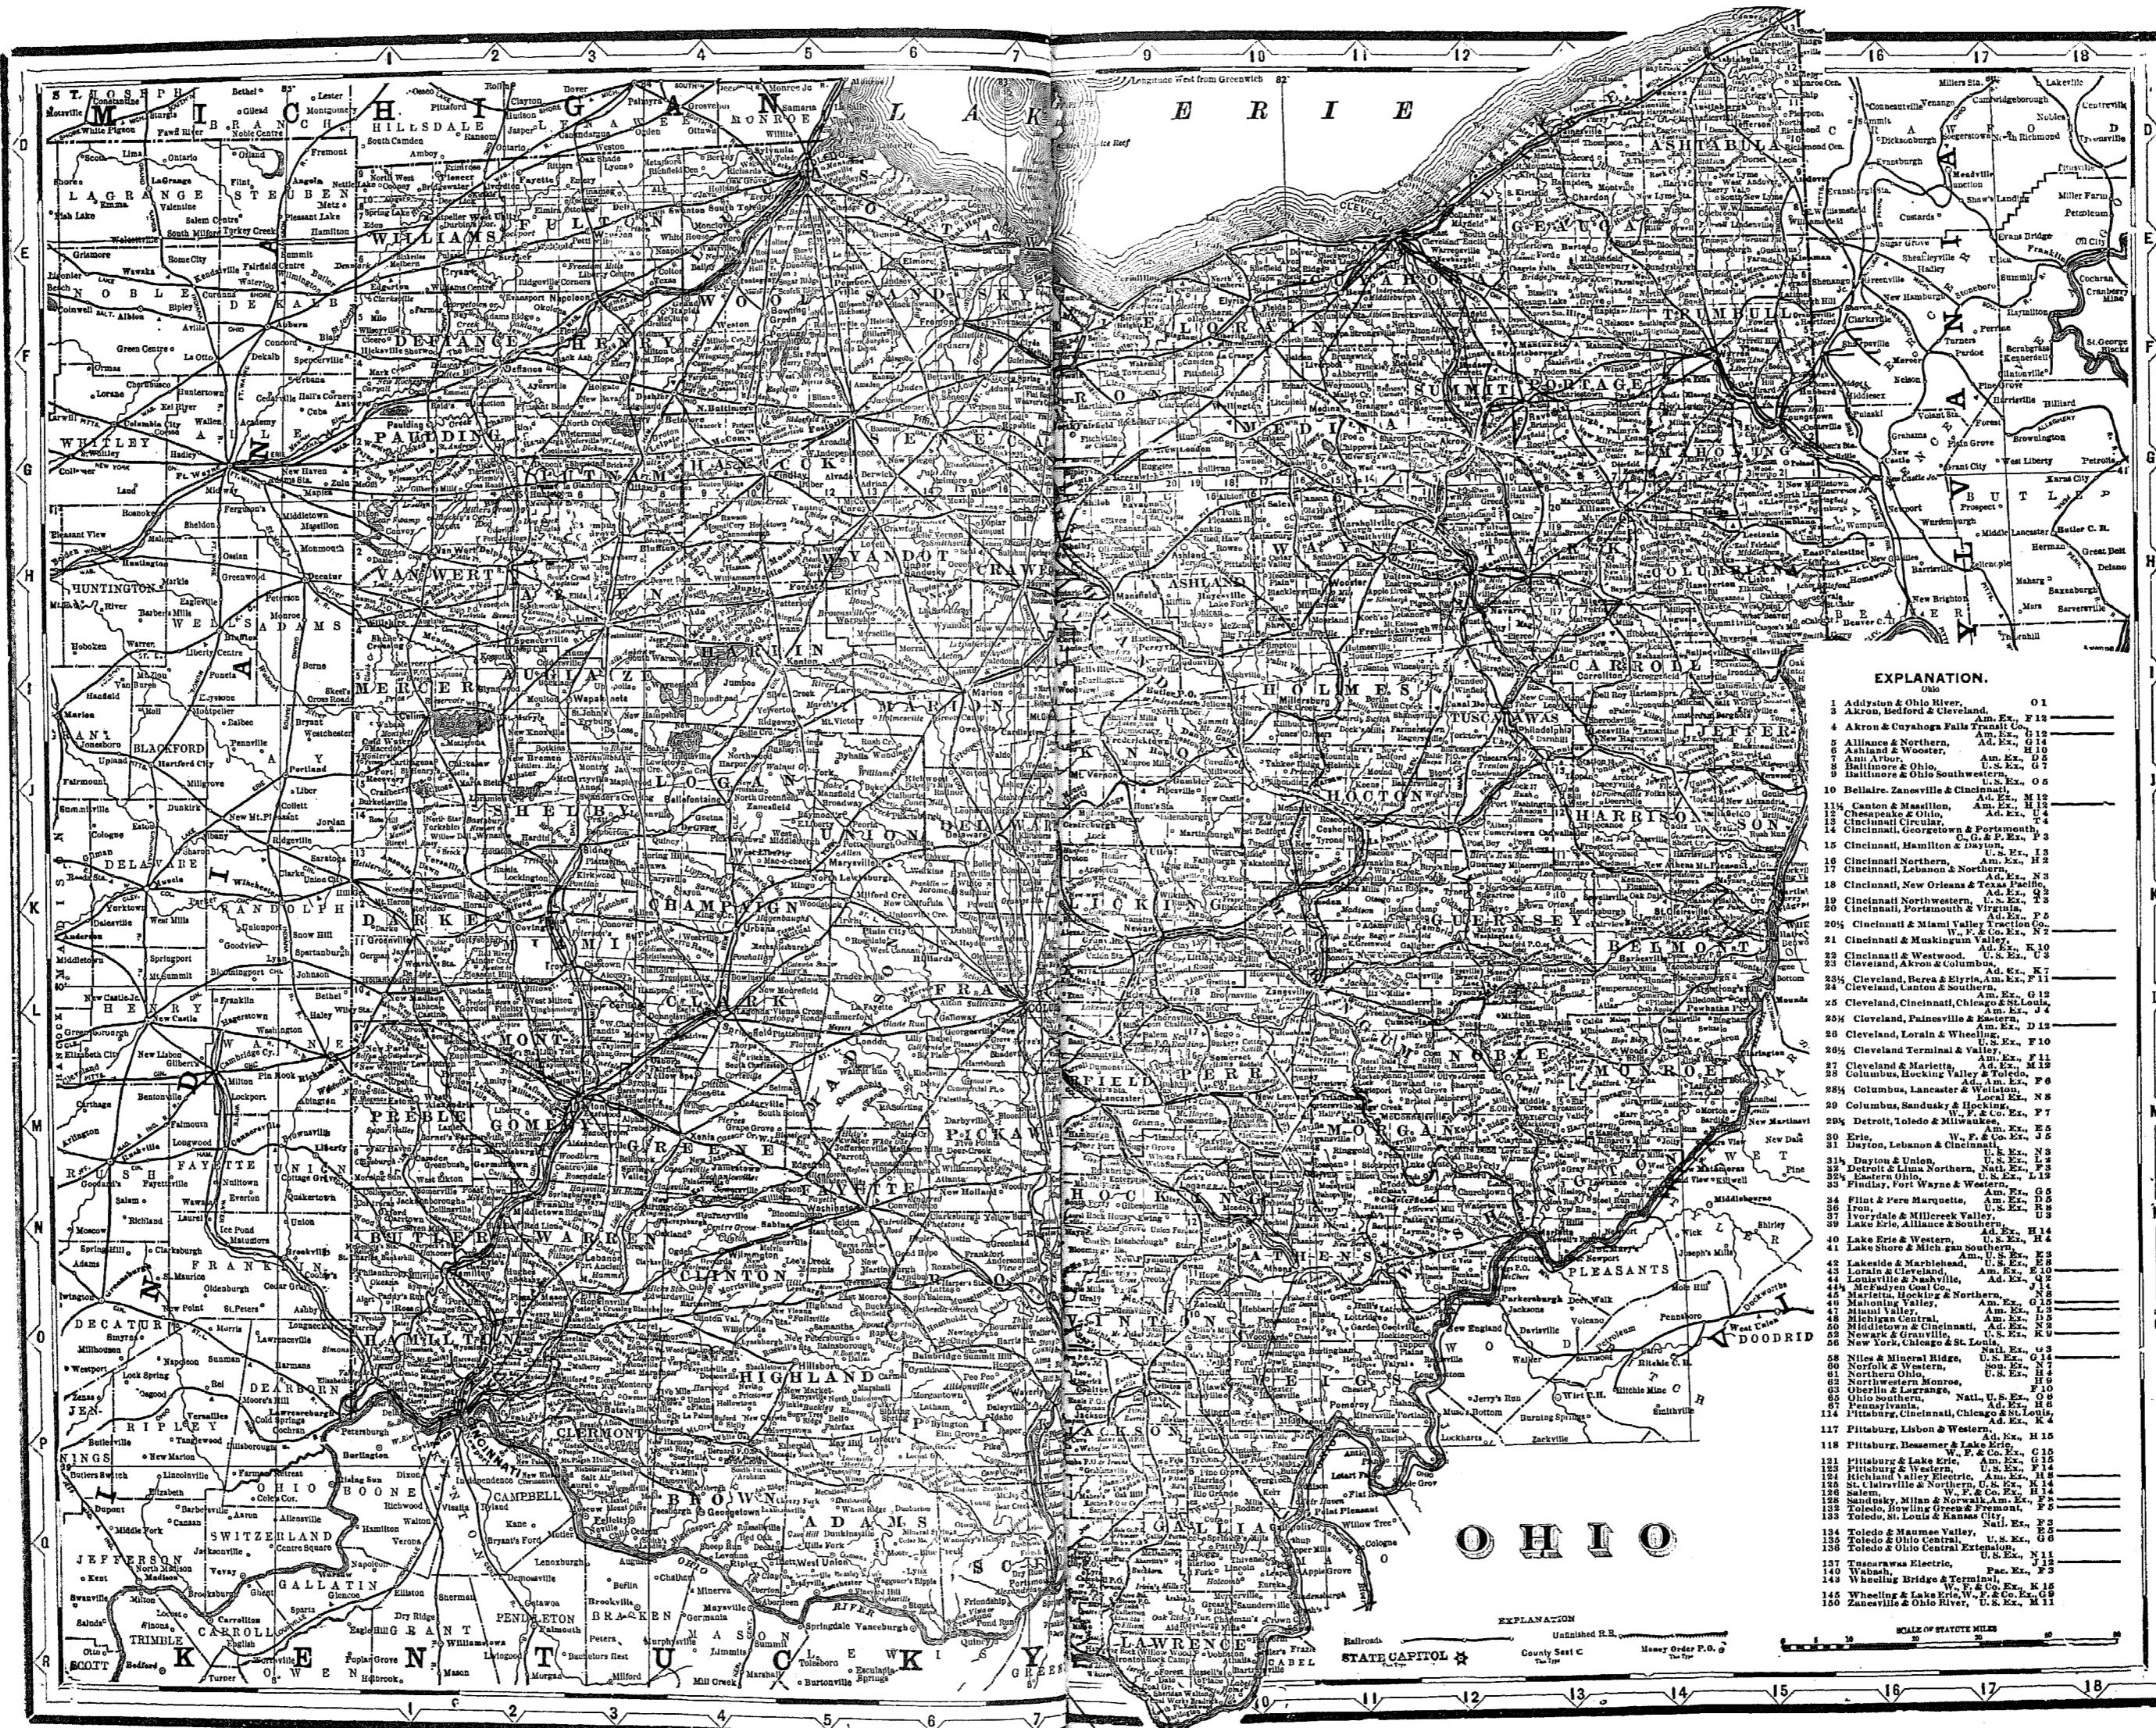

U. S. Ex., United States Express.

W. F. & Co. Ex., Wells, Fargo & Co. Express.

## Town 5

This historical map of Summit County, Ohio, provides a detailed view of the county's geography and early land ownership. The map is organized into townships, each with a specific name and a grid system for property delineation. Numerous names of landowners and their acreage are handwritten throughout the map, often accompanied by small symbols indicating property boundaries or features. Townships labeled include B, E, M, O, N, Z, C, O, T, P, F, N, D, and S. Specific locations such as Malaga P.O., Miltonsbury, and Jerusalem P.O. are marked. The map also shows roads, streams, and other geographical features. A north arrow is located at the top center of the map.
