## Description of the U.S. Government Survey of Public Lands,

ADOPTED 1802.

The public lands consist of those vast tracts of territory that belonged to the U. S. after the Revolution, together with all that was afterward ceded by individual states soon after the formation of the Constitution, with the additions that have since been made by treaty with Indians or by conquest. In 1802, Col. Mansfield, then surveyor of the Northwestern territory, inaugurated a plan for surveying and recording such portions as were offered for sale; which plan, with slight alteration, has continued in use to the present time.

The general features of the plan then adopted, and still in use, are as follows: The entire public domain is first divided into parts called land districts, each of which is put in charge of an officer called a surveyor general, who controls all the surveys in his particular district. In each district a meridian line is run, extending through the entire district, and from some point of this meridian an east and west line is run, which also extends through the district.

These lines are determined astronomically, and, when located, serve as axis to which the subdivisions of the district are referred.

Parallel to the axis, and on each side of them, other lines are run six miles apart, dividing the whole territory into squares, each containing 36 square miles. These squares are called townships.

To take into account the obliquity of the meridians, suitable offsets are made in accordance with an established system.

The townships lying between two consecutive meridians six miles apart constitute a range, and the ranges are numbered from the principal meridians, both east and west. In each range the townships are numbered both north and south from the principal east and west line.

Thus, if a township lies 12 miles east of the principal meridian and 18 miles north of the principal east and west line, it is called township 3 north, range 2 east. Each township is divided by meridians and east and west lines into squares having a mile on each side.

These are called sections, and each contains 640 acres, more or less.

The sections of a township are numbered from the N. E. corner, running along the northern tier of sections to No. 6, thence backward to section No. 12, which lies exactly south of No. 1, and so on alternately, running from right to left and from left to right, to the southeasterly corner, which is No. 36. The four middle sections are numbered respectively 15, 16, 21, 22. In some of the western states section No. 16 is set apart for school purposes, and is therefore called the school section.

If the land is very valuable, the sections are divided into half sections by meridians, and sometimes into quarter sections by lines running east and west, and then again are divided into eighths by meridians.

To designate one of these subdivisions, we say, for example, that it is the west half of the S. W. quarter of section No. 16, township No. 7 north, range 3 west; and, if necessary, we add the designation of the land district.

The diagram attached illustrates the location of townships by number and range; also subdivision of government section.

All fractional parts of sections occur on the north and west sides of townships and on these sides no quarter posts are set.

It is the duty of the surveyor to find all lakes and rivers and "meander" them. By "meandering" is meant a correct survey of a lake or river, courses and distances run, and notes taken of the same.

In the subdivisions of a section, lines are run east and west and north and south from the quarter post. The section is thus divided into quarters and these quarters are subdivided as shown by diagram.

Often the "forties" are not of the same size owing to the inaccuracies, and here the words "more or less," become useful in the descriptions in deeds. All the north tiers of north half of sections are divided by east and west lines, and all the west tiers of west half of sections are divided by north and south lines. The excess or deficiency in the original survey is thrown upon these sections, hence they are called "fractional."

**NOTE.**—It will be observed that the above form of subdivision of Public Lands differ from that used in the survey of the Western Reserve, inasmuch as the Reserve townships were five miles square and in most cases divided into tracts and lots of different dimensions instead of the regular government subdivision of mile sections, etc., etc., as described below. The reason of this will be understood when we call to mind that the survey of the Western Reserve was made in 1796 and '97 or five years previous to the adoption of the present system of survey.

## The Connecticut Western Reserve.

For the benefit of the public schools of Portage County, and to simplify and more fully explain to the young student and others the history of the Connecticut Western Reserve, the publishers have appended above a complete map of this portion of Ohio, so prominently identified with our early history.

The present subdivision into counties is shown by a solid black-faced letter, and the boundaries of each are given by a line of short dashes with etching on the side.

The townships of five miles square, as adopted by the Connecticut Land Company in their survey of 1796, are shown in fine dotted lines, and the names thereon are the correct names at the present date.

On the map on page 15, showing the different land grants of Ohio, the relative position of the Western Reserve to other land grants will be observed.

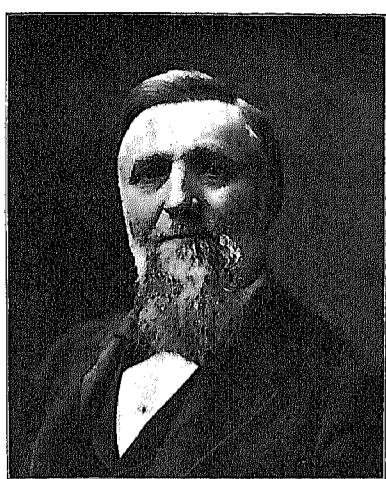

By reference to this map, together with a map of the different land grants of Ohio shown on page 15, the reader will find an easy explanation of many things referred to in the history of the Western Reserve.

The land embraced within the limits of this territory, before its existence as the Western Reserve, was a portion of the Northwestern Territory. In 1800 it was erected into THE COUNTY OF TRUMBULL, with the county seat at Warren, Ohio, and was subdivided into what was called townships, eight in number. These townships are indicated on this map by heavy dotted lines.

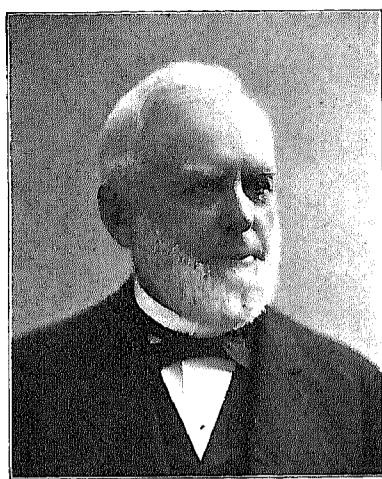

The numbers from 1 to 14 along the eastern tier are the numbers designating the townships north of the base line and west of the principal meridian. The Roman numbers along the south tier of townships from I to XXIV are the range numbers west of the principal meridian. This plan of numbering the townships and ranges is fully explained in the description of the system of United States Government Survey of Public Lands on this page, and small diagrams accompanying that description will explain the numbering thereof.

# DESCRIPTION OF THE DIFFERENT LAND GRANTS OF THE STATE OF OHIO.

(SEE MAP OF SAME ON PAGE 15.)

## CONGRESS LANDS.

Congress lands are so called because they were sold to purchasers by the immediate agents of the government, conformably to laws enacted by Congress. They are all regularly surveyed into townships of six miles square each, under the authority and at the expense of the national government. In the eastern half of the State, that is, east of the Scioto River, and on a meridian line drawn three miles within the eastern limits of Marion and Crawford Counties, the ranges are counted from east to west, and the numbers of the townships from south to north, beginning on the Ohio as a base. But, in the west half of the State, the ranges begin on the State line of Indiana, and are counted eastwardly, until they reach the other ranges, which are numbered westwardly, as above mentioned, excepting between the two Miami Rivers, where the ranges run from south to north, and the numbers of the townships from west to east, that is, from the Great Miami as a base. In the purchase made in 1818, north of the Greenville treaty line, however, a "base line" is made in about the middle of the tract, on the parallel of the 41st degree north latitude, from which the townships are numbered both north and south.

## UNITED STATES MILITARY LANDS.

So called from the circumstances of their having been appropriated by an Act of Congress, of the 1st of June, 1795, to satisfy certain claims of the officers and soldiers of the Revolutionary War. This tract of country embracing these lands is bounded as follows: Beginning at the northwest corner of the original seven ranges, thence south fifty miles, thence west to the Scioto River, thence up said river to the Greenville treaty line, thence northeasterly with said line, to old Fort Lawrence on the Tuscarawas River, thence due east to the place of beginning, including a tract of about 4,000 square miles, or 2,560,000 acres of land. It is, of course, bounded north by the Greenville treaty line, east by the seven ranges of townships, south by the Congress and Refugee lands and west by the Scioto River.

These lands are surveyed into townships five miles square. The townships were then again originally surveyed into quarter townships, of two and a half miles square, containing 4,000 acres each. Subsequently, some of these quarter townships were subdivided into forty lots of 100 acres each, for the accommodation of those soldiers who held warrants for 100 acres only. And, again, after the time originally assigned for the location of these warrants had expired, certain quarter townships, which had not been located, were divided into sections of one mile square each, and sold by the general government like the main body of Congress lands.

## WESTERN RESERVE.

This land, as before stated, was originally granted to Connecticut, by Charles II, in 1662. This territory is situated in the northeast portion of the State, between Lake Erie on the north, Pennsylvania on the east, the parallel of the 41st degree of latitude on the south, and Sandusky and Seneca Counties on the west. It extends 120 miles from east to west, and will average about fifty miles north and south, though on the Pennsylvania line it is sixty-eight miles from north to south. The area is about 3,366,900 acres. It is surveyed into townships of five miles square.

After the United States became a nation, the interfering claims of the different states in regard to the original grants made by the kings of England, as before stated, were likely to become a source of trouble that might terminate in disastrous results. When Congress undertook to obtain the title from the states of their rights to these territories, it was with difficulty that the consent of Connecticut to the cession of her rights could be obtained. A compromise was finally effected, by which Connecticut retained her right to the soil of these 3,366,900 acres, while Congress obtained the right to the jurisdiction over it. They then united this tract to the territory that now forms the State of Ohio.

## FIRE LANDS.

This is a tract 781 square miles, or 500,000 acres, in the western part of the Reserve. The name originated from the circumstances of the State of Connecticut having granted these lands, in 1792, as a donation to certain sufferers by fire, occasioned by the burning of the property of her citizens by the English during the Revolutionary War, particularly at New London, Fairfield and Norwalk. These lands include the five western-most ranges of the Western Reserve townships. Lake Erie and Sandusky Bay project so far south as to leave but the space of six tiers and some fractions of townships between them and the 41st parallel, or tract of about thirty by twenty-seven miles in extent. This tract is surveyed into townships of about five miles square each, and these townships are divided into four quarters.

## OHIO COMPANY'S LAND.

This is a body of land containing about 1,500,000 acres, including, however, the donation tract, school lands, etc., lying along the Ohio River, and including Meigs, nearly all of Athens, and a considerable part of Washington and Gallia Counties. This tract was purchased by the government, October 27, 1787, by Manasseh Cutler and Winthrop Sargeant, from the neighborhood of Salem, Massachusetts, as agents for the "Ohio Company," so called, which had been formed in Massachusetts for the purpose of a settlement in the Ohio country. Only 964,285 acres were ultimately paid for, and, of course, patented. This body of land was then apportioned out in 817 shares of 1,173 acres each, and a town lot of one-third of an acre to each share. These shares were made up to each proprietor, in tracts, one of 640 acres, one of 262, one of 160, one of 100, one of eight, one of three acres, besides the before-mentioned town lot.

Unfortunately for the Ohio Company, owing to their want of topographical knowledge of the country, the body of land selected by them, with some partial exceptions, is the most hilly and sterile of any tract of land of similar extent in the State.

A great portion of its first settlers were revolutionary officers and soldiers, with their families. They made their first settlement

on the Ohio River, at the mouth of the Muskingum, where they founded the town of Marietta, which was the first important settlement in the State.

## THE DONATION TRACT

Is a body of 100,000 acres set off in the northern limits of the Ohio Company's tract, and granted to them by Congress, provided they should obtain one actual settler upon each 100 acres thereof, within five years from the date of the grant, and that so much of the 100,000 acres aforesaid, as should not be taken up, shall revert to the general government.

## SYMMES' PURCHASE.

This was a tract of 311,682 acres of land in the southwestern quarter of the State, between the Great and Little Miami Rivers. It borders on the Ohio River a distance of twenty-seven miles, and extends so far back from the latter, between the two Miamis, as to include the quantity of land just mentioned. It was patented to John Cleves Symmes, in 1794, for sixty-seven cents per acre. Every section 16, or mile square, in each township, was reserved by Congress for the use of schools; and section 29 for the support of religious institutions, besides fifteen acres around Fort Washington in Cincinnati. This tract of country is now one of the most valuable in the State.

## REFUGEE TRACT.

This is a body of 100,000 acres of land, granted by Congress, February 18, 1807, to certain individuals who left the British provinces during the Revolutionary War and espoused the cause of freedom. It is a narrow strip of country, four and a half miles broad from north to south, and extending eastward from the Scioto River forty-eight miles, at Columbus, into Muskingum County. It includes portions of the Counties of Franklin, Fairfield, Perry, Licking and Muskingum.

## FRENCH GRANT.

This is a tract of 24,000 acres of land bordering on the Ohio River, in the southeastern portion of Scioto County. It was granted by Congress, in March, 1795, to a number of French families, who lost their lands at Gallipolis by invalid titles. It extends from a point on the Ohio River, one and one-half miles above, but opposite the mouth of Little Sandy Creek, in Kentucky, and extending eight miles in a direct line down the river, and from the two extremities of that line, extending back at right angles sufficiently far to include the quantity of land required, which exceeded four and a half miles back.

Twelve hundred acres additional were afterwards granted, adjoining the above-mentioned tract, at its lower end, toward the mouth of Little Scioto River. Although the land in question was originally granted exclusively to Frenchmen, not more than eight or ten French families permanently settled on it, the other portion of the population being composed of emigrants from Vermont, New Hampshire and other States. This tract is composed of the Township of Greene, in Scioto County.

## DOHRMAN'S GRANT.

This is a six-mile square township of land, containing 23,040 acres, situated in the southeast portion of Tuscarawas County. It was given to Arnold Henry Dohrman, a Portuguese merchant of Lisbon, by Act of Congress of February 27, 1801, "In consideration of his having, during the Revolutionary War, given shelter and aid to the American cruisers and vessels of war."

## MORAVIAN LANDS.

These are three tracts of 4,000 acres each, originally granted by the old Continental Congress, in July, 1787, and confirmed by the Act of Congress, of June 1, 1796, to the Moravian brethren, at Bethlehem, in Pennsylvania, in trust and for the use of the Christianized Indians living thereon. They are laid out in nearly square forms on the Muskingum River, in what is now Tuscarawas County. They are called by the names of Schenbrun, Gnadenhutten and Salem tracts. The Indians have long since left them.

## ZANE'S TRACTS.

These are three tracts of one mile square each—one on the Muskingum River, which includes the city of Zanesville—one at the crossing of the Hocking River, on which the town of Lancaster is laid out—and the third on the left bank of the Scioto River, opposite Chillicothe. They were granted by Congress, in May, 1796, to Ebenezer Zane, on condition that he should open a road through them from Wheeling, Virginia, to Maysville, Kentucky.

## THE MAUMEE ROAD LANDS.

These are a body of lands, averaging two miles wide, lying along one mile on each side of the road from the Maumee River at Perrysburg, to the western limits of the Western Reserve, a distance of about forty-six miles, and comprising nearly 60,000 acres. They were originally granted by the Indian owners, at the treaty of Brownsville, in 1808, to enable the United States to make a road on the line just mentioned. The general government never moved in the business until February, 1823, when Congress passed an Act, making over the aforesaid lands to the State of Ohio, provided she would, within four years thereafter, make and keep in repair, a good road throughout the aforesaid route of sixty-four miles. This road the State government opened out, obtained the land and sold it.

## TURNPIKE LANDS.

These are forty-nine sections, amounting to 31,360 acres, situated along the western side of the Columbus and Sandusky Turnpike, in the eastern part of Seneca, Crawford and Marion Counties. They were originally granted by an Act of Congress, on the 3d of March, 1827, and more especially by a supplementary Act the next year. The considerations, for which these lands were granted, were that the mail stages, and all troops and property of the United States, which should ever be moved and transferred along this road, should pass free of toll.

## OHIO CANAL LANDS.

Congress, by an Act passed on the 24th of May, 1828, granted to the State of Ohio 500,000 acres of land to aid the State in completing her canals, and also a quantity "equal to one-half of five sections in width on each side of said canal" (the Miami Canal), so far as it passes through the public lands, north of the old Greenville treaty line, and this is estimated at 106 miles, thereby making the quantity of land thus granted 340,000 acres—or 840,000 acres in all, provided that all troops and property of the United States transported thereon shall pass free of toll, as in the case of the before-mentioned turnpike lands.

## SCHOOL LANDS.

By compact between the United States and the State of Ohio, when the latter was admitted, it was stipulated, for and in consideration that the State should never tax the Congress lands, until after they had been sold five years, and in consideration that the public lands would thereby more readily sell, that the one thirty-sixth part of all the territory included within the limits of the State should be set apart for the support of common schools therein. And, for the purpose of getting at lands which should, in point of quality of soil, be on an average with the whole of the land in the country, they decreed that it should be selected by lot, in small tracts; that, to effect this fairly, it should consist of section number 16, let that section be good or bad, in every township of Congress land, and also in the Ohio Company's land, and in Symmes' purchases, all of which townships are composed of thirty-six sections each, and, for the United States Military Lands and Western Reserve, a number of quarter townships, two and a half miles square, each (being the smallest survey then made), should be selected by the Secretary of the Treasury, in different places throughout the United States Military Tract, equivalent in quality to the one thirty-sixth part of those two tracts, respectively. And for the Virginia Military Tract, Congress enacted that a quantity of land equal to the one thirty-sixth part of the estimated quantity of land contained therein should be selected by lot, in what is called the "New Purchase," now comprising Wayne, Richland and part of Holmes and Marion Counties, in quarter township tracts of three miles square each. Most of these selections were accordingly made, but, in some instances by the carelessness of the officers conducting the sales, or from some other cause, a few sections 16 had been sold, in which case Congress, when applied to, generally granted other lands in lieu thereof, as, for instance, no section 16 was reserved in Montgomery Township, in which Columbus is situated, and Congress afterwards granted therefor section 21, in the township cornering thereon to the southeast. Furthermore, as the Virginia Military Tract was found to be much larger than was at first supposed, there was not really school lands enough set off for this district. It lacked two quarter townships, or eighteen sections.

All these lands were vested in the legislature, in trust for the people, for school purposes.

## COLLEGE TOWNSHIPS.

These lands are embraced in three townships, six miles square each, granted by Congress—two of them to the Ohio Company, for the use of a college to be established within their purchase, and one for the use of the inhabitants of Symmes' purchase.

The two in the Ohio Company's purchase are situated near the center of Athens County, and constitute a considerable part of the permanent funds of the Ohio University at Athens. That one belonging to Symmes' purchase, composes the northwestern township in Butler County. Its income is appropriated to the Miami University, which is erected theron. This University was chartered in 1809, and located in the town of Oxford, which is situated in the foregoing township of land, granted by Congress for its support.

These lands were really no donation, but were a part of the considerations inducing the Ohio Company and J. C. Symmes to make their purchases.

## MINISTERIAL LANDS.

In both the Ohio Company's and Symmes' purchase, every section 29—equal to one thirty-sixth part of every township—is reserved as a permanent fund for the support of a settled minister. As the purchasers of these two tracts came from parts of the Union where it was customary, and deemed necessary, to have a regular settled clergyman in every town, they, therefore, stipulated in their original purchase that a permanent fund, in land, should thus be set apart for this purpose. In no other part of the State than in these two purchases are any land set apart for this purpose.

## SALT SECTIONS.

Near the center of Jackson County Congress originally reserved from sale thirty-six sections, or one six-mile square township around and including what is called the Scioto Salt Licks, also one-quarter of a five-mile square township in what is now Delaware County, in all forty-two and a quarter sections, or 27,040 acres. By an act of Congress, of the 28th of December, 1824, the legislature of Ohio was authorized to sell these lands and apply the proceeds thereof to such literary purposes as the legislature may think proper, but to no other purpose whatever.

## VIRGINIA MILITARY LANDS.

This is one of the largest and most important reservations of lands made by the states which ceded territory to the general government.

This tract of land is situated between the Little Miami and Scioto Rivers. It embraces within its limits Adams, Brown, Clermont, Clinton, Fayette, Highland, Madison and Union Counties entirely, and portions of Marion, Delaware, Franklin, Pickaway, Ross, Pike, Scioto, Warren, Greene, Clark, Champaign, Logan and Hardin. It embraces a body of 6,570 square miles, or 4,204,800 acres of land.

Virginia had, during the progress of the Revolutionary War, promised her officers and soldiers serving in the Continental line, large bounties in land. When she ceded her territory northwest of the Ohio to the general government, she reserved enough of the land to fulfill her engagements with her troops who had served in the Continental Army. Hence the name "Virginia Military Lands."

**MAP SHOWING  
CONGRESSIONAL DISTRICTS,  
Of the State of Ohio**

**APPORTIONMENT OF THE STATE OF OHIO FOR MEMBERS OF THE GENERAL ASSEMBLY FOR THE FIFTH DECENTNIAL PERIOD.**

In conformity with the provisions of the Constitution of the State of Ohio, we, James E. Campbell, Governor; Ebenezer W. Poe, Auditor of State, and Daniel J. Ryan, Secretary of State, have ascertained and determined the ratio of representation in the General Assembly according to the decennial census, the number of representatives and senators each county or district shall be entitled to elect, and for what years within the next ensuing ten years, and do declare the same as follows:

The total population of the several counties of the State by the federal census, as ascertained by us, is three million six hundred and seventy-two thousand three hundred and sixteen. The ratio for a representative is thirty-six thousand seven hundred and twenty-four; and for a Senator, one hundred and four thousand nine hundred and twenty-four.

**REPRESENTATIVE APPORTIONMENT**

The apportionment for the House of Representatives during the fifth decennial period, under the constitution, shall be as follows:

The counties of Ashland, Athens, Auglaize, Allen, Ashtabula, Brown, Champaign, Clermont, Clinton, Coshocton, Crawford, Defiance, Delaware, Darke, Erie, Fairfield, Fayette, Fulton, Gallia, Greene, Guernsey, Hardin, Henry, Holmes, Highland, Huron, Hancock, Jackson, Jefferson, Knox, Lawrence, Logan, Licking, Lorain, Madison, Medina, Meigs, Mercer, Monroe, Morgan, Miami, Noble, Ottawa, Paulding, Perry, Pickaway, Portage, Preble, Putnam, Richland, Ross, Sandusky, Scioto, Shelby, Seneca, Trumbull, Union, Van Wert, Washington, Warren, Williams, Wyandot, Wayne, shall severally be entitled to one representative in each session of the decennial period.

The county of Columbiana shall be entitled to one representative in each session and one additional representative in the first, second and third sessions of the decennial period.

The counties of Belmont, Clark, Mahoning and Summit shall severally be entitled to one representative in each session, and one additional representative each in the third and fourth sessions.

The counties of Butler, Muskingum, Tuscarawas and Wood shall severally be entitled to one representative in each session, and one additional representative each in the fifth session.

The county of Stark shall be entitled to two representatives in each session and one additional representative in the fifth session of the decennial period.

The counties of Lucas and Montgomery shall severally be entitled to two representatives, in each session and one additional representative each in the first, second and third sessions.

The county of Franklin shall be entitled to three representatives in each session and one additional representative in the fifth session of the decennial period.

The county of Cuyahoga shall be entitled to eight representatives in each session and one additional representative in the third and fourth sessions of the decennial period.

The county of Hamilton shall be entitled to ten representatives in each session.

The counties of Carroll, Morrow, Geauga, Lake, Vinton and Pike, having less than one-half of a representative ratio of population, have respectively and severally been attached to the adjoining county having the least number of inhabitants, and until they acquire a sufficient population to entitle them to elect separately, shall form representative districts during the decennial period in the manner following, to-wit: The counties of Carroll and Harrison, one district; the counties of Morrow and Marion, one district; the counties of Geauga and Lake, one district; the counties of Vinton and Hocking, one district; the counties of Pike and Adams, one district. Each of said districts so formed, shall be entitled to one representative in each session of the decennial period.

**SENATORIAL APPORTIONMENT**

By the Constitution the State is divided into thirty-three senatorial districts,

The following senatorial districts, to-wit: The third, the seventh, the eighth, the eleventh, the twelfth, the thirteenth, the twenty-first, the twenty-third, the thirtieth and the thirty-first shall be entitled to one senator in each session of the decennial period.

The thirty-second district shall be entitled to one senator in each session and one additional senator in the first, second, third and fourth sessions of the decennial period.

The tenth district shall be entitled to one senator in each session and one additional senator in the third and fourth sessions of the decennial period.

The thirty-third district shall be entitled to two senators in each session and one additional senator in the third and fourth sessions of the decennial period.

The twenty-fifth district shall be entitled to two senators in each session and one additional senator in the first, second, third and fourth sessions of the decennial period.

The first district shall be entitled to three senators in each session and one additional senator in the third and fourth sessions of the decennial period.

The following districts until they acquire a sufficient population to entitle them to elect separately, shall form districts in the following manner, to-wit: The second and fourth senatorial districts shall form one district, and the district so constituted shall be entitled to one senator in each session and one additional senator in the fifth session of the decennial period.

The fifth and sixth senatorial districts shall form one district, and the district so constituted shall be entitled to one senator in each session and one additional senator in the fifth session.

The ninth and fourteenth senatorial districts, composed of the counties of Athens, Hocking, Fairfield, Washington, Morgan, and part of the counties of Noble and Monroe, shall form one district, and the district so constituted shall be entitled to one senator in each session and one additional senator in the third and fourth sessions of the decennial period.

The fifteenth district composed of the counties of Muskingum and Perry, and the sixteenth district composed of the counties of Delaware and Licking having been annexed at the last preceding apportionment, and not having acquired sufficient population to entitle them to elect separately, shall be entitled to one senator in each session and one additional senator in the third and fourth sessions of the decennial period.

The seventeenth district, composed of the counties of Knox and Morrow, and the twenty-eighth district, composed of the counties of Wayne and Holmes, having in like manner been annexed at a preceding apportionment, and not having acquired sufficient population to entitle them to elect separately, shall be entitled to one senator in each session of the decennial period.

The eighteenth district composed of the counties of Tuscarawas and Coshocton, and the nineteenth district, composed of the county of Guernsey and part of the counties of Monroe and Noble, having been annexed at the last preceding apportionment, and not having acquired sufficient population to entitle them to elect separately, shall be entitled to one senator in each session and one additional senator in the fifth session of the decennial period.

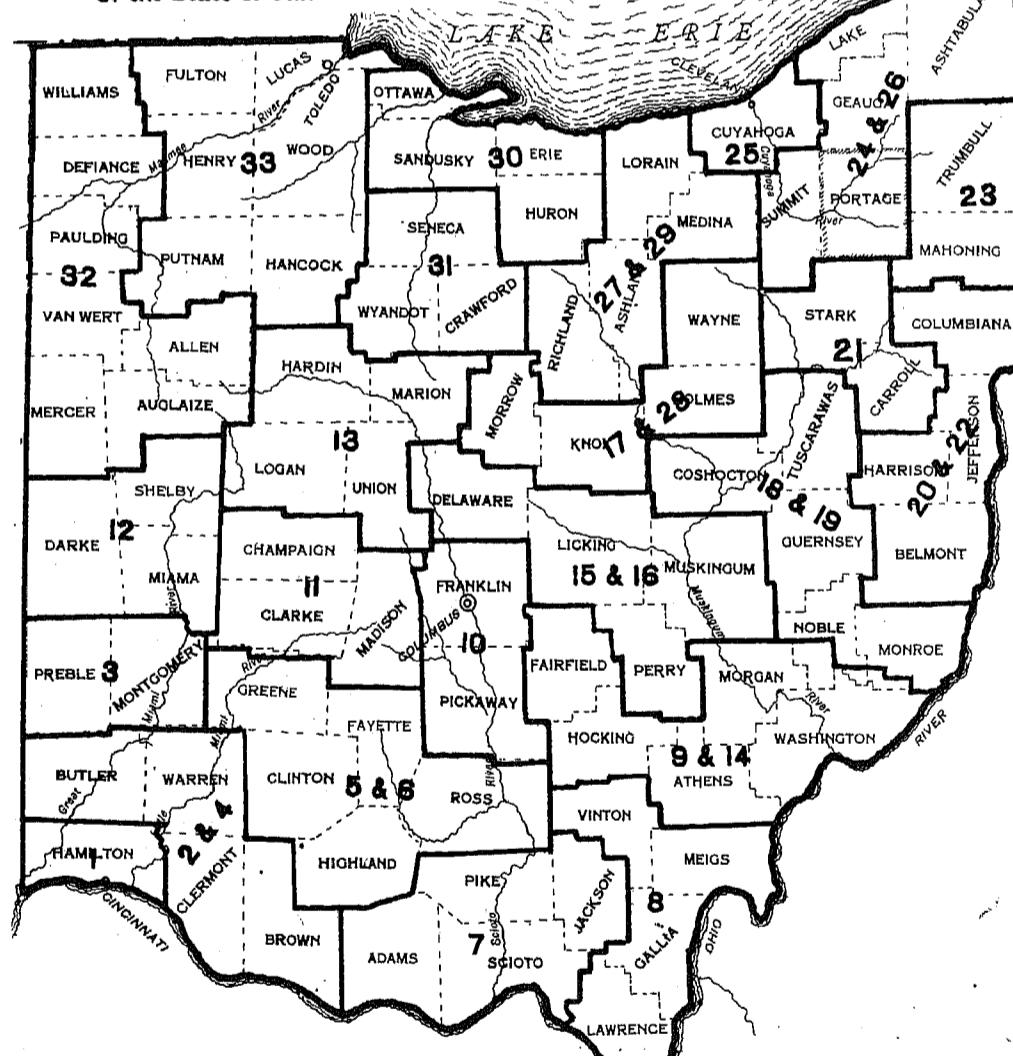

The twentieth and twenty-second senatorial districts shall form one district, and the district so constituted shall be entitled to one senator in each session and one additional senator in the first, second and third sessions of the decennial period.

The twenty-fourth district, composed of the counties of Ashtabula, Lake and Geauga, and the twenty-sixth district, composed of the counties of Portage and Summit, having been annexed at the last preceding apportionment, and not having acquired sufficient population to entitle them to elect separately, shall be entitled to one senator in each session and one additional senator in the third and fourth sessions of the decennial period.

The twenty-seventh district, composed of the counties of Lorain and Medina, and the twenty-ninth district, composed of the counties of Ashland and Richland, having in like manner been annexed at a preceding apportionment, and not having acquired sufficient population to entitle them to elect separately, shall be entitled to one senator in each session of the decennial period.

— 1 —

This historical map of the Brimfield area, spanning from approximately 1850 to 1900, provides a detailed view of landholdings and community structures. The map is organized into several townships, each containing numerous property parcels. Key features include:

- Townships:** Brimfield, Rootstown, New Milford, and Independence.
- Districts:** Sub. Dist. No. 6, Sub. Dist. No. 9, Sub. Dist. No. 5, and Joint Sub. Dist.
- Rivers and Creeks:** St. Mary's River, C.R. Creek, and W.H. Wilson Creek.
- Settlements:** Rootstown P.O., New Milford P.O., and various farmsteads and estates.
- Landmarks:** T.P. (Tollgate), I.P. (Inlet Pond), and School No. 5.
- Names:** Numerous names are scattered across the map, including A. Willard, H.T. Cushing, G.N. Bissell, W.J. Hayes, J.S. Ely, H.B. Camp, G.W. Prindle, K. Sperra, C.W. Calvin, M.L. Bingham, J.T. Stoddard, P. Chapman, J.A. Moose, J.W. Winkler, E.A. Sanford, L.F. Butler, A.S. Keller, A.G. Baldwin, and G. Wilcox.

The map uses a grid system for property boundaries and contains numerous handwritten notes and measurements, reflecting the complex land ownership patterns of the era.

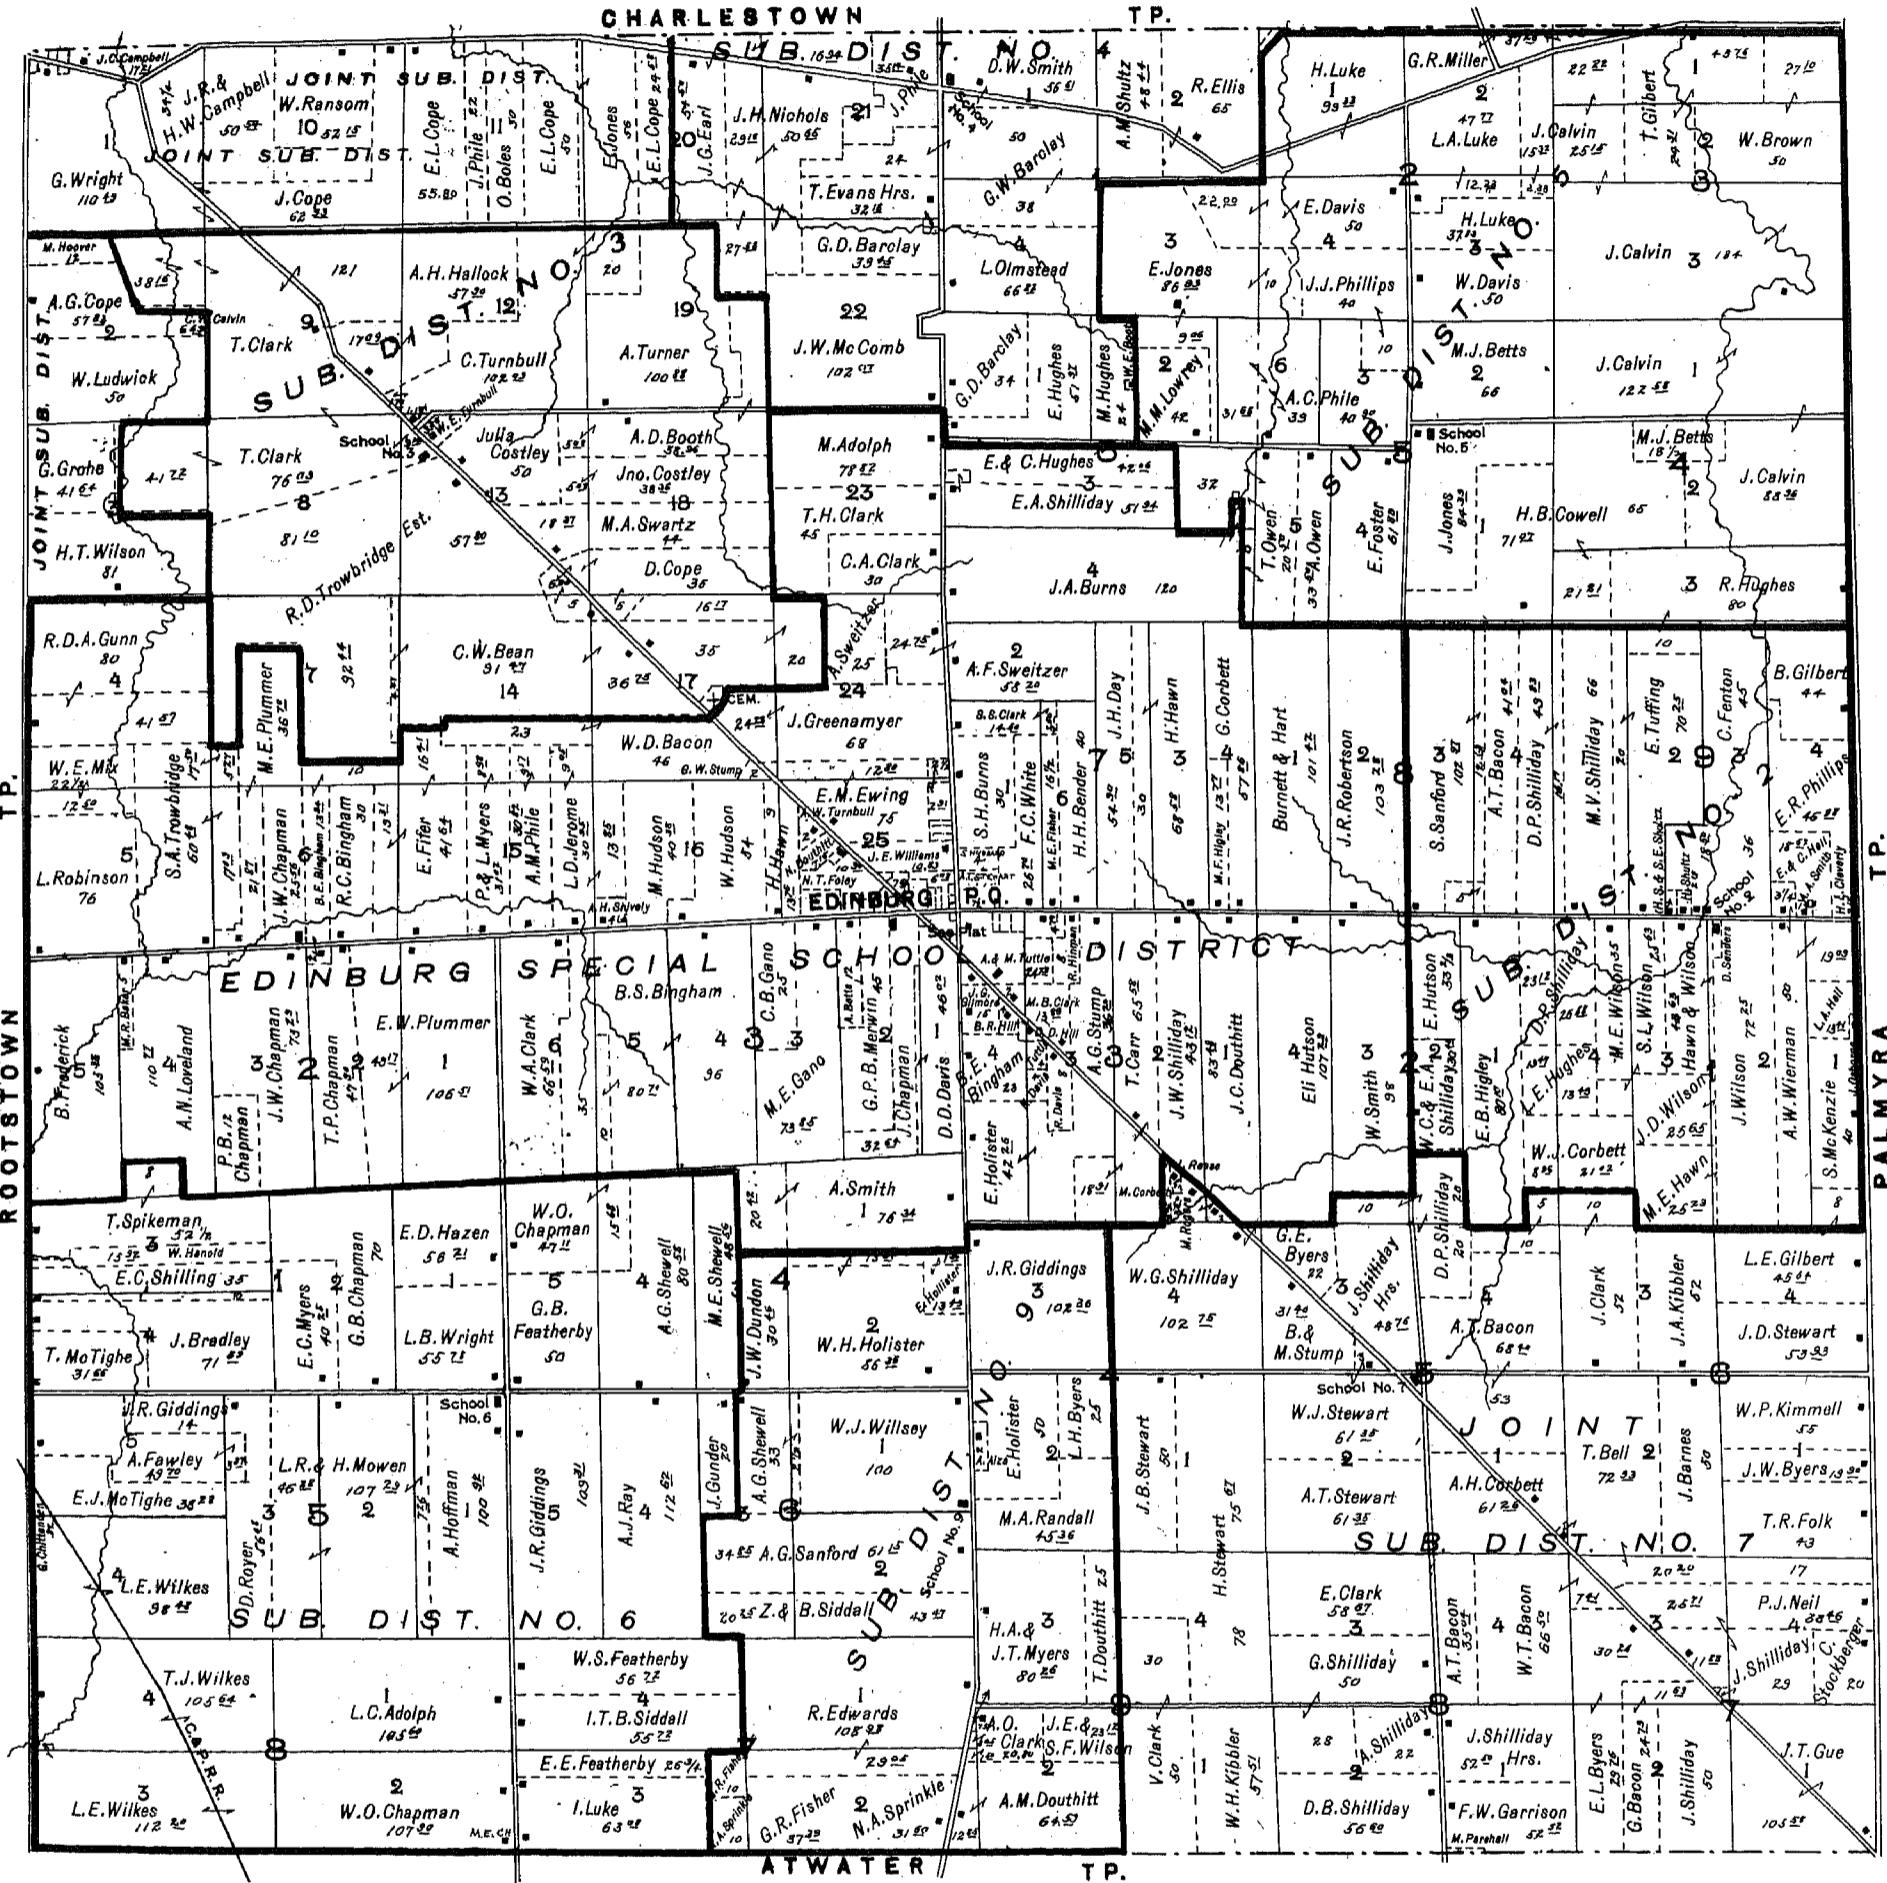

~~RANDOLPH~~

TP

The logo features a large, stylized tree with a wide canopy. The word "MAPLE" is written in a script font along the top curve of the canopy. Below the canopy, the word "EDINBURG" is written in a bold, blocky font. The entire logo is rendered in a high-contrast, black-and-white graphic style.
