

SECTION 106

PRESERVING OUR PAST, PROTECTING OUR FUTURE

Mansfield, Richland County

In Mansfield, a dedicated historic homeowner encountered a critical challenge when their child experienced severe health issues, including seizures, caused by lead exposure in their historic home. By leveraging the Section 106 process in partnership with HUD's Lead Safe Program, the project addressed the lead hazards while preserving the home's distinctive character, ensuring both the child's safety and the preservation of the community's history.
