Introduction

This has been the work of many hands, over a period of several years. While it is true that many hands make light work, it is also true that many hands increase the chance of mistakes.

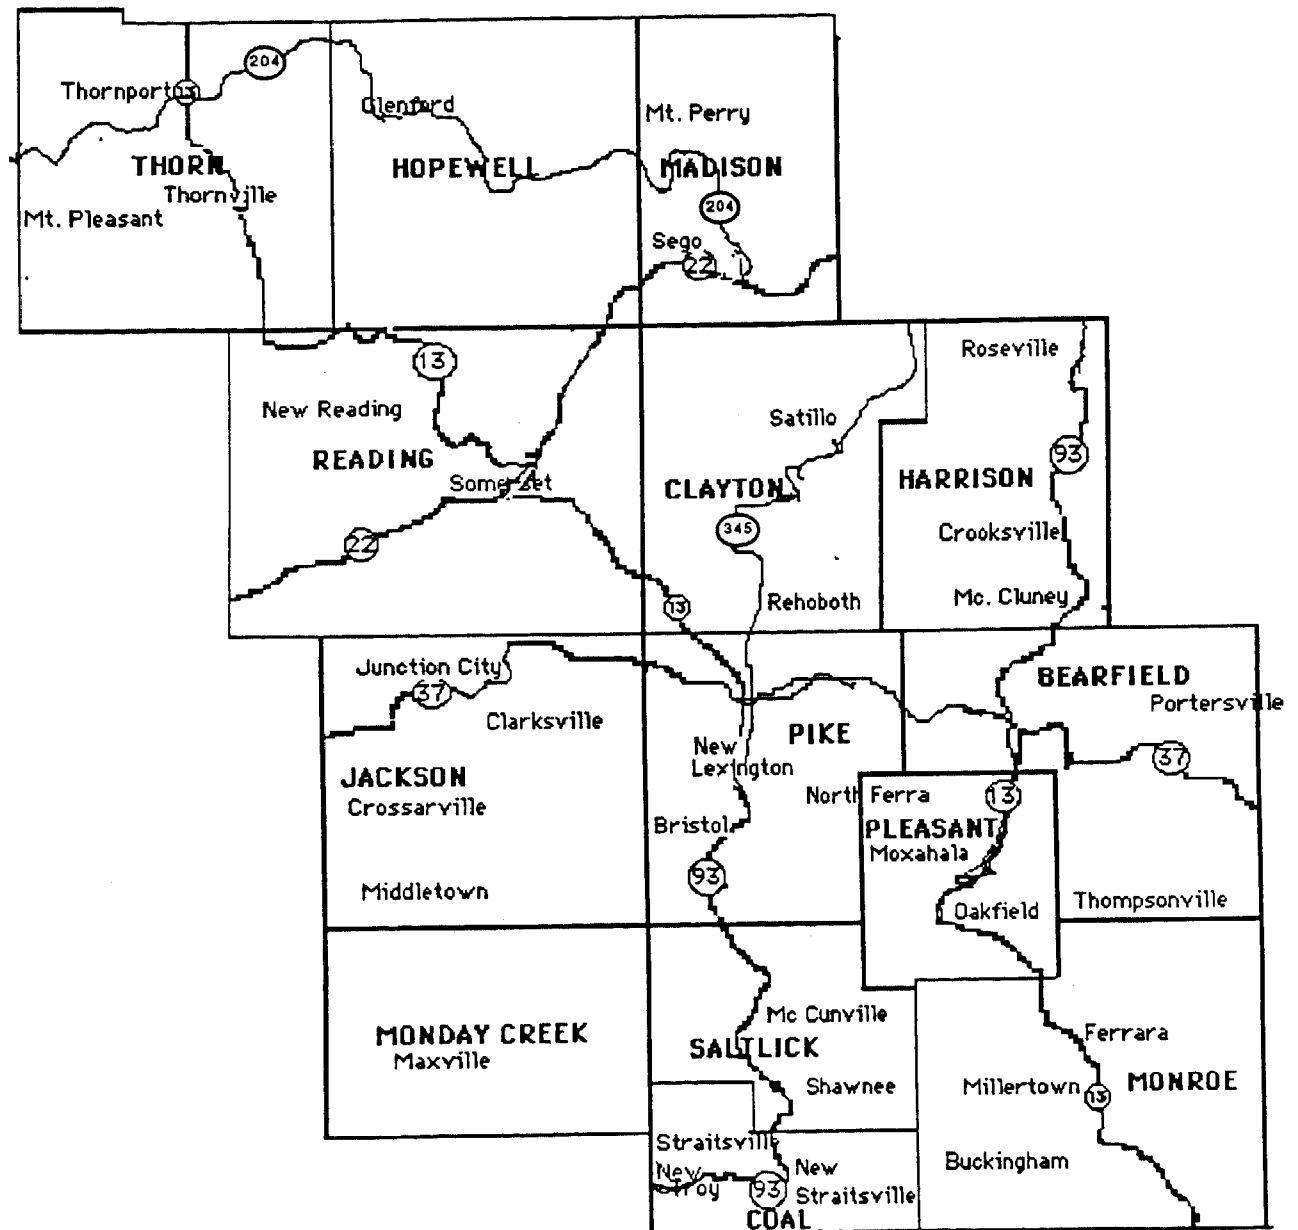

We have proofed this to the best of our ability, not once but several times. There are probably still some errors. Please bring any that you find to our attention and we will make corrections.

Special thanks to (listed alphabetically) Nancy Blake, Gene and Bonnie Pargeon, Nancy Underwood and Rita Wooten.

We would be remiss if we didn't acknowledge the special help given to us by David Underwood and the Ohio University College of Business, Joe Winnenberg and his computer class at Miller High School, and Wendy Papageorge, who drew the map of Perry County. They were invaluable and made this publication possible.

The map on the next page reflects the location and names of the towns as they appeared in the original Atlas of 1875. Current roads and state route numbers have been added for your convenience today. The abbreviations used throughout are listed on the page following the map.

The names of the towns are as they appeared in 1875.
The Roads and route numbers are as they appear on 1992
Perry County maps.
