HISTORICAL SKETCH OF NOBLE COUNTY.

Due Credit is given DAVID McGARRY, Esq., for assisting in the preparation of the following Sketch.

Noble County, was formed by virtue of an Act of the General Assembly of the State of Ohio, passed the 11th day of March, 1851, from parts of the Counties of Washington, Morgan, Guernsey and Monroe. The Townships of Beaver, Wayne, Seneca and Buffalo came from Guernsey County,—Marion, Stock, three-fifths of Centre, Enoch, Elk, and the greater portion of Jefferson came from Monroe County,—Olive, Jackson, Sharon, Noble, Brookfield, and two-fifths of Centre came from Morgan County. And a small portion of the south end of Jefferson Township came from Washington County. Noble is the last of the eighty-eight counties now formed within the State, and was named in honor of James Noble, one of the first settlers, then living near the town of Sarahsville, in that portion of Noble Township which was ent off and attached to Centre at the organization of the County. It is bounded on the north by Guernsey County; on the cast by Monroe County; on the south by Washington County, and on the west by Morgan County; and contains an area of four hundred and two square miles; being a little more than is required by the Constitution of Ohio to constitute a County. It is, in point of area, one of the smallest Counties in the State.

The citizens of the various Townships and parts of the County In the number of fifteen; their names having already been given. The County Commissioners also at the same session selected a site for the County County Buildings in the north part of the Town of Sarahsville. The jail was also put under contract and built.

The citizens of the southern section of the County were not satisfied with the location of the seat of justice at Sarahsville, in that portion of Noble Township which was continued to Sarahsville to seat of justice. The southern section then sought those means which they thought would gain to them a removal of the seat of justice from Sarahsville to the lands of Samuel Caldwell on which the town of Caldwell has since been built. They were successful in annually electing a majority of the Board

more than is required by the Constitution of the smallest Counties in the State.

The citizens of Sarahsville and vicinity pressed upon the Legislature the propriety of creeting the new County of Noble, at its forty-fifth, forty-sixth, forty-seventh, and forty-eighth sessions, and during its forty-ninth sessions, their request was

Hon Egra McKee was at that time a member of the Hon. Ezra McKee was at that time a member of the Legislature from that part of Morgan County, which now belongs to Noble. He took a strong stand in favor of the formation of the new County during part of that session. The act creating this County also appointed the commissioners to locate the Seat of Justice. This was a compromise between the representatives of the Sarahsville interest and Mr. McKee, who favored the location of the seat of justice on the lands on which the Town of Caldwell now stands.

McKee, who favored the location of the seat of justice on the lands on which the Town of Caldwell now stands.

Two-thirds of the petitioners; for the new County, asked that Sarahsville should be the County seat; the other third asked the Legislature to appoint commissioners to locate the same. This difference jeopardized the main question; and the representatives of the Sarahsville interest, gave way, and accepted the compromise before mentioned.

same. This difference jeopardized the main question: and the representatives of the Sarahaville interest, gave way, and accepted the compromise before mentioned.

Prominent amongst the actors for the erection of the new County, were the McGarrys, Nobles, Balls, Youngs and Salladays. Samuel McGarry, who afterwards was Probate Judge of the new County, was at Columbus during the entire sessions of the Legislature advocating the measure. David McGarry and William J. Young also took an active part in presenting before the Legislature the claims of the citizens favoring the project.

The Board of Commissioners, as appointed by the beforementioned act, consisted of George McCullough of Jefferson County; Lafayette Emmett of Knox County, and Martin Hecard of Meigs County, whose duty it was under the same act to locate a seat of justice for the new County. They accordingly convened at Sarahaville during the month of April following the passage of the Act, for the purpose as beforementioned. And after examining the maps of the new County, and personally visiting, hearing and considering the claims of the citizens at the several points asking for the seat of justice, in connection with the natural advantages belonging to those points, they unanimously reported in favor of the town of Sarahaville for the location of the same.

The Legislature elected as Associate Judges, Patrick Finley, William Smith and Gilman Dudley, who in turn appointed Isaac Q. Morris, clerk.

The first election for County officers was held in April,

William Smith and Gilman Dudley, who in turn appointed Isaac Q. Morris, clerk.

The first election for County officers was held in April, 1851, at which Robert Barclay was chosen Auditor; Samuel McGarry, Treasurer; Joseph Schofield, Sheriff; Jabez Belford, Proscenting Attorney; John Noble, Timothy Smith and Jacob Lyons, County Commissioners; Robert Hellyer, Recorder, and John H. Jeffries, County Surveyor.

The County Commissioners at their first session held in

satisfied with the location of the seat of justice at Sarahsville, claiming that the Sarahsville section had brought unfair influence to bear upon the State Commissioners, and by such means had secured to Sarahsville the seat of justice. The southern section then sought those means which they thought would gain to them a removal of the seat of justice from Sarahsville to the lands of Samuel Caldwell on which the town of Caldwell has since been built. They were successful in annually electing a majority of the Board of County Commissioners, who were favorable to removal of the seat of justice, and thereby prevented the further erection of County buildings, other than the jail already built. At the same time and all the while, they were petitioning the Legislature to grant the County a vote on the question of removal. Matters continued in this way during the latter part of the year of 1851, and through the years of 1852 and 1853, until March, 1854, the Legislature granted the County a vote on the question of removal of the seat of justice from Sarahsville to the lands owned by Samuel Caldwell on the west fork of Duck Creek. The strife then commenced in earnest. The act of the Legislature required that a majority of all the votes east at the following October election (October, 1854) should be necessary to decide for or against removal. The contest was thereby reduced to the simple question of the largest vote between Sarahsville where the seat of justice was located, and the site on the Caldwell farm in Olive Township, where the Town of Caldwell stands. The Town of Sharon located about three miles south-west from Caldwell became fearful that, should the County seat be located on the Caldwell lands a rival town would be built up detrimental to her interest, therefore gave a few votes in favor of Sarahsville. On the other hand the Town of Summerfield, situated Caldwell lands a rival town would be built up detrimental to her interest, therefore gave a few votes in favor of Sarahsville. On the other hand the Town of Summerfield, situated in the eastern part of the County, and much nearer Sarahsville than the Caldwell lands, were persuaded that if the seat of justice remained at Sarahsville, it might stimulate the growth of the latter so as to endanger her interests, thereupon gave quite a number of votes in favor of the Caldwell lands—or for removal.

The divinors of Regues Township in the astronoments.

gave quite a number of votes in favor of the Caldwell lands—or for removal.

The citizens of Beaver Township in the extreme north-castern corner of the County, were told by the leaders of the southern sectional interest, that if they would vote for removal, that then, they, the southern section, would move to have Beaver Township reannexed to Guernsey County, to which it formerly belonged; and in lieu of this territory they would have the same amount taken from Washington County and annexed to the south side of Noble County. This proposition, together with the fact of the Baltimore and Ohio Rail Road (then the C. O. R. R.) running through the Township, placing it in good connection with Cambridge, the County seat of Guernsey County, thereby secured thirty votes out of that Township for removal. This election gave in the entire County a majority of sixty-one votes for removal: hence the removal of the seat of justice. The official business of the County however continued to be transacted at Sarahsville, until a sufficient number of buildings were creeted on the Caldwell lands, for the accommodation of the business pertaining to the new seat of justice. The County Records were accordingly moved to Caldwell, the permanent County seat in 1858.

In political matters the County is very evenly divided; as

County set in 1858.

In political matters the County is very evenly divided; as an illustration the Republican party in 1871 nominated David McGarry of Centre Township as their candidate for Representative in the Ohio State Legislature, and the Democratic party nominated Benjamin F. Spriggs of Sarahsville in the same township as their candidate for the same office. It was

a warm contest, each candidate receiving an equal number of votes. The Clerk of the Court drew lots, and the certificate was given to Benjamin F. Spriggs.

TOPOGRAPHY AND SOIL

Noble County is divided into two main slopes, by a dividing ridge, that extends accross the County nearly cast and west through the Townships of Marion, Centre, Noble, Buffalo and a corner of Brookfield; which separates the waters of Wills Creek and its tributaries from Meigs, Olive Green and the East, Middle, and West forks of Duck Creek. The stream on the north side of the dividing ridge rises in the north-west corner of Monroe County and flows in a north-westerly direction through the north-east part of Noble, draining the Townships of Marion, Beaver, Wayne, Seneca, part of Centre and Buffalo, being a tributary of the Muskingum River.

draining the Townships of Marion, Beaver, Wayne, Seneca, part of Centre and Buffalo, being a tributary of the Muskingum River.

The streams south of the dividing ridge are Duck, Meigs and Olive Green Creeks. The Duck Creek as above-mentioned, has three forks, all of which are quite large and drain nearly half of the County. The west fork of Duck Creek rises in Buffalo Township and flows south, draining the Townships of Noble, Olive, and parts of Jackson, Jefferson, Centre and Brookfield. The East and Middle forks of Duck Greeks drain the Townships of Elk, Enoch, Stock and part of Jefferson. Meigs Creek, a tributary of the Muskingum River, rises in Brookfield Township and flows south-west, draining the southern part of the Township. Olive Green Creek rises in the northern part of Sharon Township, flows south, draining almost the entire Township, and is a tributary of the Muskingum River. There are a number of small streams tributary to the Muskingum which drain the southern part of Jackson Township.

By examining the outline map, the reader will obtain a more complete idea of the drainage of this County, in a connected form.

The County is generally hilly and undulating, containing

nected form.

The County is generally hilly and undulating, containing many natural mounds. Its scenery in many places is quite grand and attractive, affording a great variety of views. In almost any township in the County can be found high points of land from which the beholder can obtain a fine view of the surrounding country.

These hills are not so rugged and steep but what they can generally be cultivated from their base to their summit, a feature not common to hilly countries. Hence there is but very little waste land in the County.

An abundance of limestone is found in the uneven sections, even to the tops of the largest hills. This being continually

even to the tops of the largest hills. This being continually exposed to atmospheric influence, crumbles and acts on the soil as an excellent fertilizer, rendering it equally productive with the lower tracts.

soil as an excellent fertilizer, rendering it equally productive with the lower tracts.

The valleys or bottom lands in the County are not very extensive.— The principal bottom lands are situated along Duck and Wills Creeks and their main tributaries, all of which are very productive. But it is generally conceded that the soil of the Duck Creek bottoms are richer than those of Wills Creek, but are not so wide. The variety of soil in the County gives a wide scope to agriculture. The farms being generally small induces many of the farmers to direct their attention to the growing of grain and tobacco: consequently the lands are under a higher state of entivation than in other Counties where the farms are larger. There are seventy-one per cent of all the lands in the County under cultivation: twenty-six per cent. of woodlands, and only three per cent of waste lands. We amnex a few statistics of its productions by way of comparing it with other Counties of the Muskingum Valley. The principal products are hay, corn, wheat, oats, rye, tobacco, sorghum, apples, horses, beef cattle, sheep and swine. The number of bushels of corn produced in 1873 was 780,541; and in 1874 was 825,052. The average per acre of corn for the County in 1871 was 40.79 bushels, in 1872 was 40.17 bushels, in 1873 was 38,68 bushels, and in 1874 was 38.65 bushels.

of the sixteen Counties in the Muskingum Valley for these

of the sixteen Counties in the Muskingum Valley for these four years were 38.68 hushels. Consequently Noble is above the average in this valley.

The tobacco crop of the County in 1873 was 5,639,653 pounds; placing it as the second County in the State in the production of tobacco, which it has been for a series of years. The wheat crop of the County for 1874 was a partial failure, only 176,974 bushels being produced. The crop of hay for the year of 1874 was 12,097 tons. The sorghum crop for 1874 amounted to 26,279 gallons, it being one among the best sorghum producing Counties in the State. The number of horses in 1875 was 5,983; cattle 14,714; hogs 13,074 and sheep 51,685. The number of bushels of apples in 1874 were 196,466. In the year of 1869 this County was the second in the state in the production of apples, there being produced that year, 345,252 bushels. This is ample testimony to warrant us in saying that Noble ranks as one of the first Counties in the state in the production of apples.

VARIETIES OF TIMBER.

White oak stands first, of which there is a sufficient quantity to supply all the demands for the next hundred years, and its quality is unsurpassed. A list of other timbers comprises black walnut, hickory, sugar-maple, beech-maple, ash, elm, poplar, wild cherry, sycamore, buckeye, butternut and the usual amount of undergrowth found in this section of the state. Among the wild fruits are the black-haw, grape, plum, service-berry, red-haw and crab apple.

The above-mentioned timbers cover an area of about 58,320 cares in the Courty.

acres in the County.

The mineral resources of Noble are abundant; and in this spect there are but few Counties in the state that surpass her; and we might say not any, if her resources were properly

Until within a few years she has been without the advan-Until within a few years she has been without the advantages of cheap and speedy transportation of her minerals, and as a consequence they are not developed to any great extent, the people having devoted themselves to agricultural pursuits. But now they have the facilities for transportation by the Marietta, Pittsburgh and Cleveland Rail Road, and recent geological surveys have demonstrated the existence in immense quantities of iron ore, coal, limestone, salt and petroleum. Bituminous coal is found in every township in the County of sufficient thickness to be mined. Within the bounds of the County geological surveys show that there are four distinct or separate seams of coal existing; but some of these are so thin as to be of little intrinsic value. The principal one called the Cumberland seam is found in nearly every these are so thin as to be of little intrinsic value. The principal one called the Cumberland seam is found in nearly every part of the County. This seam is about five feet in thickness in the north-eastern part of the County. In the southern part of the County the mines opened by the Ohio Coal Company, show the main seam to be from 5½ to 6 feet in thickness, and the upper seam 3 feet. This coal is of a very fine quality, and very easily mined.

and very easily mined.

The Cambridge seam underlies the entire County, but as yet has not been opened, being at a considerable depth below the surface. The State Geologists report it at a depth of from five hundred and ten to five hundred and twenty feet below five hundred and ten to five hundred and twenty feet below the Cumberland seam. Hence the Cambridge seam at Cald-well is approximately one hundred and sixty feet below the surface. But so long as there is so much coal in this County that is much more accessible, it is not likely that the people will care to incur the expense of investigating the Cambridge

Iron ore is found in different parts of the County; in fact Iron ore is found in different parts of the Colliny; in fact, and if the hills contain more or less of this ore. In the north-western part of Noble Township, General Warner of Marietta leased and opened iron ore mines, but on account of not being able to get a right of way, to extend a brauch railroad from the M. P. and C. Railroad to the mines he abandoned the enterprise. He mined and shipped to Columbus one car load of the ore where it was tested, and found to bus one car load of the ore where it was tested, and rounce contain a large percentage of iron of an excellent quality. In the south part of the County, very rich veins have been found, and it is believed to be in abundance.

Limestone abounds throughout the entire County, and may receive he said to crop out of every hill-side. There are

properly he said to crop out of every hill-side. There are several distinct and separate seams found at different elevations, of various colors and quality.

tions, of various colors and quality.

Building stone of a very good quality can be conveniently quarried from almost any of the hills. One of the best quarries has been opened along the line of the M. P. and C. Railroad between Hiramsburgh Station and Ava.

There is an abundance of wealth in the hills of Noble

County, which at no distant day will be brought into use.

PETROLEUM.

The first knowledge of the existence of petroleum in Noble County, was obtained by boring a salt well at the village of Olive in the year of 1814, which in its discharges of gas would throw water out of the well to the height of thirty or forty

feet. These eruptions were attended by a flow of petroleum amounting to a barrel or two at each paroxysm, and returning at intervals of from two to five days. But at that time the people were not aware of its value as a burning and lubricating fluid, and no particular account was taken of it. During the oil excitement from 1860 to 1865, this well was considered as proof of the great value of this district as oil territory. All along the valley of Duck Creek to the summit oil wells were bored, and lands held and sold at fabrilous prices. In the southern part of the County, some very fine wells were sunk, which are yet producing quite an amount of oil. Most of the oil was produced before the Marietta, Pittsburg and Cleveland Railroad was constructed, and the expense to wagon it over bad roads caused the business to languish. And now that the railroad is finished; the excessive product in Pennsylvania, and the extremely low price is still preventing the oil trade in Duck Creek valley from reviving again to any great extent. feet. These eruptions were attended by a flow of petroleum reviving again to any great extent.

It has been practically proven at different times that brine for the manufacture of salt can be obtained in immense quantities at convenient depths beneath the valley of the West fork of Duck Creek and its tributaries in this County. This fact was revealed by the boring of the salt well at the village of Olive at an early day. Brine has been found in the boring of all the oil wells along this valley, at depths varying from 100 to 400 feet. This brine is very strong and almost free from sulphate of lime, and when evaporated, produces a very pure and desirable article of salt for domestic and packing-house purposes. A little salt for local use has been made along this valley for many years. But the difficulty of obtaining speedy and cheap transportation in large quantities for such a heavy product as salt, has very materially discouraged and retarded what might have been made ere this a considerable source of wealth and importance to this part of the County. This difficulty is now obviated by the construction of the Marietta, Pittsburg and Cleveland Railroad, which furnishes the required transportation. And we construction of the Marietta, Itsoling and Odorala Paragonal, which furnishes the required transportation. And we find large quantities of excellent salt now being manufactured at South Olive, and shiped to different parts of the country. This salt is much sought after, and commands the highest wife in the property.

This salt is much sought after, and commands the highest price in the market.

The first cost of manufacturing salt in this County is very much reduced by the cheapness, abundance and convenience of the coal used in the evaporating process. Other valleys in this County have been little explored for the saline fluid; but there is no doubt of them also containing an abundance of excellent brine, which in due course of time, will be pumped out and manufactured to meet the increasing demand.

for this indispensable article.

CENTRE TOWNSHIP

Was formed June, 1851, by the commissioners of the County, at their first regular session, from Congressional Union Township, territory taken from Monroe County and from Congressional Noble Township and territory taken from Morgan County. Before and at the time of the crection of Noble County, Union Township was in the north-west corner of Monroe County; and Noble Township was in the north-cast corner of Morgan County; both townships were bounded on the north by the south side of Guernsey County. Centre Township was formed by taking eighteen sections from the west side of Union, which Township thereby became extinct, and taking twelve sections from the east side of Noble, making the Township of Centre, at that time five miles in width east and west, and six miles in length north and south. Some years after this the County Commissioners took two and one half sections from the south-east corner of Centre and attached them to Enoch Township; leaving Centre Township as it now stands, with an area of twenty-seven and one-half square miles, or twenty-seven and one half sections. The Eighth Range line runs through Centre Township from north to south, between that portion taken from Union

The Eighth Kange line runs through Centre Township from north to south, between that portion taken from Union and that portion taken from Noble Township; and was the original line between Morgan and Monroe Counties at the time of the erection of Noble County.

Three-fourths of the Township is drained by the tributaries of Wills Creek. The Little Buffalo Fork of Wills Creek flows through the Township in a north-westerly direction.

flows through the Township in a north-westerly direction. The other fourth of the Township is drained by the east and west forks of Duck Creek.

The first settlements within the limits of this Township were made by Ephraim Bates and James Dye, who purchased and settled on lands bordering on Wills Creek in the year of 1809. Ephraim Bates made the first entry of lands ever made within this Township; this entry being for the southeast Quarter of Section twelve; a portion of which is now occupied by the town of Sarahsville, it being built on the south-east corner of the same Quarter section. Levi W. Finley owns sixteen acres of the west part of the same. The Noble County Agricultural Society has ten acres of the same for Fair Ground purposes, and the heirs of John McGarry,

deceased, own the remaining part lying north of the Creek. The same Ephraim Bates erected a grist mill on said Creek, soon after he settled, which was located on what is now the north limits of Sarahsville. This was perhaps the first water mill creeted within the limits of Noble County. Ephraim Bates was born in the State of New Jersey, and served as a soldier in the revolutionary war for our Independence. He afterwards came over the Allegheny Mountains and settled in Washington County, Pennsylvania, and from thence he came to the location before mentioned. His son, Ezekiel, who was then but a boy, came at the same time with him. And two other sons, Daniel and Isaac Bates, also came within the following six years. He was the grandfather of the Hon. Bethel Bates. He died in the year of 1832, at the advanced age of one hundred years. His wife Susannah died two years later at the same age.

The said James Dye also came in the year of 1809, and settled one and one-half miles further down the Creek on the lands now owned by Robert Barry, Esquire, and the Noble County infirmary in Section two of this township. James Dye came from Greene County, Pennsylvania, and resided on the above-mentioned lands, until the year of 1837, when he removed to the State of Illinois. Within the next six years came Daniel and Isaac Bates, sons of the before mentioned Ephraim Bates, also James Noble, Matthew Ball and three sons, Daniel, John and Jonas, Jacob and William Jones, John McGarry, William Stootsberry, Andrew Nicholson, John Morrison and is son Alfred, and Daniel Devolld. James Noble came from mear Marietta, Ohio, Matthew Ball and sons came from Maryland, Jacob and William Jones came from Pennsylvania, his son Alfred, and Daniel Devolld. James Noble came from near Marietta, Ohio, Matthew Ball and sons came from Maryland, Jacob and William Jones came from Pennsylvania, John McGarry came from Ireland, William Stootsberry came from Virginia, John Morrison and son came from Maryland, and Andrew Nicholson came from Jefferson County, Ohio. They all settled along the Buffalo fork of Wills Creek and its tributaries in the north part of this Township, with the exception of Daniel Devolld and sons who located on Salt Run, a tributary to Duck Creek in the southern part of this Township. Jonas and Daniel Ball were soldiers in the war of 1812 with Great Britain. These first settlers are now all dead except Alfred L. Morrison, who resides near Sarahsville, who is now eighty-three years of age and enjoying good health. health.

health.

David McGarry, Esquire, says that the first day that he went to school, when at the age of seven years was to Alfred Morrison in the year of 1826. The school was taught in a private log cabin situated in the north-west Quarter of Section seven, on land now owned by the said David McGarry, Esq. This was the first school ever taught within the present limits of Courte Township.

This was the first school ever taught within the present limits of Centre Township.

The County Infirmary Buildings in connection with over three hundred acres of land belonging to the same, are located in the north-west corner of the Township. The Infirmary farm contains some of the choicest land in the County. The Infirmary building proper is located on the nor h side of the Creek, and presents a splendid view from the Public road in front. William Buckey is the present Superintendent. There are about sixty immates at this time.

ELK TOWNSHIP.

This is part of Township five of Range Seven, and originally came from Monroe County. It is bounded on the north by Stock Township and Monroe County, on the cast by Monroe County, on the south by Washington County and on the west by Jefferson Township, and lies chiefly upon the waters of the East Fork of Duck Creek, but in the southern part are some of the sources of Pawpaw Creek. The land is generally hilly, but the abundance of limestone in almost all the hills tend to render the soil fertile. The farms are mostly small, and a considerable quantity of tobacco is annually cultivated and cured. The majority of its citizens are of German de-

Harriettsville is situated in the southern part of the Township in the valley of the East Fork of Duck Creek, and is quite an enterprising town. Large quantities of tobacco are annually packed for exportation at this place.

ENOCH TOWNSHIP

This is part of original Township six of Range eight, and This is part of original Township six of Range eight, and originally came from Monroe County. Some time after the formation of Noble County, the County Commissioners took two and a half sections from the south-east corner of Centre and added them to the north side of Enoch. It is bounded on the north by Centre, on the east by Stock and Jefferson, on the south by Jefferson and on the west by Olive Township, and is chiefly drained by the waters of Middle Creek. Its inhabitants are principally of German descent. The farms are generally small and the surface quite broken.

A considerable amount of tobacco is annally raised for exportation, beside other products. Fuldah is the only town or village in the Township, and being located on an elevated ridge commands an excellent view of the surrounding country. The Roman Catholies have recently built a very fine church at this place.

try. The Roman Cohurch at this place.

STOCK TOWNSHIP.

This Township is situated in the eastern part of the County, and bounded on the north by Marion Township, on the east by Monroe County, on the south by Elk and Jefferson, and on the west by Enoch Township. It is drained by the waters of the East Fork of Duck Creek, and its surface like its neighboring Townships is hilly.

The Towns of Carlisle and East Union are located in the

The Towns of Carlisle and East Union are located in the valley of the East Fork of Duck Creek in this Township. The bottom lands are not so wide along this Fork as they are along the West Fork of Duck Creek. Stock Township originally all came from Monroe County.

BEAVER TOWNSHIP.

This is part of Township 8, of Range 7. It was surveyed by Joseph Barber, Deputy Surveyor, in 1801, and was sub-divided into sections by Philip Green in 1805. The entire Township came from Guernsey County in the formation

tire Township came from Guernsey County in the formation of Noble County.

The bill for the erection of Noble County first passed the State Senate as it was introduced to that body. Beaver at this time only contained a part of the original Congressional Township, the other or northern part having been cut off and added to Milford Township while they were both in Guernsey County. The Lower House amended the bill as it had passed the Senate, so as to include all of Congressional Beaver. The bill, as thus amended, passed the House, and was approved by the Senate. This took back from Millwood its two southern rows of sections, and added them to the north side of Beaver Township, to which they now belong. In June, 1851, the County Commissioners reduced Beaver to its present limits, by taking part of it for the erection of Wayne Township.

The Beaver branch of Wills Creek flows through the entire

Township.

The Beaver branch of Wills Creek flows through the entire length of Beaver Township, from East to West. The bottom lands along this creek are usually wide, and very productive, adding much to the wealth of this Township. The Baltimore and Ohio Railroad, runs curving through a small portion of the north-east corner of this Township. The Turnpike from Quaker City, on the Baltimore and Ohio Railroad, in Guernsey County, to Summerfield, in Noble County, passes through this Township in a northerly and southerly direction. Noble County contains about twelve miles of this Turnpike road, which has now been built six years. It cost over one hundred thousand dollars, and was built by levying a tax on the realty, to a distance of two miles on each side of the line of the road through Beaver, and one mile on the East and two on the West side of the line of the road through Marion Township to Summerfield.

The first settlement in this Township was made by Joseph Carpenter and his son, Robert, in the year of 1805, on the

Carpenter and his son, Robert, in the year of 1805, on the lands now occupied by the town of Williamsburg (Batesville, P. O.). After this came William Finley, Edward Thomas, John and Robert Carpenter, John House, John Cline, James Gourby and John Starr. These were among the earliest settlers in the County. John Starr came from Pennsylvania, and all the others from Virginia, except Joseph Carpenter and son, before mentioned.

WAYNE TOWNSHIP.

WAYNE is situated in the north part of the County, and is bounded on the North and West by Guernsey County on the South by Seneca Township, on the East by Beaver Township.

ship.

It presents a very irregular outline, which could not be easily avoided, with the territory situated as it was by legis-

lative enactment.
In June, 1851, the Board of County Commissioners, a

In June, 1851, the Board of County Commissioners, at their regular session, mapped out the County on a basis of fourteen townships, but at the solicitation of Joseph Burson, an energetic man living within the present boundaries of the township, they were prevailed on to make the number fifteen, and name the one in which he lived, Wayne.

This Township was formed from parts of Wright and Richland Townships, which belonged to Guernsey County before the erection of Noble. Also 3,241 acres from Congressional Beaver, all of which now constitute the awkward-shaped Wayne, containing an area of twenty-one square miles.

The Township is drained by the Seneca and Beaver branches form a junction near the centre of the Township; the Opossum branch flows through the north-west part of the Township.

It has a great deal more bottom lands than any Township in the County, and of a superior quality. The surface of this Township is the most regular and level of any in the County.

The first settlements were made at an early date. Joseph Reeves came from Pennsylvania in 1805; and Delongs, alsofrom Pennsylvania, followed in the same year. Thomas and George Richie came from Ireland in 1808, and within the next five years came John Milhon, William Lowrey, John Stranathan, Albert Strong, (also from Ireland), John Thompson, from Pennsylvania, all of whom are dead; Margaret, the wife of Thomas Richie, is still living at the advanced age of

ninety years. She was born in the County of Donegal, Ireland, in the year 1786, and emigrated to the United States in 1792, at the age of six years, and settled with her father in what is now Jefferson County, Ohio, which was at that time Washington County, before Ohio was admitted to the Union. She married Thomas Richie in 1804, and in 1808 moved to Wayne Township, and settled on Section 6, where she still resides with her sons, having lived on the same farm sixtyeight years.

Joseph Reeves was a soldier in the Revolutionary War, and

died at the advanced age of ninety-six years.

Kennonsburgh is a considerable village in this Township, and is located north of Seneca Creek, near the centre of the Township. It contains two dry-goods stores, which do a considerable business. Quite an extensive business is done in packing tobacco.

BROOKFIELD TOWNSHIP.

This Township is situated in the north-west part of the County, and originally belonged to Morgan County. It contains an area of thirty square miles; being five miles wide east and west, and six miles long. The surface is less broken than in any other Township in the County, and is drained in several directions. The north-west part is drained by a branch of Wille' Creek: the east part by the West Fork of Duck than in any other Township in the County, and is drained in several directions. The north-west part is drained by a branch of Wills' Creek; the east part by the West Fork of Duck Creek, and the south-western part by Meigs' Creek. It contains some of the finest farming lands in the County, and an abundance of coal. The farmers in this Township (a-great many of them) are growing wool, and turning their attention to grazing and stock raising. Renrock is the only town or post-office in the Township.

MARION TOWNSHIP.

This Township originally belonged to Monroe County, and is situated in the eastern part of the County. Its waters are drained in several directions. The north-eastern part is drained by Wills Creek, and the remainder principally by the East Fork of Duck Creek. The surface of Marion is very the East Fork of Duck Creek. The surface of Marion is very uneven, but owing to the abundance of limestone the soil is good, and produces splendid crops of grain, tobacco, &c., and is considered one of the best Townships in the County. It is well supplied with coal, and doubtless contains other minerals counter undersales and the coal and doubtless contains other minerals

as yet undeveloped.
Summerfield is the largest Town in the Township, and is a village of considerable importance. It is situated in the east-ern part of the Township, and contains a population of about four hundred. It does quite a flourishing business in the

mercantile line.

Treedom, a small village in the north-western part of the Township, has quite an extensive trade.

NOBLE TOWNSHIP.

NOBLE TOWNSHIP.

This is part of Township 7 of Range 9, and part of Township 8 of Range 10, and originally belonged to Morgan County. It is bounded on the north by Buffalo, on the east by Centre, on the south by Olive and Sharon, and on the west by Brookfield Township. The County Commissioners, in the adjustment of the several townships, at their first regular meeting held after the formation of this County, took from the east side of Noble two rows of sections, and added them to Centre Township, and took from the cast side of Brookfield one row of sections, and added them to Noble Township. The Legislature, at its last session, took a small portion from the South side of Noble, and added it to Olive Township. Noble Township now contains a little less than thi ty square miles, but originally contained thirty-six square miles. It is drained by the waters of the West Fork of Duck Creck, and contains a considerable amount of rich alluvial bottom lands. The hills facing this valley generally have a gradual ascent, and are well stored with coal, iron-ore, and limestone.

The Town of Bellevalley is situated on the M. P. and C. Railroad, near the centre of the Township. Hiram-burg is situated in the north-west corner of the Township, at a distance of one mile from Hiramsburg Station, on the Railroad. Hoskinsville is situated in the south-western part of the township, at a distance of one mile from Hoskinsville is situated in the south-western part of the township, at a distance of shout two miles west of Bellevalley.

Hoskinsville is situated in the south-western part of the town-ship, at a distance of about two miles west of Bellevalley. Rochester, another small town, is situated in the north-east corner of the Township.

OLIVE TOWNSHIP.

This is part of original Township 6, of Range 9. At the formation of Noble it all came from Morgan County. It is bounded on the north by Noble and Centre Townships, on the east by Enoch, on the south by Jackson, and on the west by Sharon Township. Olive Township originally contained thirty-six square miles; but the County Commissioners, at their first regular session held after the formation of Noble County, took from the west side of the same one and a half row of sections, and used them in the formation of Sharon Township, and reduced the area of Olive to twenty-seven square miles. The State Legislature, at its last session, changed part of the north boundary of this township, by adding to it all of that part of Noble Township which lays south

of Duck Creek, most of which lays within the corporate limits of the town of Caldwell. This Township is drained by the waters of the West Fork of Duck Creek; the valley of which contains quite a large area of rich bottom land, producing excellent crops of grain. The hills bordering this valley are not so steep as they are along the East Fork of Duck Creek, and contain an abundance of limestone, the great natural fertilizer. It contains but a small amount of land which cannot be cultivated.

The Cumberland seam of coal is found in all the high hills,

The Cumberland seam of coal is found in all the high hills, but generally at some distance from the valley of the Creek.
The Marietta, Pittsburgh and Cumberland Railroad is constructed through this township, and passes through the towns of Caldwell and South Olive.

of Caldwell and South Olive.

Caldwell, the County seat, is situated in the northern part of this township, in a horse-shoe bend of Duck Creek, and possesses natural advantages for becoming a town of considerable note. It was laid out on the 20th day of June, 1857, by Samuel Caldwell, in honor of whom it was named, and now contains about five hundred inhabitants.

Two weekly newspapers are published here. The Noble

Two weekly newspapers are published here. The Noble County Republican, edited by W. H. Cooley, and the Citizens' Press, edited by John M. Amos.

JACKSON TOWNSHIP.

JACKSON TOWNSHIP.

This Township is situated in the south-west corner of the County. It originally came from Morgan County, and is Township 5 of Range 9. It is bounded on the north by Sharon and Olive Townships; on the cast by Jefferson Township and Washington County; on the south by Washington County, and on the west by Morgan County. The boundaries of this Township were not changed in the formation of Noble County, consequently its area is the same that it was when within the bounds of Morgan County. There is in this Township as in others to the north and north-east, an abundance of limestone in the hills, giving fertility to the soil. The surface generally has a southern slope, being drained by a number of small streams which flow south into the Muskingum River. The coal of the Cumberland seam is found throughout this Township, and is now being mined to a considerable extent for local use. This coal seam is from four to six feet in thickness, and of an excellent quality. Its descending slope being towards the natural outcrop, or towards the south and southwest, renders it easy of access, with natural drainage, two very important items to be considered in the cost of mining. This is certainly a valuable coal field, which, when properly developed, will add much to the wealth of this Township.

Dexter City is situated in the north-east corner of Jackson, and in the north-west corner of Jefferson Township, in the valley of the West Fork of Duck Creek; and the Marietta, Pittsburgh and Cleveland Railroad runs through the town, making it accessible for all kinds of business.

SENECA TOWNSHIP.

SENECA TOWNSHIP.

This was one of the original Congressional Townships, being Number Eight of Range Eight, a part of which was taken to form Richland Township in Guernsey County, previous to the formation of Noble; and has never been able to recover her former territory, it being given to Wayne Township by the Commissioners in the construction of the different Townships. This territory consists of two rows of sections off of the north side of the original Township. It is bounded on the north by Wayne, west by Buffalo, south by Centre and Marion, east by Marion and Wayne. This Township is drained by Seneca Fork of Wills Creek, which flows through the north-east part; the Opossum branch through the centre, and Crab Orchard Branch through the western part. The first settlements were made by Timothy and Ephraim Bates, who came from Pennsylvania; Hiram Danford, from Belmont County, Ohio; also James Finley, Abraham Rich, Isaac and Aaron Vorhies, Levi Keller, and James Stevens, from Pennsylvania. All of these first settlers are now deceased except Hiram Danford and Levi Keller.

Mount Ephraim, the principal town in the Township, was laid out about the year 1838. The proprietor of the town was Ephraim Vorhies, from whom it derived its name. It is a town of considerable importance; has and will continue to do a considerable business in the packing of tobacco, and it is fair to presume that Mt. Ephraim has packed more tobacco than any other town in the County in the past thirty-five years. Has also done a good business in dry goods. Contains one Methodist Episcopal, and one Christian Church, two stores, and one flouring mill.

Seneca Township was surveyed by Levi Barber, in 1801, and subdivided into sections by William R. Putnam, in the year 1805.

year 1805.

BUFFALO TOWNSHIP.

This is part of Township 8, of Range 9. It was surveyed by John Bever, Deputy Surveyor, in 1798, and sub-divided into sections by William R. Putnam, in 1805. Previous to the crection of Noble County, this was a full Congressional Township belonging to Guernsey County; but at the formation of Noble there were two rows of sections cut off along the

north side of the township, and left remaining connected with Guernsey County, thereby reducing the township to only twenty-four square miles. The greater portion of this township constitutes the valley of the little fork of Wills Creek.

The first settlements in this township were made from 1813 to 1818; by John Kackley, George R. Johnson, Abraham Brookher, George and John Rich, Thomas Nicholson, Samuel and Isaac Kackley, John Drake, John and Jacob Larrick, Joseph Dyson. The Richs were from Pennsylvania, Thomas Nicholson was from Jefferson County, Ohio, and the others were from Virginia. None of the original settlers are now living. Abraham Brookher was a soldier in the war of 1812, with Great Britain. Buffalo Township is bounded on the north and west by Guernsey County, on the south by Noble and Centre Townships and on the East by Seneca Township.

SHARON TOWNSHIP

Is bounded on the north by the Townships of Brookfield and Noble; on the east by Olive Township; on the south by Jackson Township and Morgan County; and on the west by Morgan County; and contains an area of twenty-seven square miles. It came from Morgan in the formation of Noble County.

The territory row comprised within the County.

County.

The territory now comprised within the limits of this township was originally parts of the townships of Manchester and Olive. The County Commissioners at their first regular session held after the formation of Noble County, while the county, and bounded on the north by the townships of Enoch ular session held after the formation of Noble County, while the county and bounded on the north by the townships of Enoch county, and bounded on the south by Washington formed the Township of Sharon, by adding to that part of the county, and on the west by Jackson and Enoch Townships.

Manchester Township which came from Morgan County, one and a half row of Sections taken from the west side of Olive Township; thereby making the newly formed township of Sharon four and a half miles wide east and west, and six miles long north and south.

The surface of this township is gently rolling, descending gradually to the beds of the streams, rendering nearly all of it within the range of cultivation. Its slopes are mostly toward the south, affording to the soil and vegetation, a good share of sunlight and heat. There is considerable of limestone in the hills, making the soil generally good and productive, yielding fair crops of grains and feuits in return for the farmers' labor when bestowed. It is chiefly drained by the waters of Olive Green Creek.

when bestowed. It is chiefly drained by the waters of Care Greek.

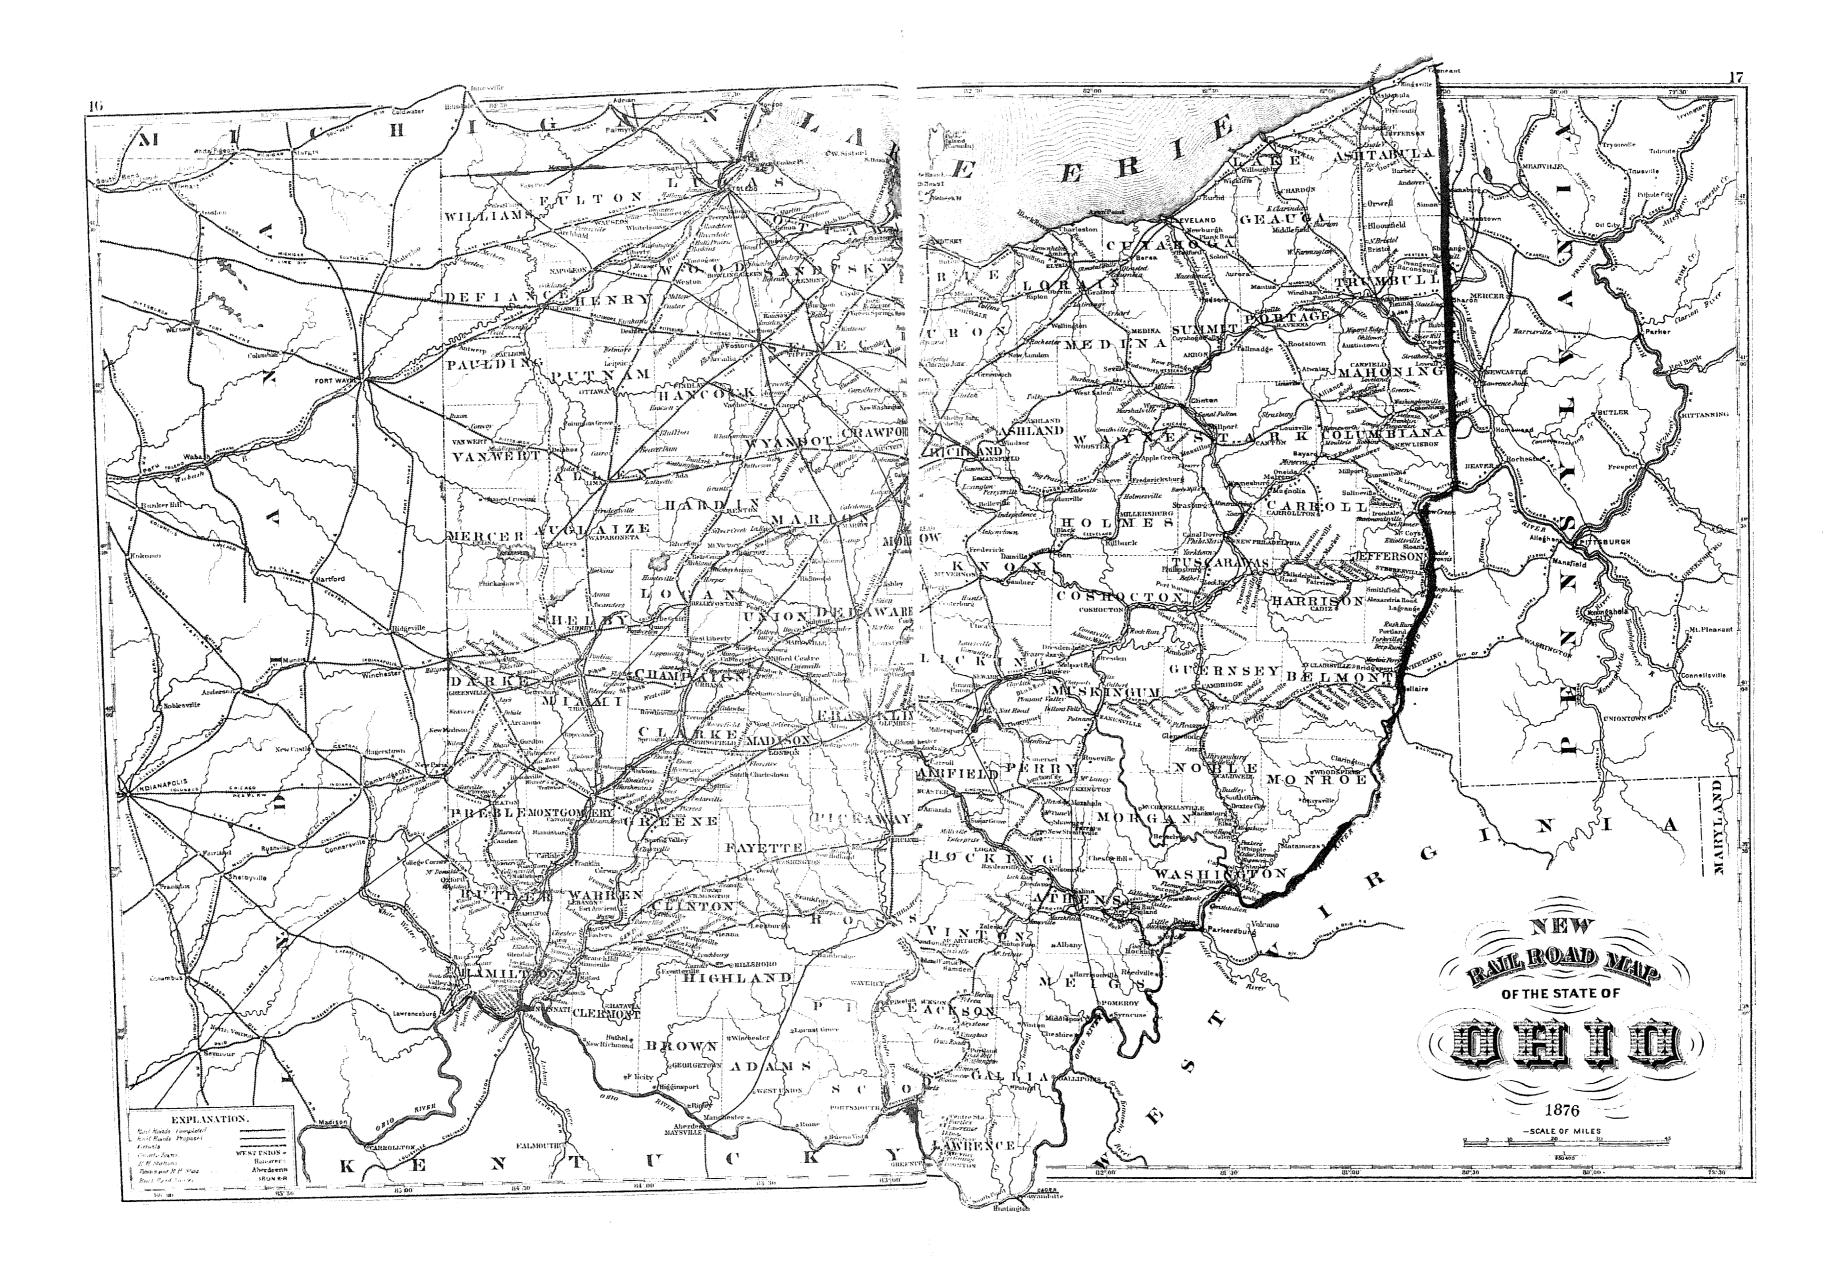

The Cumberland seam of coal is found in the high hills.

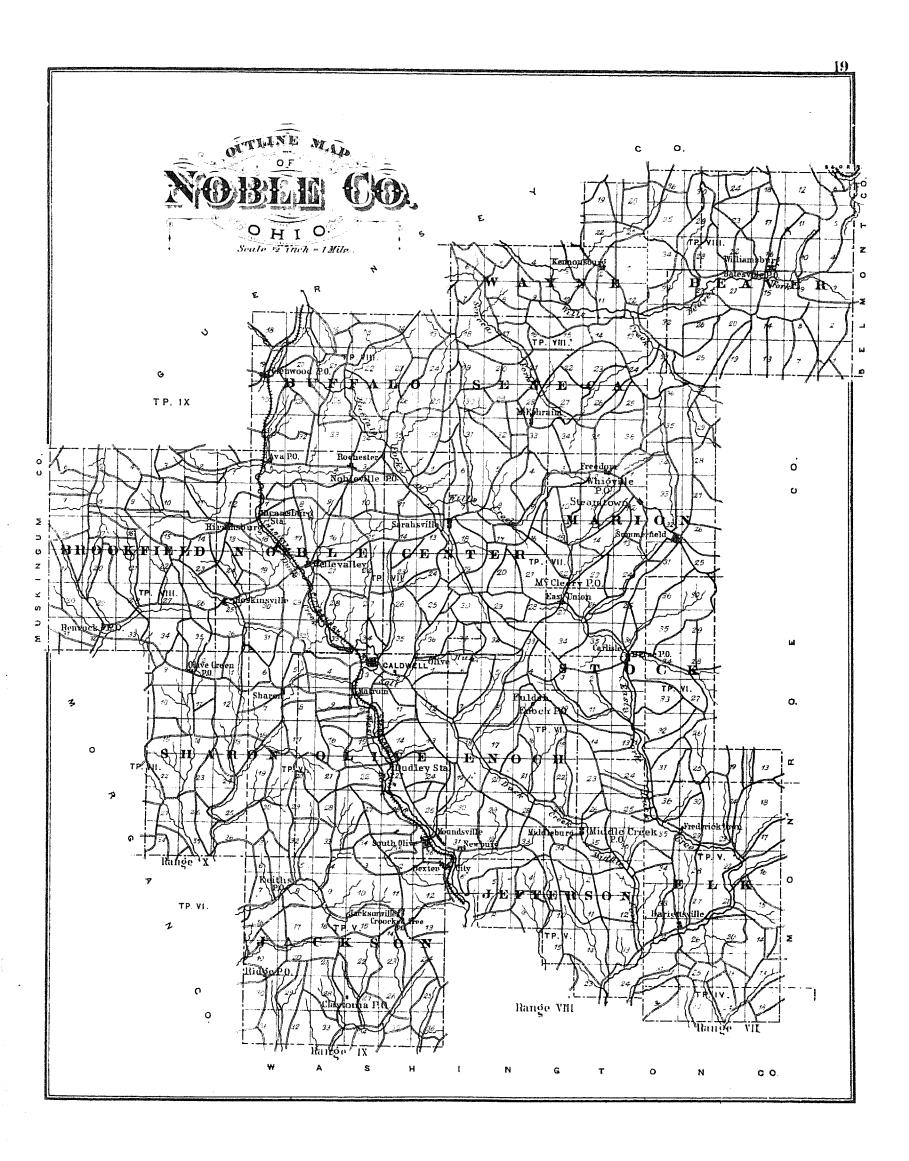

This township has two Post-Offices within her boundaries, Olive-Green and Sharon.

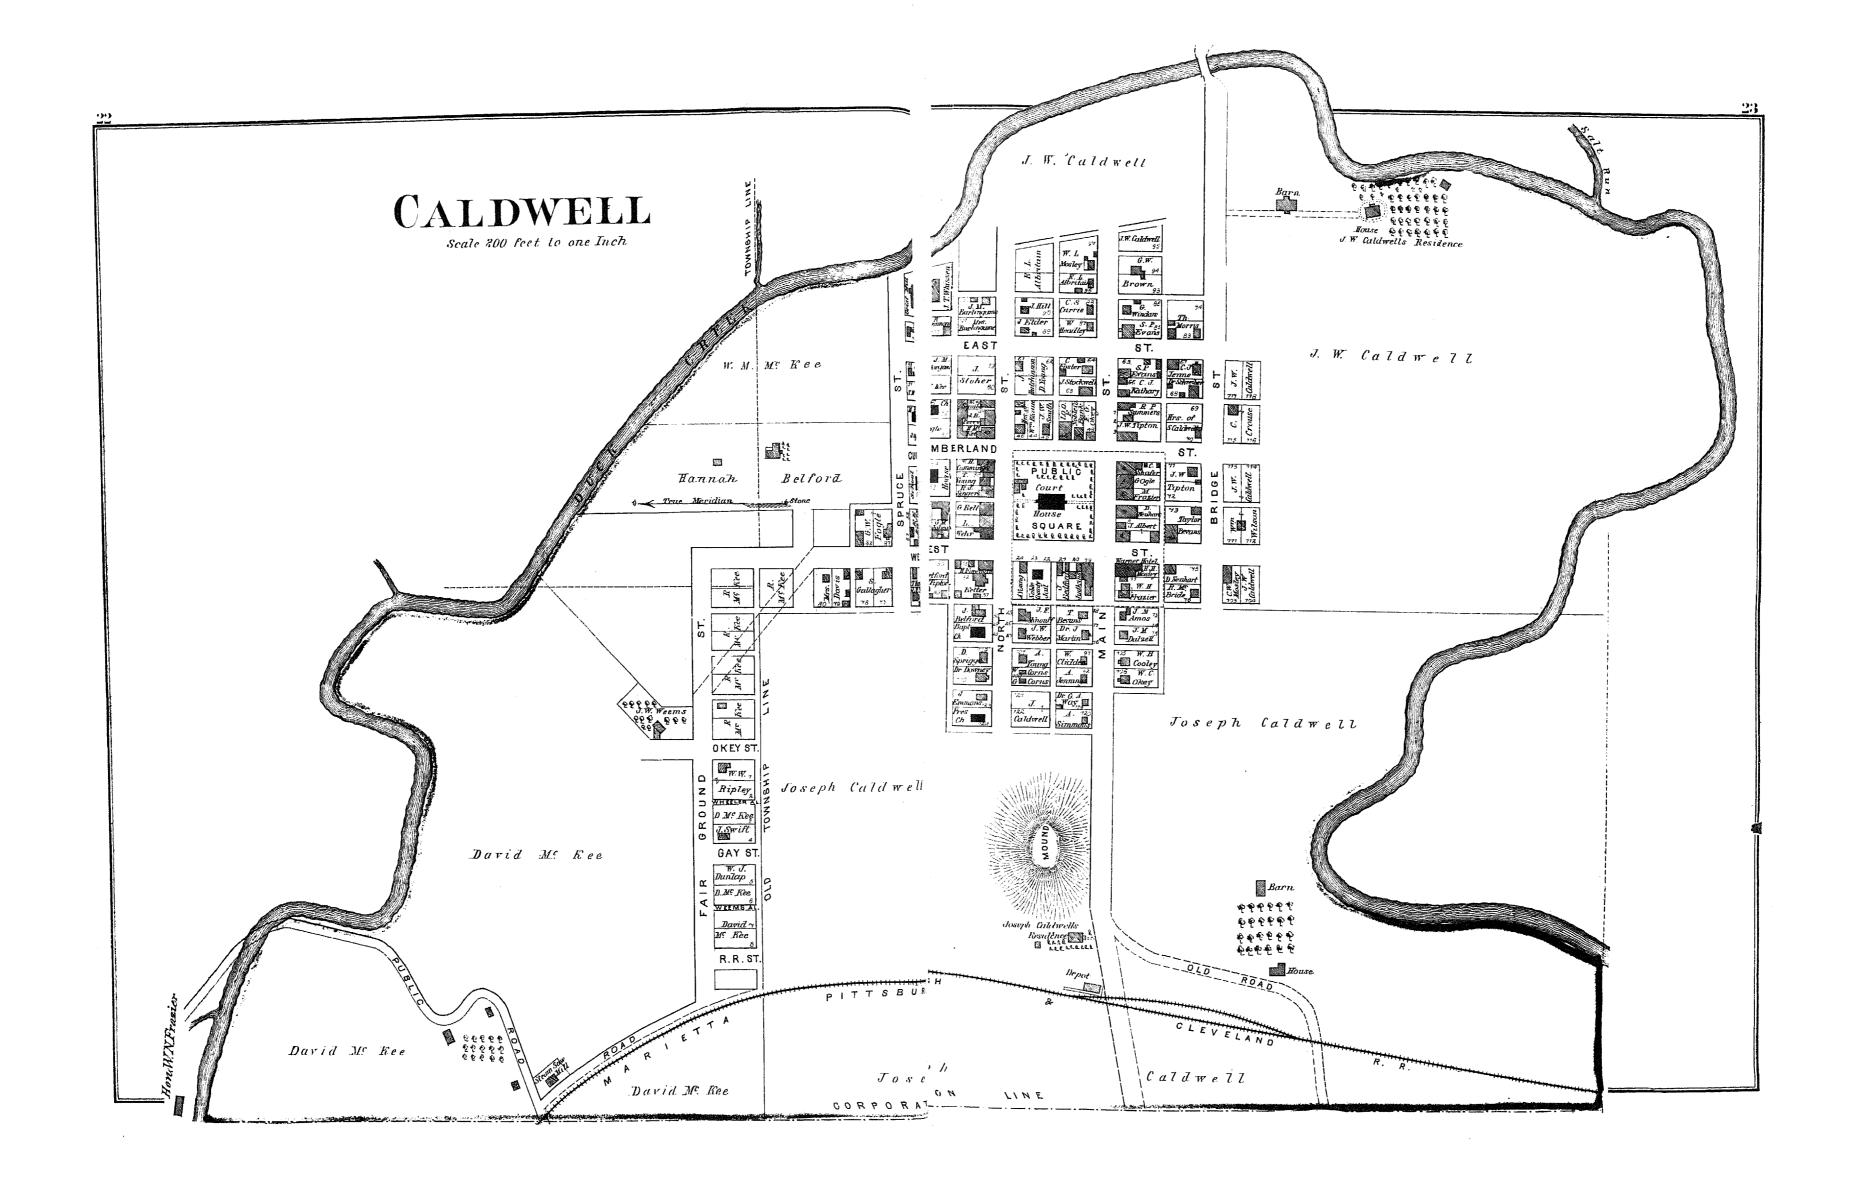

Sharon is quite a flourishing town, situated in the northeast corner of Sharon Township, on an elevated site, gently sloping towards the south. It contains one Presbyterian and one Methodist Church, several grocery and dry goods stores, one drug store, one Hotel and one tannery.

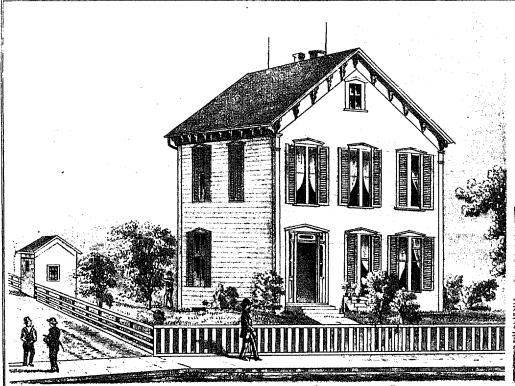

At the formation of Noble County the larger portion of this township came from Monroe County, and the remaining or smaller past came from Washington County. Its outline is very irregular. The West Fork of Duck Creek flows through the south-west corner, but it is chiefly drained by Middle Creek and its tributaries. The surface of this township is quite uneven. The streams are mostly bordered by high abrupt hills, which being well stored with limestone and coal are rich and fertile withal. The soil as a general thing is very productive. The valley of Middle Creek is rich, being made up of the successive washings from the neighboring limestone hill-sides. The upper Salem or Cumberland seam of coal is found in all these hills at its proper elevation. Valuable mines have been opened by the Ohio Coal Company in the western part of this township to which point a branch railroad has been constructed from the M. P. and C. Railroad at Macksburg, in Washington County. The coal is of good quality, well adapted to household use, to the generation of steam and to the rolling mill. A branch railroad has been constructed from the M. P. and C. Railroad has been constructed from the M. P. and C. Railroad has been the valley of Buffalo Run for coal purposes. Considerable quantities of petroleum have been obtained along the valley of the West Fork of Duck Creek in this township. There has also been small quantities of petroleum obtained in the valley of Middle Creek.

Brine for the manufacture of salt can be obtained by boring in these valleys, and fuel for its evaporation is abundant. There are two post-offices in this township, one at Middleburg called Middle Creek P. O. and the other at Dexter City.
